SW $\frac{1}{4}$ of Sec. 2, Twp. 5 N., R. 45 E., Boise Mer.

2. Said water right, is as to ground waters obtained by virtue of a well, and is supplemental to a decreed water right to 160 miner's inches of the waters of South Leigh Creek with priority date of June 1, 1898. The adjudicated water right from South Leigh Creek was and is inadequate to irrigate the premises, since the land is rough and difficult to irrigate by flood irrigation, and since no water has been available, generally, after the first week in July of each year, and accordingly the ground waters decreed herein are necessary to fully and adequately irrigate the lands of plaintiffs, in order to raise agricultural crops thereon.

3. The ground waters have been appropriated, and are used and utilized by system fully described in the findings of fact entered herein.

4. The administration of said ground water rights shall be in accordance with the priority heretofore provided, based upon the administration of other similar ground water rights.

Decreed this 8 day of January, 1968.
