SCALE in Chains

WARNING STATION:

Thus, plots of the Burrows's invariant are little used, should be used only as a rough guide to the similarity values, take the values between 0 and 1 and "stretch" them at a range from 1 to 4 for arbitrary transformation of the 100 to 400 points of the scale. For example, a value of 100 would be transformed to 100/4 = 25, and a value of 400 would be transformed to 400/4 = 100.
