WATER RESOURCES

Roxanne, here's another one:

The Leadville PL project was approved in 1987 and completed in 1989. For whatever reason the BLM allowed Charles Isom to change his 1909 irrigation WR (74-164) in to add stockwater for the development (by giving up an acre of irrigation). The decreed (1912 and 1982) WR shows three POUs and Isom's transfer application has three POUs. However, the entire project file and the map in the transfer application only refer to two POUs.

Karl Tyler obtained this WR in 1997.

The BLM investigated this project on 9/8/04. There is a headbox in Canyon Crk on the FS. There are only two troughs. There is not a third trough as shown in the transfer application (SESW of S20). Apparently, this was never built.

I'll mail information as well as a GPS/GIS map to you.
