1. Describe the portion of the proposed recommendation with which you disagree (e.g. priority date, period of use, source):

quantity of water that flows in the 12"
concrete pipe

2. Describe the changes you wish to make in the proposed recommendation:

1.25 CFS instead of 1.000 CFS

3. Give a brief explanation as to why you disagree with these portions:

When we measured the amount of water with a 4" orifice weir, it was closer to 1.25 than 1 CFS.

I AGREE with this proposed recommendation: no changes need to be made.
