Ernie Carlsen and I met with Jerry Deutscher and Paul Rouch (spelling ?) on 10/3/00. Several meetings with FWS had taken place earlier, however, the purpose of this meeting was to do and on-site field exam to gain an understanding of what FWS considers wildlife use. We specifically looked at Well 1, 3, and 4 place of use.

Dear Craig Saxton:

We request that your office file the enclosed amended "Statement of Claim" forms with the Idaho Department of Water Resources (IDWR) pursuant to U.S. Fish and Wildlife Service (Service) Water Right Numbers 31-11231 and 31-11232. These forms were prepared in response to IDWR's "Preliminary Recommendations" regarding the Service's water right claims in the Snake River Basin Adjudication.

The Service's original claims filed with IDWR for the above rights covered beneficial use of ground water at the Camas National Wildlife Refuge. Each of these original claims provided the annual consumptive use amount instead of the annual diversion volumes. Through IDWR's "Preliminary Recommendations" phase of the adjudication, we learned that this is incorrect and that claims filed for ground water need to report the annual diversion volumes.

Therefore, the enclosed amended claims will eliminate the consumptive use volumes and provide the annual diversion volumes for the above rights based on historic water use evidence. We hope to get these claims filed in time to be included in the Director's Report. Also enclosed is a signed "Verification Statement" to be filed with the claim.

Your assistance in this matter is greatly appreciated. If you have questions or need additional information, please contact David Langman at (503) 231-2057.

Sincerely,

Paul Rauch

Conversation Memo

Date: 3/15/01

From: Craig Saxton

Subject: Diversion Volume

Dave Langman and Tim Mayer called concerning the problems I had with making some of the changes they requested on the notice of error forms they submitted.

Claims: 31-02322 and 31-11229. FWS requested an increase of diversion volume from 900 AFA to 1260 AFA. My problem with that was that if they made that change it would decrease my evidence for 31-11229, thus I would need to decrease the diversion volume for that claim. Dave and Tim informed me that they no longer want to request that change. They asked if they needed to submit any information and I said no, and that I would write a Memo noting their request.

Claims: 31-02350 and 31-11230. This is the same situation as above, however, Dave and Tim do want me to make the changes on 31-02350 and thus decrease the diversion volume on 31-11230 to represent the historical evidence provided.

Claims: 31-11231 and 31-11232. In order to increase the volume on the beneficial use claims, I need an amended claim. They will send that to me by the end of next week (week of March 19-23).

Craig,

I am still working to find the documentation which supports the diversion volumes claimed. The engineer who did the analysis no longer works for us, but I did get a hold of him to see what he recalled. He said the supporting documentation provided with the claim was intended to support the cfs rate and period not necessarily the volume. The volume was based on the maximum year of use but these records weren't necessarily provided with the claim. (he couldn't remeber why). I haven't had any luck yet , but I will continue to try and locate these records and provide them to you ASAP.

Thanks

Subject: Diversion Volume
12/21/2000 08:38 AM

Good Morning,

I spoke with Jerry Deutscher to inquire about the status of the evidence for diversion volume for the beneficial use claims on the wells. He asked me to drop you a line.

To recap, we had discussed the problem that the evidence provided in the information packet with your claims didn't support the diversion volume claimed for beneficial use claims 31-11230 (well 2), 31-11231(well 3), and 31-11232 (well 4,5,6).

I tried to work the numbers and determine how the claimed diversion volume was calculated. I was unsuccessful.

My initial recommendation, at this point, is due January 5, 2001. At this point, I am planning on recommending a diversion volume less than what was claimed on two of the beneficial use claims.

31-11231 (well 3), Claimed Volume: 824 AFA
Preliminary Rec: 610 AFA

31-11232 (well 4,5,6) Claimed Volume: 2580 AFA
Preliminary Rec: 2082 AFA

If this recommendation is not acceptable, then I will need the diversion volume evidence we spoke about as soon as possible.

CASE NO. 39576

DECLARATION OF
GERALD L. DEUTSCHER

Dec. of Deutscher

I, Gerald L. Deutscher do declare that:

1. I am the Refuge Manager of the Camas National Wildlife Refuge, Hamer, Idaho, United States Department of the Interior, Fish and Wildlife Service, Region 1.

2. I have been employed by the United States Fish and Wildlife Service since January 1975 except for two years during which I was employed by the United States Bureau of Land Management as described in the following section. I received a Bachelor of Science degree in Biology from Eastern Montana College in June 1973. I attended graduate school in Wildlife and Fisheries at South Dakota State University from September 1973 until I accepted a position with the United States Fish and Wildlife Service in January 1975.

Page 1 - DECLARATION OF GERALD L. DEUTSCHER

MICROFILMED
NOV 14 1996

3. I began my career with the United States Fish and Wildlife Service (Service) in South Dakota. I have worked as a biological technician, Assistant Refuge Manager, and Refuge Manager on migratory bird refuges in South Dakota, Colorado, Idaho, and Nevada. I worked two years as a waterfowl biologist for the Bureau of Land Management in Montana before being assigned as Refuge Manager at Camas National Wildlife Refuge (Refuge).

4. As Refuge Manager at the Camas National Wildlife Refuge I am in charge of daily operations, including habitat management through water diversion, pumping, and manipulation. I supervise one to three personnel. One of my responsibilities is to manage the use of water diverted from Camas Creek or pumped from ground water for use on the Refuge. Cooperation with Water District No. 31 is necessary to manage the Refuge's water supply.

5. I am familiar with the current operations of the Refuge and have studied and reviewed past operations through historic files and documents, interviews and discussions with Service employees and others knowledgeable about the Refuge and its surroundings, and on-site inspections.

6. The United States Department of the Interior, Fish and Wildlife Service, maintains the Camas National Wildlife Refuge. The use of water is necessary to fulfill these purposes.

7. The Camas National Wildlife Refuge was established by Executive Order Number 7720 dated October 12, 1937, as "a refuge and breeding ground for migratory birds and other wildlife".

8. To the best of my knowledge and belief, the Camas National Wildlife Refuge first put the water claimed as a beneficial use water right to beneficial use as follows:

- a. Water Right Claim No. 31-4016: The well supplying water under this claim was completed for irrigation use in June 1955, as evidenced by the driller's Well Log and Report to the State Reclamation Engineer of Idaho (Exhibit A).
- b. Water Right Claim No. 31-4066: Buildings, including frame houses, existed in 1936 and were occupied by Mr. Gerald Jones, as evidenced in the Description of the Idaho Livestock Lands, Inc. Tracts (33, -I, -II, a, b, -I) (Exhibit B). The large house occupied by Mr. Jones contained plumbing fixtures indicating domestic water use, as evidenced by November 6, 1937 correspondence (Exhibit C).
- c. Water Right Claim for Well No. 1: Water was used for wildlife purposes as early as March 16 and as late as mid-December, as evidenced by the 1957 Water Management Plan (Exhibit D) and the Annual Water Program Report dated September 23, 1958 (Exhibit E). The flow rate was 356 inches, as evidenced by the 1957 Water Management Plan (Exhibit D).
- d. Water Right Claim for Well No. 2: Water was used for wildlife purposes as early as January 7 and as late as December 28, as

evidenced by the well-pumping record for Well No. 2 for 1963 (Exhibit F), and the 1963 Annual Water Program (Exhibit G).

- e. Water Right Claim for Well No. 3: Water was used for wildlife purposes as early as March 20 and as late as November 16, as evidenced by the 1963 Annual Water Program (Exhibit G) and the well-pumping record for Well No. 3 for 1961 (Exhibit H). The flow rate was 15.7 cubic feet per second, as evidenced by the 1963 Annual Water Program (Exhibit G).

- f. Water Right Claim for Well Nos. 4, 5, and 6: Water was used for wildlife purposes as early as January 1 and as late as December 26, as evidenced by the Record of Pumped Water Use for 1963 (Exhibit I) and the 1963 Annual Water Program (Exhibit G). The flow rate was 43.3 cubic feet per second, as evidenced by the 1963 Annual Water Program (Exhibit G).

Pursuant to 28 U.S.C. § 1746, I declare under penalty of perjury that the foregoing is true and correct. Executed on this 12 day of March, 1993.

CAMAS NATIONAL WILDLIFE REFUGE

HAMER, IDAHO

ANNUAL WATER PROGRAM - 1963

SUMMARY OF 1962 WATER USE.

Total precipitation for 1962 was 7.44 inches. This year the Camas creek watershed received one of the greatest snow packs since records have been kept. Precipitation was fairly evenly distributed with 4.23 inches of precipitation received during the period May through August.

The Camas creek's flow reached the refuge for the first time on February 13th and the flow ceased August 16th. Approximately 11,047 acre feet were received from the Camas creek flow. On many occasions, the flow was so great into the lower portion of the refuge from the flooding Camas creek, that the refuge was unable to take its full decreed right. With the completion of the major diversion ditches all six wells were operated through the year.

A resume of water use follows:

Camas creek - Right No. 143: two points of diversion used, 24 hour c.f.s., February - 324.0, March - 525.9, April - 1736.9, May - 1448.7, June - 1048.0, July - 272.8, August - 167.2.

This gives a total flow of 11,046 acre feet. This water was used to irrigate cereal grains and alfalfa plantings located in Unit 1 and too maintain pond water elevation at the permissible maximum, thusly irrigating wildhay meadows.

The following table gives the data for the operations of the refuge wells. The well water was used to irrigate cereal grains and alfalfa plantings located in Unit 1, 3, 4, and 5; to provide livestock water in Units 1, 5, 7, 9, and 10 and to maintain the pond water levels and irrigate wildhay meadows.

The following table gives the water levels from ground level during calendar year 1962. Each well is measured once a week with no correction of water level made for atmospheric pressure changes.

Because of the great amount of run-off available during the spring of 1962, all major ponds were kept at maximum levels throughout the first week of July. Hall, Height, and Helm ponds located on Units 17 and 19 were well filled and this is the first time these ponds have been filled in the last eleven years. These ponds were filled by the emergency water outlet located in Unit 1 which uses the old channel of Warm creek. Many of the ponds were so well filled by the first of August that wildhay cutting was prohibited or postponed until a later date.

Pond levels were permitted to drop during September and October to levels equal to that of 1961 in an effort to confine Muskrat house building to the more permanent pond areas. This concentration of the Muskrat population should reduce winter losses through "freeze-out."

During January, February, and December Wells 5 and 6 were operated to provide better water levels conducive to carrying the Muskrat population through the colder months. The critical time for Muskrats at this refuge is during the winter months when the ponds are either dry or frozen solid to the bottom. A large Muskrat population is an effective tool in the control of cattail.

Proposed 1963 Water Use.

The water use for 1963 will be as prescribed in the Water Management Plan and the provision of the Proof of Beneficial Use covering the six wells. All wells and ditches have been constructed and are in operational condition with a moderate amount of maintenance. Well water will be used as prescribed in the Proof of Beneficial Use for the irrigation of crops and meadows. However, additional use of well water will be made for the uses itemized.

1. The maintenance of pond water levels at elevations conducive to good marsh management and necessary to provide optimum waterfowl nesting conditions and the control of cattails.

MICROFILME
NOV 14 1995

2. To provide water during January, February, and December to insure a carry-over of a substantial portion of the Muskrat population to assist in the control of cattails.
3. To provide livestock water during the months of October, November, and December. This pumping operation is necessitated by the termination of Camas creek water flow during these months.

The 1963 snow pack of Camas creek is the poorest in the last 35 years. This proposed plan will be dependent upon rainfall and well water.

Of United States Fish & Wildlife Service

The following declarations are submitted in support of the beneficial use claims made by the U.S. Fish & Wildlife Service. Each declaration provides evidence regarding one or more claims, as shown in the cross-referencing index below. In addition, for each applicable claim, the last page of the claim refers to the declaration that supports it. In accord with IDWR practice and instructions, declarations have not been provided for small domestic and stockwater claims or for claims supported by a license.
