Memorandum

Date: 10/26/2000

From: Craig Saxton

Subject: 31-04015

31-04015 was split into 31-11417 and 31-11418 because of the two separate systems.

31-11417: From historical evidence, I can recommend 67 acres with 2.55 cfs (pump capacity)

31-11419: Enlargement: The possible enlargement consists of two portions. One portion is 48 acres underneath the pivot. The second portion is the SW corner of the pivot. Carl has irrigated this corner in the past and plans to in the future per our discussion 10-25-00. The enlargement is 58 acres. The result is 31-11417 and 31-11419 totaling 125 acres with a diversion rate of 2.55cfs, or 0.019cfs/acre.

The priority date used for 31-11419 is based on the date the original statutory claim was filed by Reed Mickelsen on December 23, 1975.

31-11418 is in reality a 3/4 pivot: Based on historical evidence, 31-11418 was recommended for 60 acres, with a diversion of an inch to the acre, or 1.20 cfs (see enclosed map).

Notes of why I couldn't recommend the entire 3/4 Pivot:

Acreage: Pivot put in after 1987 (no enlargement). 60 acres based on 1966 and 1960 aerial photos.

Diversion Rate: Soil is lacustrine. Different type than hubble done for 31-11417 or Gasser 31-04024.

Section 42.2.5a, Idaho Code

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. The filing of this claim does not confirm the water right but will serve for information purposes only. It may, however, become the basis for future adjudication of the water right by the Court.
