Subject: Basin 29 Preliminary

Ernie,

We've reviewed the Preliminary Directors Report for Basin 29 and have found four that we believe have typo's in part of the legal description that put part of the water right on National Forest System land. They are outlined below. Please take a look at them and let me know if our suspicions are accurate. We're trying to resolve possible objections before the final Directors Report for Basin 29 is submitted to the SRBA Court. → Done 5/1/03 ASR

First - Water right nos. 29-00224 and 29-07370, claimant is the City of McCammon. The place of use for both these water rights is T09S, R37E, Section 12. We suspect this should be R36E because the City of McCammon is in Section 12, T09S, R36E. Range 37 East would put it exactly 6 miles to the east, out of the city and onto the forest. Also look at 29-13224 } 9/1/03
No Problem

Second - Water right no. 29-00494H, claimants Jerry and Debbie Bailey. The point of diversion is shown as T09S. We believe it should be T07S, like the place of use and right on the source, Blackrock Creek. This would also match the map showing T07S, R35E.

Third - Water right no. 29-13145, claimant is Hardcastle Family Trust. The Section in the Point of Diversion is shown as Section 2. We believe this should be Section 20, the same as that listed for the Place of Use and as shown on the map, and on the Portneuf River, too.

Please let me know if the legal location problems we identified above are actually typographical errors that will be corrected for the final Directors Report. Thank you.
