Attn: Ernst Carlsen, Water Rights Supervisor

In reference to the April 3 memo & map, we have concluded that even though we have filed the "Notice of Error" pages for our water rights, upon receiving the memo & map have decided that there are probably errors in the "yellow" basis for irrigation acres which have been marked on the map.

At this time we feel that we probably need an agent to contact us and review these problems ASAP to correct the acres that either have been claimed or what is marked on the map.
