STOCKWATER same as IRRIGATION

1089.6 ACRES TOTAL

USE OF THIS RIGHT WITH THE RIGHTS LISTED BELOW IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 1089.6 ACRES IN A SINGLE IRRIGATION SEASON. COMBINED RIGHT NOS.: 31-02274, 31-02275, 31-10245, 31-10740.

THIS RIGHT IS LIMITED TO THE IRRIGATION OF 434 ACRES WITHIN THE PLACE OF USE DESCRIBED ABOVE IN A SINGLE IRRIGATION SEASON.

PLACE OF USE IN T13N R40E S11 NWSW DOES NOT INCLUDE ANY STATE PUBLIC SCHOOL ENDOWMENT LAND.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

RIGHTS HAVE ALSO BEEN CLAIMED TO WATER FROM BASIN 21 FOR THE SAME PURPOSE OF USE AT THE SAME PLACE OF USE DESCRIBED ABOVE, WHICH WILL BE INCLUDED IN A DIRECTORS REPORT TO BE FILED AT A LATER DATE. ANY WATER RIGHTS RECOMMENDED IN THE BASIN 21 REPORT FOR THE SAME PURPOSE OF USE AT THE SAME PLACE OF USE DESCRIBED ABOVE WILL CONTAIN COMBINED USE LIMITATIONS FOR THIS RIGHT AND THE BASIN 21 RIGHTS.

THIS PARTIAL DECREE IS SUBJECT TO SUCH GENERAL PROVISIONS NECESSARY FOR THE DEFINITION OF THE RIGHTS OR FOR THE EFFICIENT ADMINISTRATION OF THE WATER RIGHTS AS MAY BE ULTIMATELY DETERMINED BY THE COURT AT A POINT IN TIME NO LATER THAN THE ENTRY OF A FINAL UNIFIED DECREE. SECTION 42-1412(6), IDAHO CODE.

THE QUANTITY OF WATER DECREED FOR THIS WATER RIGHT FOR STOCKWATER USE IS NOT A DETERMINATION OF HISTORICAL BENEFICIAL USE.

EXPLANATORY MATERIAL: Beneficial Use
STOCKWATER, 1100 RANGE CATTLE.

THIS RIGHT WHEN COMBINED WITH RIGHT NO. 31-02274, 31-02275, 31-10245, 31-10740 SHALL PROVIDE NO MORE THAN .02 CFS PER ACRE.

Subject: 31-10740 ADR

Importance: High

We've made an error on this amended director's report. Along with changing the POU and some remarks we also inadvertently changed the priority date. We need to get a corrected amended director's report out ASAP so the parties have time to meet the objection deadline of May 24th.

Thank you.

Candice

FIELD EXAM REQUIRED? DATABASE FIELD
VERIFICATION REQUIRED DUE TO REMARKS? Y EXAMINER

CLAIM REMARKS: (ITEM 13 CONTINUED) DRY CREEK AND OTHER SOURCES WHICH FLOW INTO
THE IRRIGATION CANAL.
ATTACHMENTS AA AND A THRU J ARE INCLUDED TO EXPLAIN BASIS FOR
THIS NOTICE. DRY CREEK FLOWS DOWN HYDROLOGIC DIVIDE BETWEEN
CANAS CREEK (WD 31) AND SHERIDAN CREEK (WD 01) DRAINAGES. WATER
HAS BEEN USED IN BOTH DRAINAGES CAUSING PROBLEMS CONCERNING
WHICH WATER DISTRICT IS RESPONSIBLE FOR REGULATION OF CREEK AND
HOW TO ASSESS THE USE OF WATER.

RE: SRBA Subcase No. 31-10740

Dear Special Master Bilyeu:

I am faxing you a *Corrected Amended Director's Report* for the above water right. The Amended Director's Report, filed on April 23, 2002, contains an error in the priority date. The priority date should not have changed from our original recommendation of November 2, 1930.

The *Corrected Amended Director's Report* changes only those elements that were intentionally changed: quantity remark, place of use and place of use remark. The priority date should remain as originally recommended, November 2, 1930.

If you have any questions concerning this matter, please contact me at (208) 327-5404.

Very Truly Yours,

A handwritten signature in cursive script, reading "Candice M. McHugh".

CORRECTED AMENDED DIRECTOR'S REPORT

Subcase No. 31-10740

In Re SRBA

Twin Falls County Civil Case No. 39576

Report to the SRBA District Court

Prepared by the Idaho Department of Water Resources
Karl J. Dreher, Director
David R. Tuthill, Jr., Adjudication Bureau Chief

May 9, 2002

DESCRIPTIVE SUMMARY

This is a Corrected Amended Director's Report submitted by the Director of the Idaho Department of Water Resources.

DISCUSSION

On March 26, 2002, Special Master Bilyeu issued an Order *Granting Motion to Amend Claim on Record* and an *Order Setting Subcase Deadlines and Hearing on Record*. Pursuant to these orders, the Director submitted for filing with the Court, an Amended Director's Report on April 23, 2002. Recently, it came to the Department's attention that the priority date had been erroneously changed in the Amended Director's Report. Because the Amended Director's Report was submitted in the underline format, with the amended portions of the Director's Report underlined, it is clear that the Department did not intend to change the priority date. Therefore, the Director submits for filing with the Court, this Corrected Amended Director's Report for the aforementioned subcase.

Respectfully submitted this 9th day of May, 2002.

DAVID R. TUTHILL, JR.
Adjudication Bureau Chief

IDAHO DEPARTMENT OF WATER RESOURCES
PRELIMINARY RECOMMENDATION OF WATER RIGHTS ACQUIRED UNDER STATE LAW

USE OF THIS RIGHT WITH THE RIGHTS LISTED BELOW IS LIMITED TO THE IRRIGATION OF A COMBINED TOTAL OF 1089.6 ACRES IN A SINGLE IRRIGATION SEASON. COMBINED RIGHT NOS.: 31-02274, 31-02275, 31-10245, 31-10740.

THIS RIGHT IS LIMITED TO THE IRRIGATION OF 434 ACRES WITHIN THE PLACE OF USE DESCRIBED ABOVE IN A SINGLE IRRIGATION SEASON.

PLACE OF USE IN T13N R40E S11 NWSW DOES NOT INCLUDE ANY STATE PUBLIC SCHOOL ENDOWMENT LAND.

OTHER PROVISIONS NECESSARY FOR DEFINITION OR ADMINISTRATION OF THIS WATER RIGHT:

THIS PARTIAL DECREE IS SUBJECT TO SUCH GENERAL PROVISIONS NECESSARY FOR THE DEFINITION OF THE RIGHTS OR FOR THE EFFICIENT ADMINISTRATION OF THE WATER RIGHTS AS MAY BE ULTIMATELY DETERMINED BY THE COURT AT A POINT IN TIME NO LATER THAN THE ENTRY OF A FINAL UNIFIED DECREE. SECTION 42-1412(6), IDAHO CODE.

RIGHTS HAVE ALSO BEEN CLAIMED TO WATER FROM BASIN 21 FOR THE SAME PURPOSE OF USE AT THE SAME PLACE OF USE DESCRIBED ABOVE, WHICH WILL BE INCLUDED IN A DIRECTORS REPORT TO BE FILED AT A LATER DATE. ANY WATER RIGHTS RECOMMENDED IN THE BASIN 21 REPORT FOR THE SAME PURPOSE OF USE AT THE SAME PLACE OF USE DESCRIBED ABOVE WILL CONTAIN COMBINED USE LIMITATIONS FOR THIS RIGHT AND THE BASIN 21 RIGHTS.

THE QUANTITY OF WATER DECREED FOR THIS WATER RIGHT FOR STOCKWATER USE IS NOT A DETERMINATION OF HISTORICAL BENEFICIAL USE.

EXPLANATORY MATERIAL: Beneficial Use

STOCKWATER, 1100 RANGE CATTLE.

THIS RIGHT WHEN COMBINED WITH RIGHT NO. 31-02274, 31-02275, 31-10240, 31-10740 SHALL PROVIDE NO MORE THAN .02 CFS PER ACRE.

WATER RIGHTS SETTLEMENT AND SUBORDINATION AGREEMENT

THIS WATER RIGHTS SETTLEMENT AND SUBORDINATION AGREEMENT ("Agreement") is entered into effective the ___ day of _____, 2003 by and between James F. Hagenbarth, David J. Hagenbarth and the Estate of Margaret Hagenbarth (collectively "Hagenbarth") and Mud Lake Water Users Association ("Mud Lake").

RECITALS

a. Hagenbarth has claimed water rights 31-10245 and 31-10740 (collectively the "Hagenbarth Rights") in the Snake River Basin Adjudication ("SRBA"). The Hagenbarth Rights are irrigation and stockwater water rights from Dry Creek appurtenant to a place of use owned by Hagenbarth described in Exhibit A hereto.

b. Mud Lake has claimed several water rights in the SRBA from Camas Creek and its surface tributaries (the "Mud Lake Water Rights").

c. Mud Lake filed objections in the SRBA to the Idaho Department of Water Resources recommendations for the Hagenbarth Rights. Hagenbarth and Mud Lake enter into this Agreement to settle the objections and allow decrees in the SRBA for the Hagenbarth Rights on conditions stated herein.

NOW THEREFORE, in consideration of the above recitals and the warranties, covenants, agreements, terms and conditions set forth below, Hagenbarth and Mud Lake agree as follows:

1. The parties each represent and warrant to the other that they have the respective legal power, right and authority to enter into this Agreement and to perform the obligations hereunder.

2. Mud Lake agrees that the Hagenbarth Rights may be decreed as claimed by Hagenbarth in the SRBA with the condition that the Hagenbarth Rights be subordinated as described below.

050016

3. The right to divert water under the Hagenbarth Rights shall be, and is hereby, ~~subordinated~~ to the Mud Lake Water Rights as follows:

- a. the priorities of the Hagenbarth Rights may not be asserted or relied upon, and shall be ineffective, against the priority of Mud Lake's Water Rights; and
- b. the subordination applies only when the watermaster for Water District 31 is on duty to regulate distribution of water on Camas Creek.
- c. the subordination no longer applies when Dry Creek ceases to flow at a point where Dry Creek currently passes under a road commonly known as the "A-2 Road" and shown on the map attached hereto as Exhibit B or when the surface flow of Dry Creek ceases to reach Spring Creek, whichever is earlier.

4. The recitals, terms, conditions and covenants contained herein shall run with the land described in Exhibit A, and shall be binding upon any person claiming, having or acquiring any right, title or interest in the Property or in any lot, parcel, portion or subdivision thereof, and upon their successors and assigns.

5. In consideration of this Agreement and the covenants, conditions and terms set forth herein, Mud Lake shall withdraw its objection in the SRBA to the recommendations for the Hagenbarth Rights and/or enter into a stipulation (including a Standard Form 5 in the event that all other objectors agree on the elements of the Hagenbarth Rights) to be filed with the SREA court that effectively withdraws Mud Lake's objections consistent with the terms of this Agreement.

6. This Agreement is binding upon and enforceable by the parties hereto and their respective successors and assigns.

7. Neither party's failure to assert, or to seek enforcement of, any of the covenants, terms or conditions of this Agreement shall constitute a waiver by such party of the breach or default of any such covenant, term or condition unless otherwise expressly agreed to by such non-asserting party in writing.

8. If either party commences litigation for the enforcement, interpretation or rescission of this Agreement, the prevailing party shall be entitled to its reasonable attorney fees and costs.

IN WITNESS WHEREOF, this Agreement has been executed by the parties, in the State of Idaho, as of the effective date set forth above

Name: Margaret Hagenbarth, David J. Hagenbarth, James F. Hagenbarth

Address: P.O. Box 1128
Dillon, MT 59725

D. We object to the following elements as recommended in the Director's Report:

1. **Priority Date:**

The priority date of this water right should be changed to November 10, 1893, based on beneficial use.

E. **REASONS SUPPORTING OBJECTION:**

Water records, deeds, and testimony in the Sauve v. Abbott decree, Case No. 639, U.S. District Court, District of Idaho, Eastern Division (1930), clearly indicate that Dry Creek water was diverted and used as early as 1889 on land owned by the claimant's predecessors in District/Basin 21. Because the place of use of this water right lies outside of the Dry Creek drainage (District/Basin 31), the water right was not included in the Sauve decree. The historic, present, and beneficial use of this water since 1893, as well as the documentation mentioned above, however, confirm a priority date of November 10, 1893.

*Refer to Envoies
Re: Priority Date*

1. Describe the portion of the proposed recommendation with which you disagree (e.g priority date, period of use, source):
 - 1) Priority Date
 - 2) Period of Use- stockwater
2. Describe the changes you wish to make in the proposed recommendation:
 - 1) Change priority date to 11/10/1893.
 - 2) Change period of use for stockwater to 05 11/31.
3. Give a brief explanation as to why you disagree with these portions:
 - 1) Testimony in the Suave Decree clearly indicate Dry Creek water was diverted and used in 1889 on land owned by the claimant's predecessors. Water records on file prove this water was diverted and used on the place of use claimed as early as 11/10/1893. Deeds are presented that transfer the use of Dry Creek water used on the place of use claimed. These deeds prove in fact these rights were developed and used. The basic requirements needed to develop a water right have been met and use has continued to the present. Because this water right lies outside the Suave Decree (decrees water used in District 31), does not preclude the fact that it has been used continuously through the same ditch and on the same land since 1893. This use perfects this water right and priority.
 - 2) Cattle have watered from this source as late as 11/30.

I AGREE with this proposed recommendation: no changes need to be made.

MEMORANDUM

To: The files

From: A. Ruberry

Subject: Renumbering of SRBA Claims

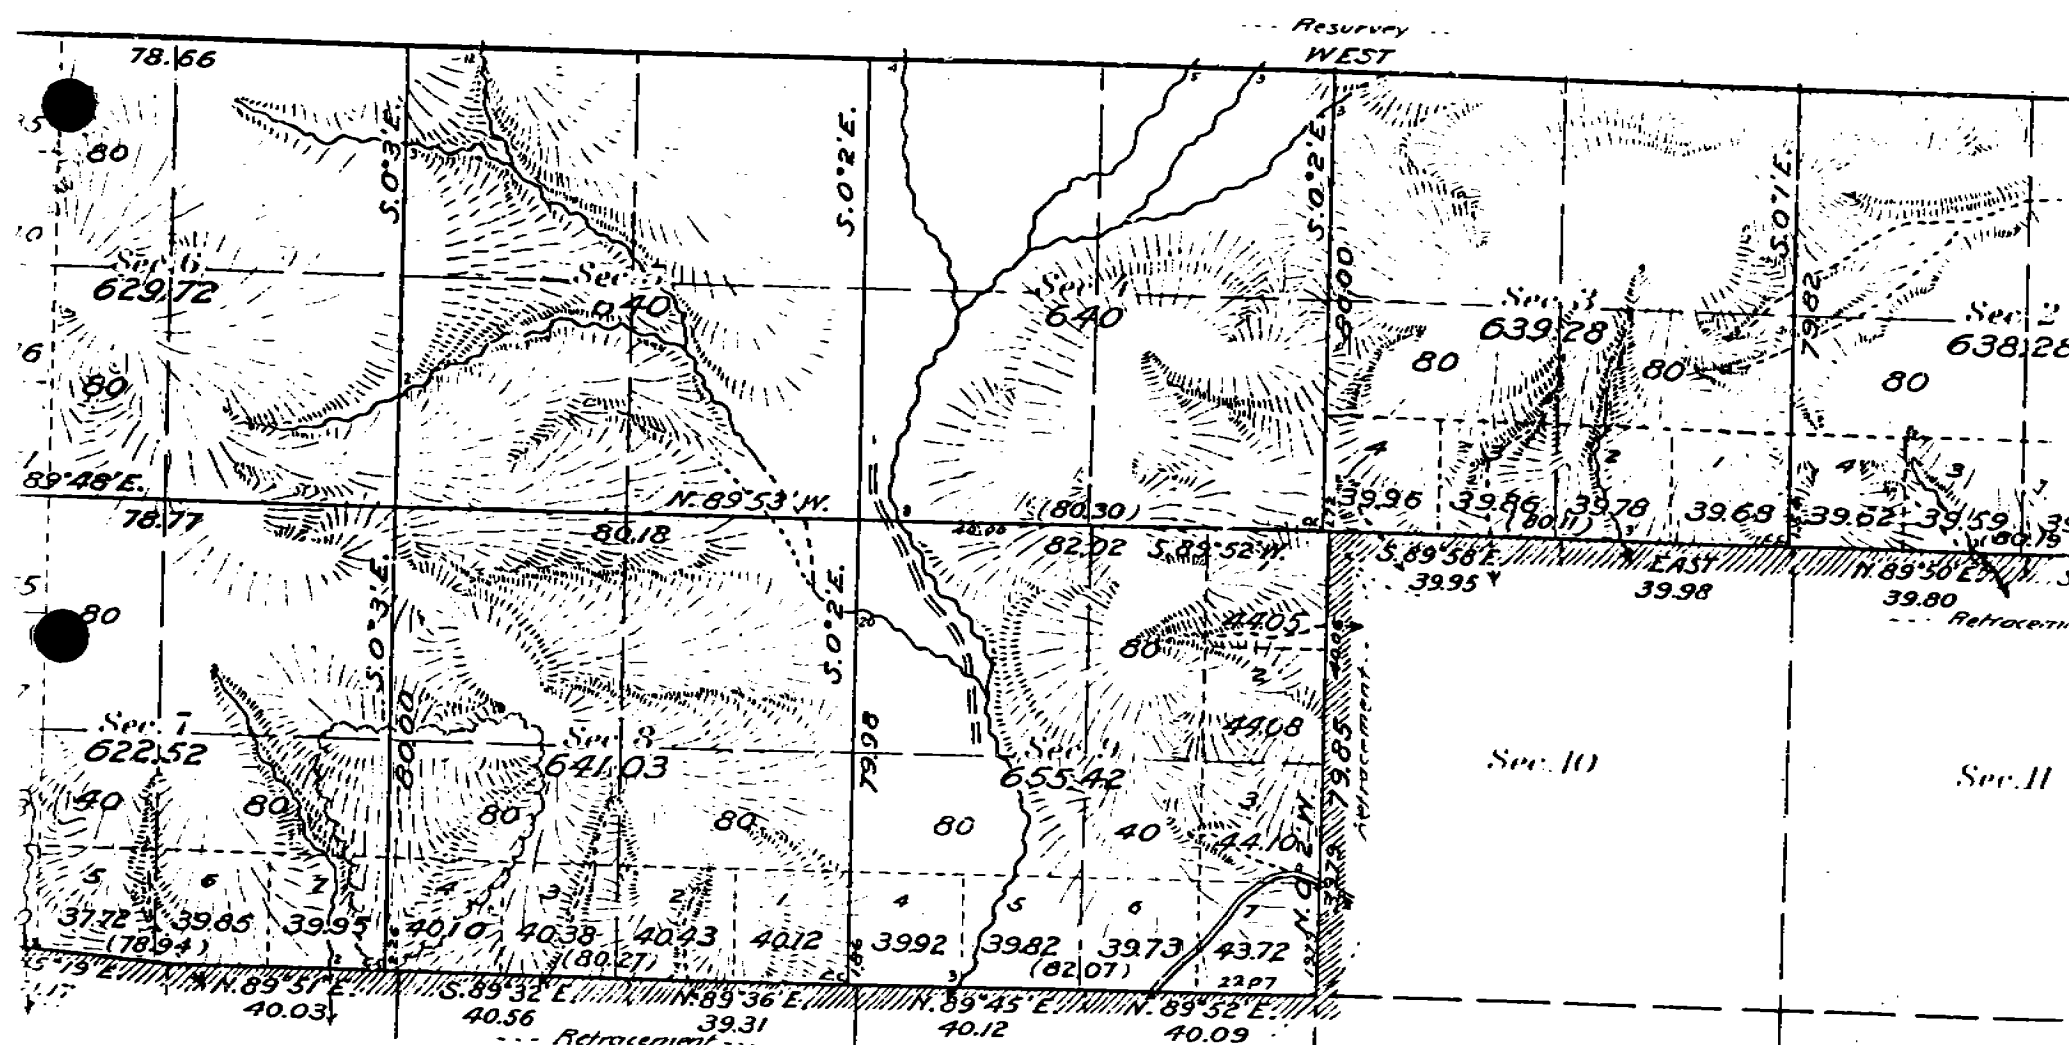

The following water right claims were renumbered to Basin 21 claims because the Point(s) of Diversion were clearly within that Basin. It appears that some of the Place(s) of Use maybe within Basin 31. But, since the POD is within Basin 21 the claims were so renumbered and will be dealt with during the review of that basin. The conversion of claims is as follows:

<u>Old Number</u>	<u>New Number</u>
A31-04129	A21-04170
A31-04130	A21-04171

RE: EVIDENCE OF PRIORITY

Dear Claimant(s):

The Notice(s) of Claim identified with the number shown above in the "address" label and at the "end" of this letter has been filed in the Snake River Basin Adjudication (SRBA). The Notice indicates water usage is based on "Beneficial Use". Water rights of this type are established by the historical use of water, dating back to when water was first used for the purpose claimed, at or on the place of use identified on the Notice. The date the water was first put to use, known as the priority date, has not been confirmed by a License, Decree, or Permit. For this reason, proof must be provided supporting the priority date. As the claimant, you are responsible for submitting the necessary proof to support the priority date.

It is important that each element of the Notice be substantiated. For instance, regarding claims for irrigation, the evidence should tend to show that diversion works were in place, that they were capable of diverting the claimed diversion rate, and that the diverted water was beneficially used on the entire claimed place of use on or before the claimed priority date.

For your reference, I have provided a printout of your Notice and the pamphlet entitled "Evidence of Priority". The pamphlet describes the types of evidence required and suggests which documents will fulfill this requirement. While I encourage you to read all of the pamphlet, I direct your attention to the two sections entitled "What Kind of Evidence is Required" and "Some examples of Documents Which May Be Evidence of the Priority Date".

EVIDENCE OF PRIORITY
Page - 2 -

It is our goal to recommend historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the Notice have been or soon will be conducted by Department personnel.

The Department will not recommend the Notice be decreed by the court if no evidence of a priority date is submitted.

Please submit the required evidence supporting the priority date by MARCH 9, 1993, referencing all documents with the corresponding Notice number. If you have any questions not covered by this letter or the enclosed pamphlet, please contact this office.

Respectfully submitted,

Eric Verner
Senior Water Agent

RE: Hagenbarth Dry Creek Use Right
Dry Creek-Sheridan Creek Irrigation System

7/26/1990

I, James F. Hagenbarth, am responsible for filing the water rights for Margaret Hagenbarth, David J. Hagenbarth, and myself, James F. Hagenbarth, under the Snake River Adjudication. As I researched each right I learned more about how all the rights are interrelated and how each right developed to the way it is used beneficially today. As I researched the Suave Decree and the water records in Clark and Fremont Counties, it became evident that many of the water rights on Dry Creek and the drainages east to Sheridan Creek are more numerous and were used by my predecessors much earlier than I realized and originally filed on. Consequently I am required to amend the appropriate filings to reflect the findings of fact revealed by my research and also make one new filing on Dry Creek to reflect a use right which was developed in 1893 and used ever since. The problem with Dry Creek is that it lies on a flood plain which flows both to the Camas Creek drainage and the Sheridan Creek drainage. Water which was diverted from Dry Creek to the Sheridan drainage has not been covered or addressed by the Suave Decree or the Sheridan Creek Decrees or the respective watermasters, even though there have been documented continuous use and licenses issued and in good standing. It is my intention to file a use right on Dry Creek which reflects the continuous use my predecessors and myself have made on Dry Creek since 1893 to insure that this water right be addressed by the Snake River Adjudication and given the legitimacy it has had since 1893. In 1893 Chris Sorenson and Geo. L. Wall filed on a total of 1000 inches of Dry Creek water and used it on land now irrigated from Dry Creek and owned by the claimants. Both men mentioned that their land included the original Bianches and Rainville Desert entries. Bianches and Rainville filed on water in the area in 1890, but the descriptions were such that I chose to use Sorenson's and Wall's filings because of better accuracy. These Sorenson and Wall filings can be found in the Clark County Water Locations Book at pages 25 and 183 respectively. The Wall and Sorenson notices give an accurate description of land, the same land where the water is used today. I have chosen to combine these two filings and use the later priority which would make just one filing. Geo. Wall filed on Nov. 10, 1890 and this is the priority I am claiming. Sorenson filed in August, 1893.

In 1902 Harry Dunn filed for Dry Creek water on land owned by the claimants and this filing is recorded on page 104 of the Clark County Water Locations Book. In 1908 Harry and Helga Dunn and E.T. and Anna Underwood transferred land and Dry Creek water to Wood Live Stock and F.J. Hagenbarth. This is recorded in Book 2 of Deeds, page 112 and Book 2 of Deeds, page 114 in the Clark County records respectively. Dunn and Underwood were issued patents on the land Sorenson and Wall used Dry Creek water on in 1893 and the claimants are using Dry Creek

Dry Creek

today. On September 6, 1928 during the testimony for the Suave Decree, in Volume VIII, pages 1746-1755 Mr. F.J. Hagenbarth testified that Dry Creek water was diverted toward Sheridan in 1889 and has been continuously used to the present (1928). Mr Hagenbarth then describes how Dry Creek flows into two drainages, Camas and Sheridan, and then speaks about the Harry Dunn use right and how Dry Creek water was used to irrigate land lying east of Dry Creek. In the 1930's the Wood Live Stock Company went broke and John Stringer purchased the land now owned by the claimants. In the 40's Stringer sold to my Father, D.V. Hagenbarth, the land claimed in this use filing. As mentioned in earlier affidavits and information, in the early 40's D.V. Hagenbarth extensively developed a sub-flood system to more beneficially use those Dry Creek waters diverted away from the Camas Drainage. This sub-flood system has continuously been used to the present.

In summary there is no question that Dry Creek water has been diverted and used beneficially by the claimants and their predecessors continuously since Nov. 10, 1893. The fact that Dry Creek is tributary to two drainages explains the reason why water from Dry Creek used on land in the Sheridan drainage was not covered either by the Suave or Sheridan Decrees. The same holds true for a portion of water right #21-02054 which is being filed by the claimants via A31-10245. Since the claimants are irrigating a total of 434 acres in Sections 10, 11, 12, 14 and 15 in T13N40E using Dry Creek water, the same land and water claimed by Sorenson and Wall, we claim a use right of 434 miners inches or 8.68 cfs with a priority of Nov. 10 1893. Said right is diverted from Dry Creek in the NENSW os Section 9, in T13N, R40E. Water from this right is pooled with all the other rights claimed from Dry Creek and used on all the 1092 acres listed as place of use. This use and irrigation system is explained in an earlier document. Total use of Dry Creek water should not exceed 1 miners inch/acre or 1092 total inches with said amount being filled starting with the earliest priority and proceeding to the latest until the rights are filled.

In the Snake River Adjudication the claimants have previously made use filings on several small water sources which flowed into an irrigation system constructed by D. V. Hagenbarth in 1943. A 10/01/43 priority was claimed. After completing the above research, it became evident that the claimants' predecessors Sorenson and Wall had an irrigation system which intercepted these small sources and put them to beneficial use much earlier than the claimants originally filed for. Consequently the claimants will amend six use claims (A31-04129 to A31-04134) and change the priority date from 10/01/43 to Nov. 10, 1893.

Sincerely,

James F. Hagenbarth

Attachment A

A F F I D A V I T

STATE OF MONTANA)
ss.
County Of Beaverhead)

James F. Hagenbarth, being first duly sworn upon oath,
deposes and says:

That I am of legal age and a landowner in Clark County,
Idaho. Under Idaho Law (Idaho Code 42-243) I am required to
record any surface water put to a beneficial use by me or my
predecessors before May 20, 1971, if said use is unrecorded.
It is my intention in the affidavit to claim a water right
which was established by my predecessor, D. V. Hagenbarth.
As a claimant of this water right and also the person completing
the required form, I will attest to and explain the proof
presented.

A brief history of the water and the land on which it is
beneficially used is vital to understanding the evidence presented
to substantiate this claim. In the late 1930's, my Father, D. V.
Hagenbarth, began acquiring land throughout Clark County. He
put together a livestock operation that was based in Clark
County, Idaho in the summer and Beaverhead County, Montana in
the winter. In the early 1940's Mr. Hagenbarth began to improve

MICROFILMED

NOV 18 1992

undeveloped rangelands in the Sheridan Creek and Antelope Flat Areas of Clark County (T13N,R39E & T13N,R40E). This improvement consisted of eradicating sagebrush and wyethia and developing an irrigation system which would put the available water to beneficial use irrigating these reseeded rangelands.

In the above described area of Clark County, the snow pack is quite heavy as is the spring run-off. During the spring run-off, every draw carries a flow of water, some flows larger than others. This early water lasts only for a few days. In this area there are only two creeks that maintain a yearlong flow to downstream users, Sheridan Creek on the east and Ching Creek on the west. The distance between these two creeks is 9.5 miles. Between the Sheridan Creek and Ching Creek drainages, the only creek of record which delivers water to the downstream users is Dry Creek. Dry Creek supplies high water to the Camas Creek drainage in District #31. Said right ceases when Dry Creek no longer flows into Spring Creek. Dry Creek usually ceases to flow into Spring Creek by mid June. Other than Dry Creek, several small streams lie between Sheridan Creek and Ching Creek. These streams are Scalp Creek, Moose Creek, Mud Creek, and Kick Creek. Scalp and Moose Creek are in the Camas Creek drainage and have filings on their flows belonging to me. Mud Creek and Kick Creek are in the Sheridan drainage and there are no filings of record on their flows. Except for a few days in the spring during peak run-off, the flows of these named streams never are tributaries to either Sheridan or Camas Creek on a regular basis. Several small springs lie between Sheridan Creek and Dry Creek and these spring's flows are never tributaries to Sheridan Creek. The fact that the flows from these small streams and springs never reach a live stream on a regular basis is very common in this area because of the porous soils and the vast lava fields. Consequently, with the exception of Dry Creek, all the sources of water between Sheridan Creek and Ching Creek are tributaries to sinks. I own two recorded rights on Dry

MICROFILMED

NOV 18 1992

Creek, #31-2274 and #31-2275. The water used under License #31-2275 supplements water claimed in this filing.

The water being claimed in this filing is put to beneficial use by a sub-flood irrigation system installed by my Father in the early 1940's. This system is centered around a large heavily diked low gradient ditch which begins at a diversion on Dry Creek in Section 9, T13N,R40E and meanders easterly through Sections 9, 10, 11, and 12 in Township 13 North, Range 40 East. Several secondary low gradient dikes and ditches were constructed to further disperse the water throughout the lands serviced by this system. The slow moving water in these ditches, along with several permanent and temporary dams or dikes, forces the system's water out onto the surrounding lands in a sub-flood combination. This system was designed to handle both large and small flows of water efficiently and with little labor or maintenance. When the spring run-off ceases, this system combines small flows from several sources and uses then more efficiently than if each source was used by itself.

In Attachment B of this filing (Paul Gneiting Affidavit), Mr. Gneiting attests to the fact that he helped Mr. Hagenbarth construct this system in 1942 and 1943, and that the system was completed in September of 1943. It becomes obvious that the unrecorded sources of water diverted and used by this system were diverted no later than October 1, 1943. Therefore October 1, 1943 is the date of first use or priority date in this filing.

In Attachment B, Mr. Gneiting also explains the system and how it works. He mentions further that the sources of water used by the system decrease in flow radically after spring run-off and barely reach the system. This would substantiate that these flows of water are absorbed by the surrounding lands and are therefore tributaries to sinks.

The water which flows into this irrigation system is not only put to beneficial use for irrigation, but also stockwater. The main ditch crosses several pastures and the livestock use this water.

MICROFILMED

NOV 18 1992

Kick Creek is
in Basin 21

4.

The use right claimed in this filing is for water which flows in Kick Creek and is diverted by a dike into a ditch in the NWSWNE of Section 11, T13N,R4OE. As explained by Paul Gneiting in Attachment B, Kick Creek's flow is diverted above the irrigations system's main supply ditch. Kick Creek water is used to irrigate lands lying above the main ditch via a series of smaller ditches and dikes. After being used on lands above the main ditch, Kick Creek water flows into the main ditch and throughout the remainder of the system, being supplemented by water from other sources within the system. Kick Creek is small and has a drainage of approximately 700 acres lying in Sections 2 and 3 in T13N,R4OE and Sections 34 and 35 in T14N,R4OE.

The place of use is clearly identified on the claim form and an Attachment C (map). The place of use is owned by the claimants. Attachment C was included to give a better understanding of how the system is geographically laid out and works. This map enables one to more accurately describe the entity of the system. The flows claimed for irrigation from Kick Creek are the maximum early spring flows. These flows decrease considerably as previously discussed.

After a careful analysis of the above mentioned attachments and an understanding of the history and use described, it becomes obvious that Kick Creek's flow was put to a beneficial use by D. V. Hagenbarth via the sub-flood systems described above. The use of Kick Creek's flow began on October 1, 1943 and has continued into the present. As successors in interest to D. V. Hagenbarth, the claimants, Margaret Hagenbarth, David J. Hagenbarth, and James F. Hagenbarth, have the right to claim and use this water for irrigation and stockwater as provided for under Idaho State Law.

 County of Beaverhead)

Paul Gneiting, being first duly sworn upon oath, deposes and says:

That I am sixty-nine (69) years of age and now a resident of Silver Bow County, Montana, and make this affidavit at the request of the Hagenbarth Family relative to the history and use of irrigations waters in the Sheridan Area, Clark County, Idaho. On September 26, 1983 I made an inspection trip to the Sheridan Area to ensure that the facts addressed in this affidavit are accurate in relation to the irrigation system I helped install in the early 1940's.

In the spring of 1938 I came to Glen, Montana and was employed by D. V. Hagenbarth, who at that time was managing Consolidated Farms in the Glen Area and also owned lands in Clark County, Idaho. The first years of my employment were spent in the general operation and development of Mr. Hagenbarth's ranches in Montana and in Idaho. During the 1950's and until 1959, I assumed management of Mr. Hagenbarth's ranches in Montana. I was employed by Mr. Hagenbarth until the spring of 1959 when I purchased a ranch north of Melrose in Silver Bow County, Montana. I still own and operate this ranch.

During the spring, summer, and fall of 1942 and 1943, I assisted Mr. Hagenbarth in developing an irrigated pasture system in the Sheridan Area. This development work included reseeding and installing a sub-flood irrigation system in Sections 10, 11, 12, 14, and 15 in Township 13 North, Range 40 East, B.M. The

MICROFILMED

NOV 18 1992

2.

irrigation system was designed to handle the heavy spring run-off and also the waters which flow from Dry Creek, Mud Creek, Kick Creek, and several springs which lie in Sections 10 and 11 in Township 13 North, Range 40 East. The construction of this system was completed in September of 1943 and the sources of water were turned into the system.

A heavily diked slow moving ditch was used to carry the majority of the water from its sources. This main ditch began in Section 9 at a diversion on Dry Creek and had a course which ran easterly across Sections 9, 10, 11, and 12 in Township 13 North, Range 40 East. Below this main ditch several dikes and secondary slow moving ditches were constructed to spread these waters throughout the pasture system. On Kick Creek I constructed a dike and diverted Kick Creek's flow into ditches which irrigated lands lying above the main ditch in Section 11, T13N, R40E. The waste water then flowed into the main ditch and throughout the remainder of the system.

This irrigation system was designed to spread the available water in slow moving ditches throughout the pasture system. The water in these ditches would sub-irrigate the surrounding lands, especially when dams were installed at various locations to slow the flow and make the ditches bank full. This sub-flood system was designed to handle large or small amounts of water with a minimum of labor or maintenance. After the spring run-off, the amount of water available from the various sources sharply declined, and the system picked up those small amounts and pooled them so they could be used effectively.

It was my observation while working in the Sheridan Area in the 1940's, that the sources of water used by this irrigation system, especially Mud Creek and Kick Creek, radically decreased in flow shortly after the spring run-off. The flows of Kick Creek and Mud Creek barely made it to the main ditch by summer's end.

After my trip to the Sheridan Area in the fall of 1983, it was evident to me that the system is still being used as

MICROFILMED

RE: Hagenbarth Dry Creek-Sheridan Creek
Water Delivery System

I am representing the claimants in the filing of their water rights in the Snake River Basin Water System. -The claimants are Margaret Hagenbarth, David J. Hagenbarth and James F. Hagenbarth.

The claimants' predecessor, Father-in-law and Grandfather respectively, F. J. Hagenbarth, diverted waters of Sheridan Creek and Dry Creek on September 24, 1912. Part of this water was licensed for use on lands now owned by the claimants. As testimony to the above facts, see Warranty Deed filed on July 17, 1944 in Book 12 of Deeds at page 319 in the Clark County Clerk and Recorder's office and also water license # 8990/21-2054 on file with the Department of Water Resources. The deed clearly proves the claimants' control and ownership of 590 acres which were claimed as place of use by F. J. Hagenbarth in License # 21-2054. Since the claimants' predecessor, D.V. Hagenbarth, passed ownership of the above described land to the claimants via an estate, it follows that 590 miner's inches (11.8 c.f.s.) from 21-2054 belong to the claimants. Also note on Sheet #2 of the diagram on the water license that the original points of diversion are identical to those the claimants use at present. Please note on Sheet #2 that the Dry Creek source includes both the east and west forks and note the three canals leaving the point of diversion, one with a southerly course and the other two with easterly courses, but one lying more northerly. Note on sheet #2 the pond which lies in Lot 7(SWSW) of Section 6, T13NR41E. This pond is identical to Morrain Springs which is a tributary to Sheridan Creek and is the Sheridan Creek source diverted by the claimants. The point of diversion used by the claimants for Morrain Springs is identical to Sheet #2 and lies in the SE $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 6, T13NR41E. There is no question that the sources and PD's identified in this filing are identical to the sources being used by the claimants presently.

In 1943 my Father, D.V. Hagenbarth finished construction of a water delivery system which pooled the waters from many sources in the area and put the waters to an even greater beneficial use. The system is a sub-flood irrigation system with slow gradient ditches capable of handling and distributing either large or small flows of water. Mr. Hagenbarth applied for additional water out of Dry Creek as evidenced by licenses #31-2274 and #31-2275. As the years progressed this system has developed so as to put water from 8 different sources to a beneficial use on lands owned by the claimants. This use is a result of utilizing the waters from 12 different water rights on lands lying both north and south of Sheridan Ridge in T13NR40E. Of these 12 water rights, six are licenses and 6 are claims based on use. The sources are Dry Creek, Woody Headquarters Spring, Headquarters Springs, two unnamed springs, Mud Creek, Kick Creek, and Morrain Springs. Each source contributes to the water delivery system,

MICROFILMED

NOV 18 1992

(continued-Hagenbarth water delivery system)

but will have an independent land list depending upon where the source enters the system. The total system includes 1274 acres. 1092 acres will be attached to the Dry Creek sources, an additional 163 acres will be attached to the Kick Creek filing and the remaining 19 acres will be included with Morrain Springs.

Water right #21-2054 will be separated into two rights so that those waters diverted by said right from Dry Creek will be separate from those waters diverted from Morrain Springs. By doing this it will return each right to its respective district so the user can be billed properly and the rights can be regulated correctly according to priority dates. Morrain Spring is in District 21 and Dry Creek is in District 31. 8.00 c.f.s. will be claimed for Dry Creek and 3.8 c.f.s. for Morrain Spring via 21-2054.

All the sources except Morrain Springs have the same characteristics as most creeks in this area in that the spring flow is tremendous and the summer flow is very minimal, consequently the total c.f.s.'s appropriated seem rather large for the place of use in regard to one miner's inch per acre. This maximum use is short lived. In early spring the maximum flow of water claimed has been used on the lands designated, but only for a short period of time. Later on in the summer it is not unusual for only stockwater to be available.

These comments will be included in each of the filings on all the sources of water that are put to beneficial use by the water delivery system constructed by D.V. Hagenbarth. Included with many of the filings are separate comments dealing with each individual source.

Sincerely,

James F. Hagenbarth

-----O-----

MR. PETERSON: It is agreed that the capacity of the Woody Ditch, which has been referred to in the testimony here, is 700 inches, and that the capacity of the East Side Ditch, which is also identified in the testimony is 500 inches.

It is agreed that the capacity of the Harmon Reservoir, referred to, is 2,000 acre feet.

It is agreed that the capacity of the Lone Tree Reservoir, which will be identified in the testimony, is 2,200 acre feet.

FRANK HABENBARTH

Resumes the Stand.

DIRECT EXAMINATION (Continued)

BY MR. PETERSON:

Q I want to discuss with you first, Mr. Hagenbarth, the Sheridan Reservoir and the diversion into the Sheridan Reservoir from Dry Creek. You may state, if you will, the fact of whether or not there is a diversion from Dry Creek by way of canal into the Sheridan Reservoir?

A There is.

Q Where does that diversion head on Dry Creek?

A In Section 9, Township 13 North, Range 11 East.

I think it is right near the northeast quarter of the south

west quarter of that section, about five hundred feet--

Q You say Section 8, Township 13 North, Range 41 East?

A Thirteen North, Range 40 East--excuse me.

Q The canal proceeds then in what general direction to the reservoir?

A. I would say in an easterly direction.

Q About what distance to the reservoir?

A About four miles I should say.

Q When was that canal constructed?

A In the eighties.

Q One would be safe in saying 1889?

A Yes.

Q As to the date of completion?

A Yes.

Q When was water diverted through it first?

A About that time.

Q What has been done, if anything, each season since that time in regard to the diversion of water through the ditch?

A It has gone through the canal constantly.

Q What is the capacity of the canal?

A It is a very large canal. It would carry up to 3,000 inches of water. It is cut down now--easily 2,000 inches would be very conservative.

Q How much water has been diverted through that canal from that source to the Sheridan Reservoir from year to year?

A That would depend upon the season. During the

MICROFILMED

NOV 18 1992

water season, the maximum amount I would say at least 2,000 inches, and later on in the season, as the water dwindled, down to 1,000 inches, or 500 inches. That would be up to say--the heavy run off would be pretty well over by July first.

Q Now the average year, Mr. Hagen barth--take the average year, when would the runoff--when would the peak occur in the high water run off?

A About the forepart of June--the first to the tenth of June, usually..

Q And that would gradually dwindle down until you say the middle of June you would be diverting how much?

A Well in the middle of June it would be up pretty well towards its peak.

Q The first of July?

A It begins to dwindle somewhat.

Q On the average year, on the first of July, what would you say would be diverted?

A Probably would be about--of course I haven't measured this--my best judgment it would be around 1,500 inches I would say.

Q You have had experience in measuring water, have you?

A Yes, lots of it.

Q And have you had a great deal of experience in estimating water?

A Yes.

Q In actually handling water?

A Yes.

Q Are you able to form close estimates of water without measuring it?

A Reasonably close.

Q We will take now on the average each year, about the fifteenth of July, what would you say, in an ordinary year, was being diverted there?

A The water would be pretty well run down then--probably be around 300 inches I would say.

Q And two weeks later?

A The later part of July or the first of August there would be practically none. The waters after that date, what are diverted, are diverted over toward the west into the Dry Creek canal and the Camas slope.

Q The canal takes this water over this divide, over into another water shed?

A Dry Creek proper came down originally right on the divide made by the creek itself in extremely high water. There was a considerable portion of it went through natural channels toward the Snake River shed, and the balance, or the larger portion, went toward the Camas Creek water shed. It cut a very deep gravelly channel, and the water, although of considerable volume, four or five hundred inches of water, would all sink and disappear within the other extreme limit of the normal channel of Dry Creek--within eight miles it would disappear. It just peters out and disappears in the lava beds, sort of a lava bed slough running through lava beds, and doesn't reach Camas Creek as a stream at all.

MICROFILMED

NOV 18 1992

Q When was the Sheridan Reservoir completed?

A That necessarily shows on the completion of works in the record. I would say twenty-three to twenty-five years ago. I might add that we had a reservoir there, and our predecessors had a smaller reservoir--Taylor and Harwood--which they used for the propagation of fish, shipping the fish to market. It was not very large. That was there in the nineties, but after we bought this property we bought this reservoir and abandoned the fish reservoir.

Q Until you took charge of it it was not used for irrigation or storage?

A Only for a fish pond.

Q Twenty-three or twenty-five years ago you completed the reservoir to a certain capacity?

A I think I made that a little strong. I think we began work about then. Twenty years ago--speaking from memory it is hard to state. The license will show.

Q What was that capacity?

A About 6,000 acre feet.

Q What capacity has it maintained from that time until this?

A Practically the same.

Q That reservoir is fed by other streams and other sources than the canal we have referred to?

A Yes. There is also a canal coming out of what is known as Sheridan Creek on the Snake River water shed.

Q We have nothing to do with that here. Are there any rights under that canal between your property

diversion you have referred to, and the reservoir.

Q Yes, there is one particularly, Mr. Harry Dunn. He has a right of 320 inches, which was posted and appropriated according to the regulations. Notice was filed with the county recorder, I think about 1899 or 1900, right in there.

MR. SNOW: Is that right pertinent to these proceedings?

MR. PETERSON: It isn't pleaded. It wasn't discovered until just lately. I do not know about it. I expect there will be no objection to going on on that account.

MR. SNOW: I just wondered about it. I wanted the record to be right.

(Informal discussion)

Q While you are there at the map, Mr. Hagenbarth, will you locate the Sheridan Reservoir you have referred to?

A It lies largely, principally in the southwest quarter of Section 12, the north half of Section 13, the north half of Section 14, Township 13 North, Range 40 East.

Q Generally what is that construction, Mr. Hagenbarth?

A That is an earthen dam with a headgate.

Q Going back again to the Harry Dunn right. I think we will not need the map unless you desire to describe the lands?

A I can't do that off hand. You will have to

Hagenbarth d 21.

MICROFILMED

NOV 18 1992

get that from the record, because the other lands owned here by the company, which were acquired later, are on there in the same coloring.

MR. SNOW: May I interrupt.

MR. PETERSON: Yes.

Q (MR. SNOW) The Harry Dunn land that has been spoken of, now belongs to the Wood River Livestock Company?

A Yes, that was bought up twenty years ago I should judge.

Q (MR. PETERSON) Three hundred and twenty acres of it?

A Yes - desert claim.

Q Will substitute that description.

A I can come close to it, but I would rather have the record.

Q We will substitute the exact description shortly. Can you locate the approximate point of diversion from the canal for the Dunn lands?

A Yes. This map don't have it on e- haven't you the Dunn map here--it would be Section 10, south half of Section 10, northeast quarter thereof, Township 13 North, Range 40 East--I was wrong--it would be in the north half of the southeast quarter of Section 10. There are several laterals brought down from that main canal that run across the head of his land. Two or three points of diversion.

Q You say Mr. Dunn's place is 320 acres?

A Yes.

Q What crops have been raised on that?

MICROFILMED

NOV 18 1992

1952

A Well hay principally. Never was any grain. Hay land and pasture land. In that territory, Mr. Peterson, we found, after a number of years of experience, and we acquired these lands from different parties in that whole section--the Sheridan country is a very stormy, wintry country, and requires long heavy feeding, and we have used--found the most economical and beneficial use of those crops there was--it is a good deal like part of the lands in the Camas Meadows country--was to harvest them by the cattle and sheep. We found in that connection, after losing a great deal of money in years past trying to feed, putting up in the aggregate thousands of tons of hay, that our best money was gained by grazing them instead of trying to make crops and harvesting them and fattening stock, and therefore we quit mowing the hay and stacking it to feed in the winter time and harvesting it. We began in the spring and finished in the fall getting our stock in good condition to go through the winter in good shape, using these waters, using them now and every year and constantly, to make as large a crop as possible, and I might say that there are thousands of acres there of very good hay land that would cut a great deal of hay, but we do not cut it because it is not an economical proposition to do it.

Q What percentage of the 320 acres is meadow land?

A All of it.

Q Would you require water artificially applied to produce good crops?

MICROFILMED

NOV 18 1992

A Yes.

Q Can you now, Mr. Hagenbarth, give the exact description of the Harry Dunn land?

(Paper handed to witness)

A Yes.

Q Will you do so for the record?

A The southeast quarter, the southeast quarter of the southwest quarter of Section 10; the east half of the southwest quarter, the southwest quarter of the southwest quarter, Section 11, Township 13 North, Range 40 East, consisting of 320 acres.

Q Have you ever figured out, Mr. Hagenbarth, or have you the approximate acre feet of water that you have stored from year to year in the Sheridan Reservoir from this Dry Creek Ditch?

A I would say off hand, not from absolute knowledge of the records or measurements, that there would be about 2,500 acre feet from that source--Dry Creek source.

Q Would that be approximately correct?

A I think it would. That doesn't include the total capacity of the reservoir.

Q I am asking for the contribution made by this canal we are interested in?

A Yes. I might add in that connection, Mr. Peterson, that in addition to the water that was stored, winter storage and spring runoff, that when the reservoir fills, we have the spillway so adjusted

Hagenbarth d 24.

MICROFILMED

NOV 18 1992

carries a surplus in excess high water of the true spillway, and is used for early irrigation of lands that we own in that territory, so that the full amount of the license and which I believe 3,500 acre feet is used either for storage or surplus highwater rights.

Q Mr. Hagenbarth, I want to refer to a number of smaller rights which have been pleaded, and which have been left for your testimony to connect up, and I will refer first to the John A. Peterson right, on page 28 of the cross complaint. Are you acquainted with that right Mr. Hagenbarth?

A Yes.

Q That right is applicable to List No. 6, the West Camas list?

A Yes. Two hundred acres or a little more.

Q Is that a decreed right, or otherwise?

A I think that is a decreed right. It comes out of the west branch of Camas Creek.

MR. PETERSON: I will state for the record that we claim 100 inches there under the Cartier decree, made and decreed to John A. Peterson as of May 28, 1891.

MR. SNOW: Priority is claimed as of that date?

MR. PETERSON: May 28, 1891.

Q Mr. Hagenbarth, the date of the decree is the 20th day of June, 1902. Have you been acquainted with that water and with those lands since that time?

A Yes.

APPENDIX E

Water Location

of

Geo. L. Wall.

Notice is hereby given to all whom it may concern that I, Geo. L. Wall, a citizen of the U.S. and over the age of 21 years do hereby claim and appropriate Three hundred and sixty (360) inches of the flow of the waters of Dry Creek measured under a four inch pressure.

Said water is diverted at the point where this notice is posted said point being on the west fork of Dry Creek, about 30 rods above the Junction of the West Fork and the East Fork, and being on the NE quarter of Section 8 T. 13 N. Range 40 E. B.M. and in Antelope Valley Fremont County, Idaho.

The Water hereby claimed and appropriated to be used for agricultural and domestic purposes upon the following described premises, which will be when surveyed.

20	The S $\frac{1}{2}$	of the SW quarter	}	of Section 11
20	" S $\frac{1}{2}$	" " SE "		
20	" W $\frac{1}{2}$	" " SW "	}	of Section 12
20	" N $\frac{1}{2}$	" " NW "		
40	" NW $\frac{1}{4}$	" " NE "	}	" " 14

of T. 13 N. R. 40 E. B.M. 360 acres. Said land being part of the land known as the Richard Bianchi Desert Entry and adjoining Mary Rainvilles Desert Entry on the West. Said waters so claimed and appropriated are taken and diverted from said Dry Creek by means of a dam built in and across said Creek at the aforesaid point of diversion, said dam being built of logs and earth and being 26 feet long, 8 feet wide, and 6 feet high; and the aforesaid water, so claimed and appropriated is taken from said creek at the said dam, situated at said diversion and conducted to and upon said hereinbefore described lands by means of a ditch 97 feet long, and 12 feet wide at the bottom to another dam, said dam being 75 feet long, 8 $\frac{1}{2}$ ft. wide, 3 ft. high thence by ditches about 19800 ft. long and from 12 feet to 6 ft. wide at the bottom and from 2 $\frac{1}{2}$ ft. to 1 foot in depth, and with a grade (fall) of from one $\frac{1}{2}$ of one tenth of one foot to one tenth of one foot to the 100 feet.

November 10th, 1893.

Geo. L. Wall.

Filed for record at the request of F. W. Beane at 5 minutes past 2 o'clock P.M. this 9th day of January 1894.

NOTICE OF LOCATION OF WATER RIGHT.

NOTICE IS HEREBY GIVEN to all whom it may concern, That I Chris Sorenson, a citizen of the United States, over the age of twenty-one years, do hereby claim and appropriate Six Hundred Forty (640) inches of the flow of the waters of Dry Creek, measured under a four inch pressure.

Said water is divided at the point ^{250'} where this notice is posted. Said point being on the west fork of Dry Creek, about 30 rods above the Junction of the West Fork and the East fork and being on the NE Quarter of Section 8, T. 13 N. R. 40 E. S. 11. and in Antelope Valley Fremont County, Idaho. The water hereby claimed and appropriated to be used for agricultural and domestic purpose upon the following described land & premise, which will be when surveyed:

80. The $\frac{1}{4}$ of the SE Quarter of Section 9. ^{Part SWSB is in B31- E&S is B21.}
160 The NE Quarter of Section 16.
80 The $\frac{1}{4}$ of the SW Quarter
120 The NE $\frac{1}{4}$ and the SE $\frac{1}{4}$ of the SE Quarter } of Section 10. ^{All B21}
120 The NE $\frac{1}{4}$ and the SW $\frac{1}{4}$ of the NW Quarter of Sec. 15. ^{B21}
80 and NE of the NE Quarter T 13 N. R 40 E. S. 11. 640 acres.

Said land being known as the Mary Bainville Desert Entry and adjoining Richard Manches Desert Entry on the East.

Said waters, so claimed and appropriated are taken and diverted from said Dry Creek by means of a dam, built in and across said creek at the aforesaid point of diversion. Said dam being built of logs and earth and being 26 feet long, 8 feet wide and 6 feet high, and the aforesaid waters, so claimed and appropriated, is taken from said dam situated at said diversion, and conducted to and upon said hereinbefore described lands, by means of a ditch 97 feet long, and 12 feet wide at the bottom, to another dam. Said dam being 75 feet long, 8 $\frac{1}{3}$ feet wide, and 3 feet high, thence by ditches about 13700 ft. long, and from 12 to 6 feet wide at the bottom, and from 2 $\frac{1}{2}$ feet to 1 foot in depth, and with a grade (fall) from $\frac{1}{2}$ of one-tenth, to one tenth of one foot to the 100 feet.

August 12, 1893.

Chris Sorenson.

Filed for record at the request of F. W. Bean, at 32 min. past five P.M. 10th day of Jan'y, 1894.
