Here are some additional tidbits to fill in the gaps:

The conversation would have been May 1.

I'll do a query for the claim numbers & fax to you, for the change of ownership item. It will be a LONG list.

Walker's Fax is 208 754 4961.

The only address I have for Roland Walker is P.O. Box 129, Menan, which actually is the address for Walker Produce, of which Roland and Blair are both owners and/or officers. The address on the AJ database is not good; letters come back to the sender.

Re: Possible water rights issues to refer to your attorney. Additional information for Roland Walker and/or Walker Farms water rights.

Dear Mr. Walker:

Thank you for visiting with me on the phone yesterday [date]. As we discussed, there have been some important water rights issues that I have addressed in recent letters to Roland Walker and/or Walker Farms. I have not received any response.

Technically, we are to only correspond with claimants at the address recorded on their claims, or as reported to us in an official "notice of change of address" filed by the claimant. Likewise, we are only to correspond with counsel when we have been served with an official "notice of appearance." It is my understanding that you are Mr. Walker's son and may be able to help assist me in gathering information concerning his water rights. The information requested below is necessary in order to save Mr. Walker time and expense in the future. I also understand that Mr. Walker may have an attorney who handles his water rights issues. Please forward this letter to the appropriate person. If Mr. Walker has an attorney to handle these matters for him, please have the attorney file a Notice of Appearance so that further correspondence can be properly routed.

However, from a common-sense standpoint, it seems that it would be courteous to make some other effort, because these are such important matters. I believe Mr. Walker would have responded, had he realized the nature of the situation. We are on a very tight time schedule now in making recommendations to the court on adjudication claims in Basin 31, and we want our recommendations to be as accurate as possible. Thus, I need to get the following information from Mr. Walker as soon as possible.

Following are items of concern which have arisen so far:

1. Change of Address (for which water rights?)

Current IDWR records show

Roland L. Walker or Dorothy M. Walker
Rt 1 Box 102
Rigby, Idaho 83442

To "officially" correct the database, we need the enclosed form returned with correct data and Mr. Walker's or Mrs. Walker's signature.

2. Claim A31-07229 enlargement

It appears that the 1987 irrigation under this right includes more acres than originally claimed. If Mr. Walker wishes to submit an enlargement claim for the additional use, we may be able to make a more correct recommendation to the court.

3. Claim A31-02374A change of ownership

From the courthouse records, it appears that this claim is appurtenant to lands owned by Mr. Walker, but the claim is not in his name. He may wish to submit the enclosed Notice of Change of Ownership with the proper documentation. The land in question is the East 1/2 of the Southeast 1/4 of Section 29, Township 8 North, Range 37 East.

4. Claims A31-04053, A31-04054, and A31-04055 change of ownership.

These claims are in the name of Wilma Wade. We believe they now belong to Mr. Walker or perhaps to Walker Farms. A second copy of the Change of Ownership form is enclosed for these rights. These are for the Wilma Wade lands north and west of Hamer, Idaho.

~~A31-04053, A31-04054, A31-04055 proof of priority.~~

5. Claims A31-04053, A31-04054, A31-04055 proof of priority.

Because these adjudication claims are based on older "statutory claims" filed with the Department in the 1970's or 1980's, the department has never investigated these rights. In order to make a favorable recommendation, I need documentation of the historical beneficial use under these rights, per the enclosed pamphlet "Evidence of Priority."

6. A31-10699 enlargement.

This is the claim we discussed on the phone, regarding pivot 2 KA 4. There are several issues relating to this claim:

- Amend enlargement claim.

It appears that there are more irrigated acres than claimed. Amending the claim would allow me to make a more accurate recommendation.

- Permit application.

As explained in the 3/16/2000 letter to Mr. Walker, it appears that additional diversion capacity was developed for this system, prior to 1987. I cannot recommend additional diversion rate under an enlargement claim. However, Mr. Walker may wish to apply for a permit for the additional rate ~~under an exemption from the moratorium for uses that commenced prior to 1987.~~ Since this increase in diversion rate appears to have been completed prior to the issuance of the moratorium in the area, it is possible the Mr. Walker could qualify for an exemption from the moratorium for the additional diversion rate.

- Amend parent claims.

Because of the way the parent claims are currently filed, I can only recommend the 2 KA 4 well for about 0.42 cfs, which is entirely inadequate for the system that exists there.

If the parent claims and the claims associated with the same points of diversion as the parent claims are amended to a "permissible place of use" basis, I can recommend a more reasonable diversion rate for the 2 KA 4 well.

~~Please consider this list carefully, and refer those items you feel appropriate to any of the attorneys you work with.~~

~~I hope to be able to make accurate recommendations to the court for these water rights, and to communicate effectively with the appropriate people in this process.~~ In order to accurately recommend these water rights, your prompt attention to this matter is important. Thank you for your willingness to assist. If you have any questions please call me at (208) 525-7161 or you can call Deputy Attorney General for the Idaho Department of Water Resources, Candice McHugh at (208) 327-5404.

I contacted Blair Walker regarding this claim, and he said you had helped him identify "enough corners" to cover the pivot under this claim.

I'm confident that all the information we have is in the file, but as a courtesy to Mr. Walker I told him I'd ask you.

If he amends the claims on the parent rights appropriately, I won't have any trouble recommending the enlargement.

If you happen to remember anything that might not be documented in the claims files, let me know. Otherwise I'll just proceed.

Thanks, Bryce

Re: Adjudication Claim A31-10699

Dear Mr. Walker:

Enclosed is a copy of the proposed recommendation for this adjudication claim, and an illustration of the proposed place of use.

The statutes that allow enlargements of existing water rights allow for additional acres, but not for additional diversion rate. You will note that this right has a diversion rate limitation when used in combination with some of your other water rights. This limitation, 11.58 cfs, is the total of those other rights alone.

The result is that even though this recommendation includes a diversion rate, it doesn't really allow you to divert any additional water. It simply authorizes irrigation of more acres than originally licensed.

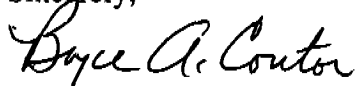

Please call me at 525-7161 if you have questions about this proposed recommendation.

The North Water Measurement District data on file indicates that these systems have a combined capacity of approximately 13.7 cfs, or about 2.1 cfs more than the total recommendation. It would likely be helpful to you to be authorized to divert this full rate.

Because the development took place prior to 1987, you may be able to apply for a permit with a special exemption from the Mud Lake Moratorium. The application will require careful documentation of the date of the development. If you wish to consider this option, please contact one of the IDWR Allocations Agents at 525-7161.

We have recently learned that the address we have on file for you is incorrect. Please fill out and return the enclosed Change of Address form, so that official correspondence may be mailed to the correct address.

Sincerely,

Re: QNT remark, Enlargement

Right 31-10699 is claimed and recommended as an enlargement of 31-07093, 31-07136, 31-07137, and 31-07138. Because it is not delivered out of the same well as these rights, and because the delivery systems are not interconnected, the usual combined and individual POU limitation remarks are not used.

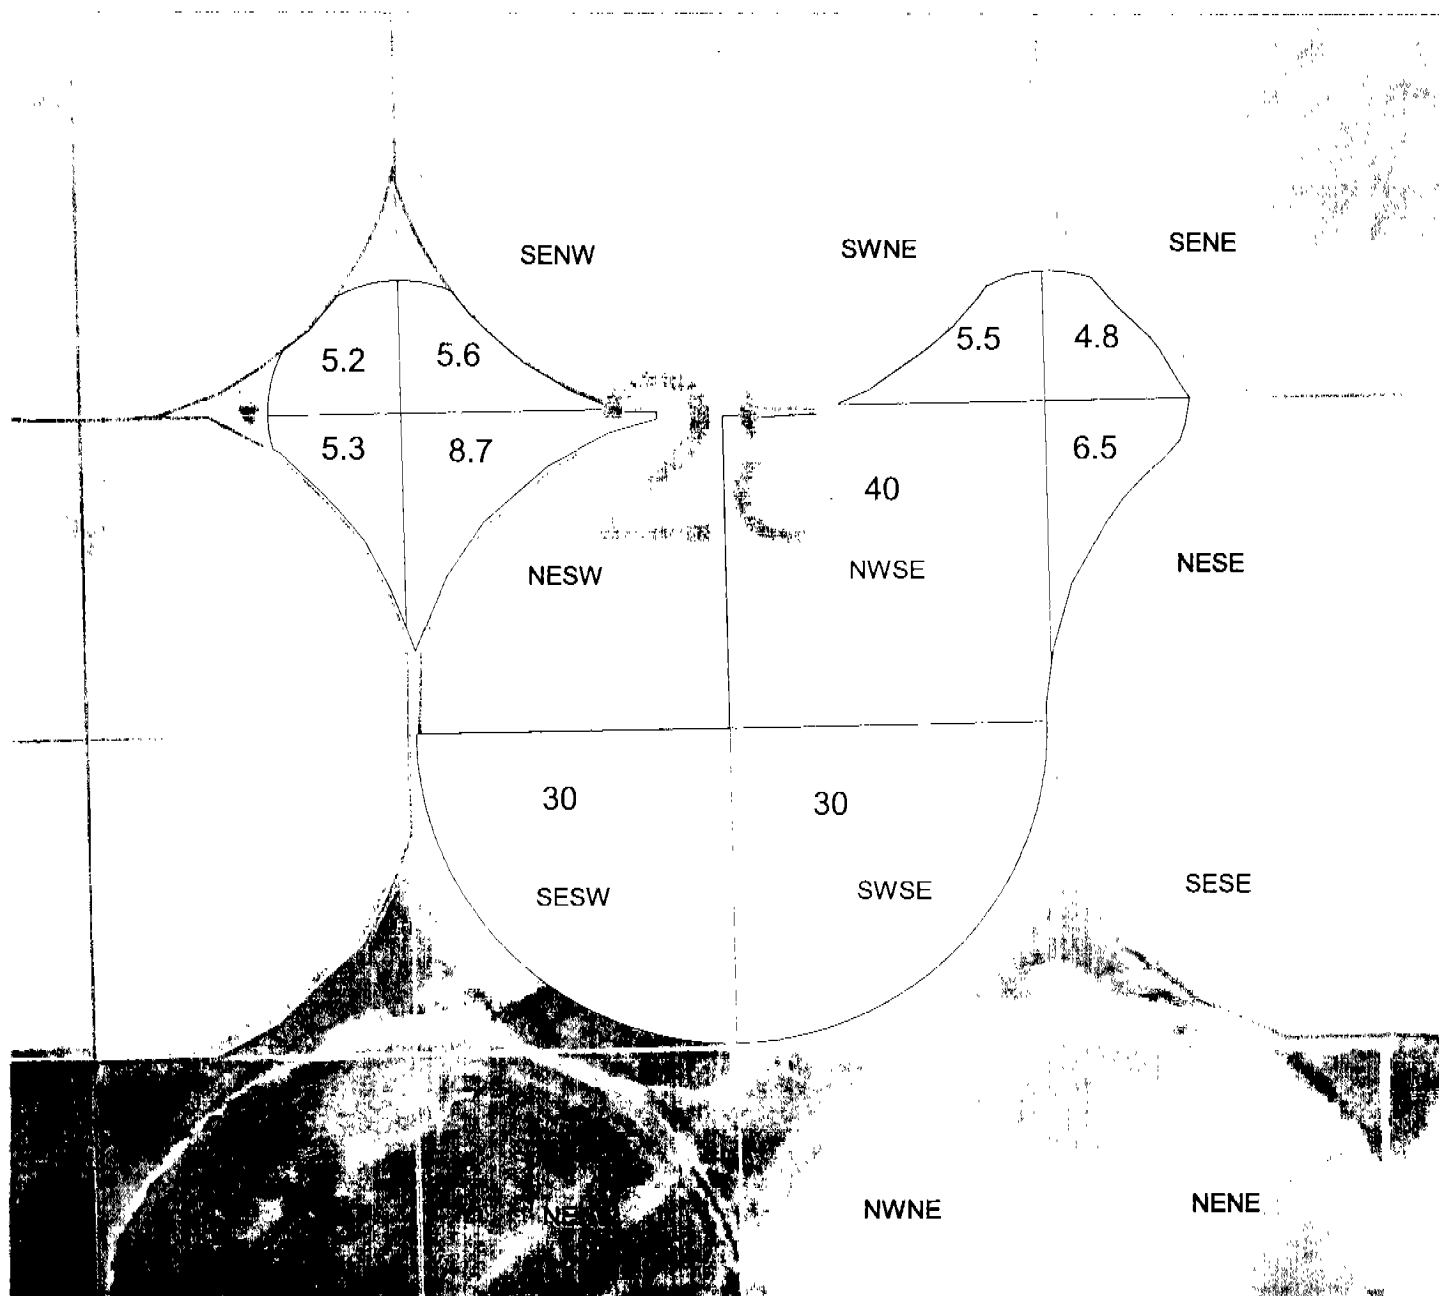

Because 31-02365A, 31-02365B, and 31-02374D are diverted out of the same diversions as either 31-10699 or the rights from which it is enlarged, all these rights are included in a QNT combined diversion rate limitation remark. The limited quantity (11.58 cfs) is the sum of the recommended diversion rates for all these rights. NWMD records show an approximate combined capacity of 13.7 cfs for all the systems.

31-10699 was originally proposed for disallowal because additional diversion capacity was developed along with the enlargement. Per consultation with Assistant Attorney General Candice McHugh, this claim is recommended and the claimant is invited to apply for a permit for the additional diversion rate.

This is an enlargement claim based upon four licensed rights. The enlargement included a new well and pivot.

NWMD measurements indicate that current capacity is approximately 13.7 cfs on about 822 acres, or 0.017 cfs/acre.

Original licenses sum to 10.6 cfs on 680 acres, or 0.016 cfs/acre.

If the 10.6 cfs are applied to the 822 acres, the rate is 0.013/acre. This is a sandy area and this is a marginal diversion rate per acre.

Greg Taylor's 1994 recommendation was for disallowal, based on his correct analysis that additional capacity was developed for the enlargement. However, it sticks in my mind that now we are going to recommend enlargements (at the original diversion rates) even if it appears diversion capacity has been increased.

I looked through the claims handbook and the admin. memos and couldn't find any help. Can you help me?

For now I'm recommending the enlargement, with combined use limitations to the original diversion rate.

3/13/00 Candice called back. Per Carter Fricke, if recommendation can make sense at original diversion rate, recommend acres as GIS evidence shows. Suggest to claimant possibility of moratorium exemption on permit for diversion rate.

3/16/00 Need to add in diversion rate of 31-02374D (0.98 cfs) to limitation.

RE: EVIDENCE OF PRIORITY

Dear Claimant(s):

The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a License, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read all of the pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

EVIDENCE OF PRIORITY
Page - 2 -

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel.

The Department will not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.

Please submit the required evidence supporting the priority date by MARCH 9, 1993, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,
