

10/24/02. phone conversation with Grady
Staley. 775-3560.

When did you put in the dam in
Marsh Creek? 1970-71.

Grady worked with the Army Corp.
of Engineers to replace telephone
poles placed in Marsh Creek with
the current system in 1970/71. They
have a vertical system now. It's
a concrete diversion that allows
the water to flow into Grady's
ditch.
