Re: Snake River Basin Adjudication (SRBA)
Water Right #29-157A
Change of Address

Dear Water Right Holder:

Department of Water Resources

The former owner of your property received the enclosed mail from us, and was kind enough to provide your address to us. Our records show you as the current owner of water right #29-157A, with the name David Lee Losee instead of David L. Lossee as the former owner wrote. Although we have reached you at the address above, we need your written confirmation this is your correct mailing address before we can change our records. Future notices related to your water right can be sent only to the address on your water right or as otherwise changed by you.

Please sign your name at the bottom of this letter and return it to this office. Make corrections to your name and address if necessary **and list any other water rights you may have** before returning this letter by January 18, 2001. Thank you for your help.

If your mail delivery address changes in any form, please contact us in writing so we can update our records.

Sincerely,

Sally

Re: Season of Use for Your Water Right

Dear Basin 29 Water User:

Department of Water Resources

This letter is being sent to you concerning the season of use for your water rights with source of the Portneuf River and tributaries. The Judgment for the *Union Grain & Elevator Co. v. McCammon Ditch Co.* case set the season of use as April 15th to September 15th. However, IDWR understands that irrigation has been occurring prior to April 15th and after September 15th for several decades. From Idaho Department of Water Resources (IDWR) records, it appears that you are a successor to a party or parties from the *Union Grain and Elevator Co.* case and thus the following information may apply to your water rights.

If you are a successor to a party or parties to the *Union Grain & Elevator* decree then your water right, based on that decree, will have a season of use of April 15th to September 15th. IDWR intends to recommend "shoulder remarks" that allow early season irrigation starting from April 1st until April 14th and late season irrigation extending from September 16th until October 31st to comport with IDWR's standard season of use for the area. The priority date for the early and late season irrigation would be the date of the partial decree in the SRBA, likely a priority date with the year 2002 or 2003. If you included stockwater as a use on your claim, IDWR intends to recommend the stockwater use with the irrigation season of use and shoulder remarks.

However, if you have been putting surface water to beneficial use outside of April 15th and September 15th, prior to 1971, then you may file a separate claim for a beneficial use water right for the early and late season irrigation or an extended stockwater season.

If you choose to file a beneficial use claim to extend the season of use for irrigation purposes or for stockwater use outside the irrigation season, you will be required to file a claim with the appropriate filing fee and to provide sufficient evidence of the priority date claimed. **The earliest priority date that IDWR will recommend will be August 7, 1932** because the final amended judgment in the *Union Grain & Elevator Co.* case was dated August 6, 1932. The actual priority date recommended for a water right for a season of use outside the set April 15th to September 15th season will depend on the evidence of when the water was actually put to beneficial use.

If you have any questions concerning this matter please contact Ernest Carlsen at IDWR's Eastern Regional Office in Idaho Falls at (208) 525-7161.

Sincerely,

David R. Tuthill, Jr., P.E.
Adjudication Bureau Chief
