Re: Amended claims 31-335A, 31-372, 31-7261
Enlargement Claim 31-11626

Dear Mr. Lundholm:

Enclosed are amended adjudication claims, adding stockwater as a claimed use. Water right 31-4009 is already recommended for stockwater use, so no amended claim is required. If you believe these claims accurately reflect your water use, please return them with notarized signatures. There will be no fee.

Also enclosed is an enlargement claim for an additional 11.5 acres of irrigation from the sprinkler well, as illustrated on the attached aerial photo. Note that an enlargement claim shows a diversion rate, but in operation the parent right and the enlargement together are limited to the diversion rate of the parent right. The main effect of the enlargement is to authorize additional acres. Please review this claim carefully. If you wish to file this claim, please return it with a notarized signature and a check for \$111.50 made out to "IDWR."

Please call me if you have questions.

Sincerely,

Bryce A. Contor
Senior Water Resource Agent

MEMORANDUM

To: File 31-4009
Fr: Bryce Contor
Date: 2/21/2001
Re: Carl Lundholm Office Visit

Today I met with Carl Lundholm in the office regarding claim 31-4009.

One of the issues is the acres of irrigation shown in the NE 1/4 of section 34:

Mr. Lundholm indicates that at one time he pumped out of the Independent Ditch of the west of the property on an exchange agreement and irrigated the north 80 acres with sprinklers. Mr. Lundholm will mail in copies of the sales agreement for the sprinkler equipment to establish the date that this occurred.

Mr. Lundholm also provided aerial photos from 1966, 1972, and 1980 (copies are attached). I have sketched in the location of ditches which were used to irrigate pasture lands not recorded with the ASCS crop programs. The 1972 photo especially shows more irrigation than proposed in the preliminary recommendation. Mr. Lundholm indicates that the entire 160 is currently irrigated.

I also have attached a printout of the TerraServer image from a 1992 photograph. This image clearly shows a difference between Lundholm's lands and non-irrigated, non-cultivated lands to the north.

I have provided Mr. Lundholm with a copy of the pamphlet "Evidence of Priority." He will try to get affidavits from persons who have first-hand knowledge of the extent and dates of his farming operations.

Another issue is the acreage in the NW 1/4 of section 35:

The north high spot next to the county road has been leveled and is currently irrigated.

In the center of the recommended place of use is an area that shows a different color on the aerial photo, but Mr. Lundholm indicates this is irrigated and the native growth is used for irrigated pasture.

In the southeast corner of the NW 1/4 is a ridge that is irrigated by stretching out hand pipes from the irrigation well in the NE 1/4 of section 35.

The color map for 31-7261 does not include lands on the south, up against the creek, which are irrigated. There is a tree patch on the east edge, between the home on the north and the feedlot on the south, which is also irrigated.

Stock water should have been included as a use on all of the claims. Stock drink out the ditches, and when the NE 1/4 of 35 is pastured, a stock trough is filled from the irrigation well.

The recommended combined diversion limitation is inadequate in Mr. Lundholm's mind, due to the severe ditch losses.

My responses to Mr. Lundholm include:

1. Irrigation in NE 1/4 of section 34. Based on the aerial photographs, I plan to increase the recommended acres. Some of the areas indicated as irrigated pasture by Mr. Lundholm are difficult to interpret from the aerial photos, so I will rely heavily on the affidavits to be provided.
2. High spot on the north of section 35. From the aerial photo, it appears that this was not irrigated in 1987. However, the photo is somewhat difficult to interpret, I will consider changing this recommendation based on what the affidavits may say.
3. Native plants in the center of the place of use. These are currently recommended, I don't plan to change that recommendation.
4. High spot on the SE corner of the NW 1/4 of 35. Since this was irrigated with the hand pipes from the well, it will be reviewed with any enlargement claim filed. The aerial photo does not give strong indication of irrigation, so this will also depend on the affidavits.
5. Extra acres on license 31-7261. The aerial photo tends to indicate that all the lands up to the creek are irrigated. Mr. Lundholm may file an enlargement claim for this use and the high spot use. I can recommend the lands next to the creek based upon the photo, and will review the affidavits to see what can be recommended on the high spot.
6. Stock water use. I can recommend the stock water uses when Mr. Lundholm signs amended claims including stockwater.
7. Upon reviewing the file, I realize I used the wrong Henninger measurement for the combined use limitation. For now I can adjust the limitation to the 7.15 cfs measured by Henninger in 1947; Mr. Lundholm believes he has another Henninger measurement showing even more capacity. Ditch loss and Hubble analysis data would support recommending more diversion rate based upon a different Hennigner or Shenton measurement. Note that the 6.53 cfs measurement I relied upon corresponds with the recommended 1943 priority date. Increasing the cfs would require advancing the priority date to the date of that larger measurement.

Affidavits needed concerning:

1. The extent of irrigation in the NE 1/4 of section 34. These should give estimates of total number of irrigated acres and dates.
2. The dates and extent of irrigation of the "high spot" in the SE of the NW 1/4 of 35, with hand pipes from the irrigation well.

Affidavits should clearly indicate "personal knowledge," with helpful details of how the knowledge was gained (I baled hay there in the summer of 19XX, or changed water in the spring of 19YY, for instance).

WATER RIGHT LICENSE

License of Water Right No. 31-7261 Priority June 8, 1977 Amount 1.76 cfs

THIS IS TO CERTIFY, that Carl W. Lundholm
of Hamer, Idaho, has complied with the terms and conditions of Permit
No. 31-7261 issued pursuant to Application for Permit dated June 8, 1977,
and has submitted proof to the Department of Water Resources on August 2, 1982,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 2.01 cfs of water from a groundwater source,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u> from <u>April 1</u> to <u>November 1</u> at <u>1.76</u> cfs and <u>264.0</u> acre feet			
_____ from _____ to _____ at _____ cfs and _____			
_____ from _____ to _____ at _____ cfs and _____			

(both dates inclusive)

Subject, however, to the condition that no more than 1.76 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
264.0 acre feet per year, said waters to be diverted within the SE $\frac{1}{4}$ NE $\frac{1}{4}$ Section 35,
Twp 7N, Rge 35E in the County of Jefferson

Description and location of place of use:

Total number of acres irrigated 88

CONDITIONS OF APPROVAL

a. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

b. The right to the use of the water hereby confirmed is restricted and appurtenant to lands or place of use herein described, and is subject to all prior water rights, as provided by the laws of Idaho.

c. Any water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water other than hydropower, within the State of Idaho initiated later in time than the priority of this license.

This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 3.0 afa per acre for the lands above.

Witness the seal and signature of the Director, affixed at Boise, Idaho, this 18th day of September, 19 86.

RE: CHANGE IN ADDRESS FOR A31-00335A, -00372,
-04009, -07261

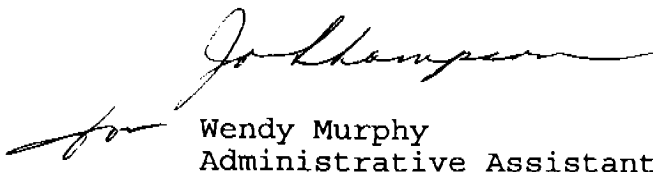

Dear Mr. Lundholm:

Your Eastern Water Measurement District bill was recently returned to our office because there was an old address on file. I have updated my records with information obtained from the phone book, but my original information came from the records of the Snake River Basin Adjudication (SRBA).

I have enclosed the change of address form the SRBA uses to change their records. I recommend that you complete this form and return it to Jo Thompson, Department of Water Resources, 900 N Skyline Dr.; Idaho Falls, ID 83402, so that all future correspondence regarding your water right is mailed to the correct address.

Please do not hesitate to contact this office if you have any questions regarding this matter (525-7161).

Respectfully submitted,

Wendy Murphy
Administrative Assistant
