NOTE TO FILE 31-2278-- 31-2334-- 31-2355-- 31-2393-- 31-10660

Dave Carlson -----11/2000

These water rights were claimed by one owner and as one POU/POD, somewhat as licensed. After the original owner passed away, the POU was divided up into different ownership (but same family). Some of the licenses (31-02278 & 31-02234) were split as best as possible to go with the correct well or combinations of wells and to go with the correct POU. Some of the licenses (31-2355, 31-2393) stayed whole, where it was feasible.

A beneficial use claim (31-10660) was filed originally for additional CFS and a few extra acres, and was also split according to division of the POU.

SRBA RECOMMENDATIONS

The recommendations result in some acres readjustments from the claims and the ownership split, and result in a readjustment of CFS at the same time. The combined licenses result in a total POU of 960 acres. The actual POU found was 964 acres. The beneficial use claim can account for the additional 4 acres.

The combined licenses have a total CFS of 19.90 cfs on 960, which is a little over an inch/acre. An additional amount of CFS claimed on the BU claim.

SECTION 17 POD

Licenses 31-02355, 31-02393, and a part of 31-2334(C) and 31-10660(A) were claimed in the SW 1/4 of section 17. The POD's are on site and wells were not measured prior to 1963 to have produced anything more than the licensed amount, so no extra CFS was allowed. 31-10660A was disallowed. 31-2355 & 31-2393 recommended as whole water rights. 31-2334C--- 0.50 CFS recommended.
100 acres -----2.0 cfs allowed.

SECTION 16 POD

For the NW 1/4 of Section 17, a part of 31-2278(A), a part of 31-2334(A), and a Part of 31-10660(B) were claimed and the well in section 16 is used to irrigate this POU. Again the POD was never measured prior to 1963 to have produced anything more than the licensed amount, so no extra CFS was allowed and 31-10660B was disallowed. The water from this well is delivered through a canal that would have some conveyance losses.
160 acres -----3.33 cfs allowed. Pro-rated share of remaining licenses

For the NE ¼ of section 17 and the W ½ of the NW ¼ of section 16, 31-2278E, 31-2334B, and 31-10660C were claimed and the well in section 16 is used to irrigate this POU. For the same reason as above, the 31-10660C was disallowed. The water from this well is delivered through a canal that would have some conveyance losses. 183 acres---3.81 cfs allowed. Pro-rated share of remaining licenses.

Note: Section 16 well recommendations total= 7.14 cfs.

The well was measured in 1957 as a 30 hp motor at "greater than 300 inches".

The measurements provided by the claimant are from later dates that show

larger HP motors on this well. 1988—40hp= 4.76 cfs

1989= 10.0 cfs/HP not given. I found a 60 HP motor on this well in the 1990's.

SECTION 9 THREE PODS

For the SE ¼ of section 8, water rights 31-2278B, 31-2334F, and 31-10660D were claimed and the three wells in the SE ¼ of section 9 were used to irrigate this POU. 106 acres—4.02 cfs

For the NW ¼ and the W ½ of the NE ¼ of section 8, water rights 31-2278C, 31-2334D, 31-10660E were claimed and the three wells in the SE ¼ of section 9 were used to irrigate this POU. 212 acres—8.09 cfs

For the SW ¼ and the W ½ of the SE ¼ of section 5, 31-2278D, 31-2334E, and 31-10660F were claimed and the three wells in the SE ¼ of section 9 were used to irrigate this POU. 203 acres—7.70 cfs

The three wells in section 9 were measured at different times for different licensing exams and the water is conveyed to the POU through a canal system over 4 miles long.

SWSE well measured in 1956 ---- 6.40 cfs

SESE well measured in 1967 ----6.25 cfs (well drilled prior to 1963).

NWSE well measured in 1957 ----7.16 cfs----- for a total of ----19.81 cfs.

Or more than the remaining portions of licenses 31-2278 and 31-2334.

While this amount of cfs would be 1.9 inches/acre, it is close enough to the worst case conveyance loss calculation from the Worstall spreadsheet program to be acceptable.

These measurements are close to the 1963 mandatory permit date and seem to be the best record of what could be produced before 1963. The measurements submitted by the claimant show a higher diversion rate, but the conveyance loss spreadsheet numbers don't show any justification. Also the numbers for the conveyance loss for the neighboring Montevieu Canal show less loss on a much longer canal system.

RE: EVIDENCE OF PRIORITY

Dear Everett and Betty:

Below is a listing of documents you provided, plus those copied from IDWR records, to help substantiate diversion of water on several beneficial use claims filed in the SRBA.

A31-04008: Affidavit from Gertrude Bare.
Discharge measurement by Don Shenton.

A31-10231: Affidavit from Everett Adkins.

A31-10660A, -10660B, -10660C, -10660D, -10660E,
-10660F:

Affidavit from Lonn Eddins.
Discharge measurements by Don Shenton
due in 1988 and 1989 for the six wells
on the original Park Bell farm.
Copy of Proof of Application of Water
to Beneficial Use and Report of Engi-
neer for rights 31-02355, -02334, -02278.

These documents will be filed with the respective SRBA Notices. When staff from this office conduct a more thorough review of the Notices for the area north of Mud Lake, there may be some questions about the above Notices.

As always, it was a pleasure to assist you.

I have lived in the Montevue area since 1947. I am familiar with the wells that Bell drilled. When Bell moved to Montevue in 1946 he drilled the first two wells and they are still in use. I worked with Raymond Cope when he drilled the rest of the wells in the 1950's.

I leased Bell's farms and did the maintenance on all these pumps since 1951. These pumps have been in continuous use since they were drilled.

RE: EVIDENCE OF PRIORITY

Dear Claimant(s):

The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a License, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read all of the pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

EVIDENCE OF PRIORITY
Page - 2 -

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel.

The Department will not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.

Please submit the required evidence supporting the priority date by MARCH 9, 1993, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Eric Verner
Senior Water Agent

To whom it may concern:

I Donald W. Shenton, watermaster of Water District #31, make the following statement on behalf of the Park Bell Farms and their water rights licenses and water right claims filed with the Idaho Department Water Resources.

I am very familiar with the irrigation practices of the above named farms and have made numerous measurements of their respective wells. Though most of those flows at the wells exceeded the license amount, the amount in excess has been beneficially used and the farm has become totally dependent on the amounts being pumped. Because the delivery of the water is by way ditches which are long distances from the lands actually being irrigated, and the fact these delivery ditches were constructed through lava beds, they have very high seepage losses. Considerable effort has been made to seal these ditches. Many water users in the Mud Lake and Montevue area suffer these same types of losses as most of the water is delivered through long transmission systems which were also constructed in lava. It is imperative that these beneficial users of water be decreed or licensed to this farm for its continued existence.

Donald W. Shenton

Subscribed and sworn to before me this 12th day of March, 1991.

The Real Amount of Flow is so
close to the Claimed Amount
that an AMENDMENT would
not serve no Real Purpose
