1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

TFCC disagrees with the number of irrigated acres identified in the proposed recommendation.

2. Describe the changes you wish to make in the proposed recommendation:

The number of irrigated acres should be modified as depicted in the attached ArcView shapefile (provided CD to Doug Jones Southern Regional Office).

In addition, the following remark should be added to accurately describe TFCC's water delivery system:

Water diverted pursuant to this right and water right nos. 1-10 and 1-209 is conveyed through and stored in the Main Canal, Murtaugh Lake, the High Line and Low Line Canals, and numerous laterals, coulees, and regulating ponds located throughout the project.

3. Give a brief explanation as to why you disagree with these portions:

The preliminary recommendation incorrectly identifies 133,533 total acres within the place of use. TFCC has reviewed IDWR's initial ArcView shapefile and has modified it to accurately reflect the total number of irrigated acres within the project.

I AGREE with this proposed recommendation: no changes need to be made.
