Re: Evidence of Priority Date
Claim # 75-10079
Claim # 75-10080

Dear Ms. Brown:

Enclosed, please find a land survey map performed by the state of Idaho dated August 8, 1892, for Township 22 North, Range 22 East. I have also included an enlarged photocopy showing Section 3, and have indicated on both maps, the location of my property. The map clearly shows a spring entering my property from the east and the presence of a ditch running along the road in the southern portion of Government Lot #1. If the ditch continued to run along the road or ended, any water would intersect with the spring flow and enter my property. If the water somehow crossed the road above the spring, it would still flow across my property due to the contour of the land. I believe that this shows the presence of both spring water and wastewater on my land in 1892. If the Department determines that these maps provide satisfactory evidence of my claims, would you recommend that I amend my claims to reflect this earlier priority date? It was only last week that I acquired the maps.

Thank you for your consideration in this matter.

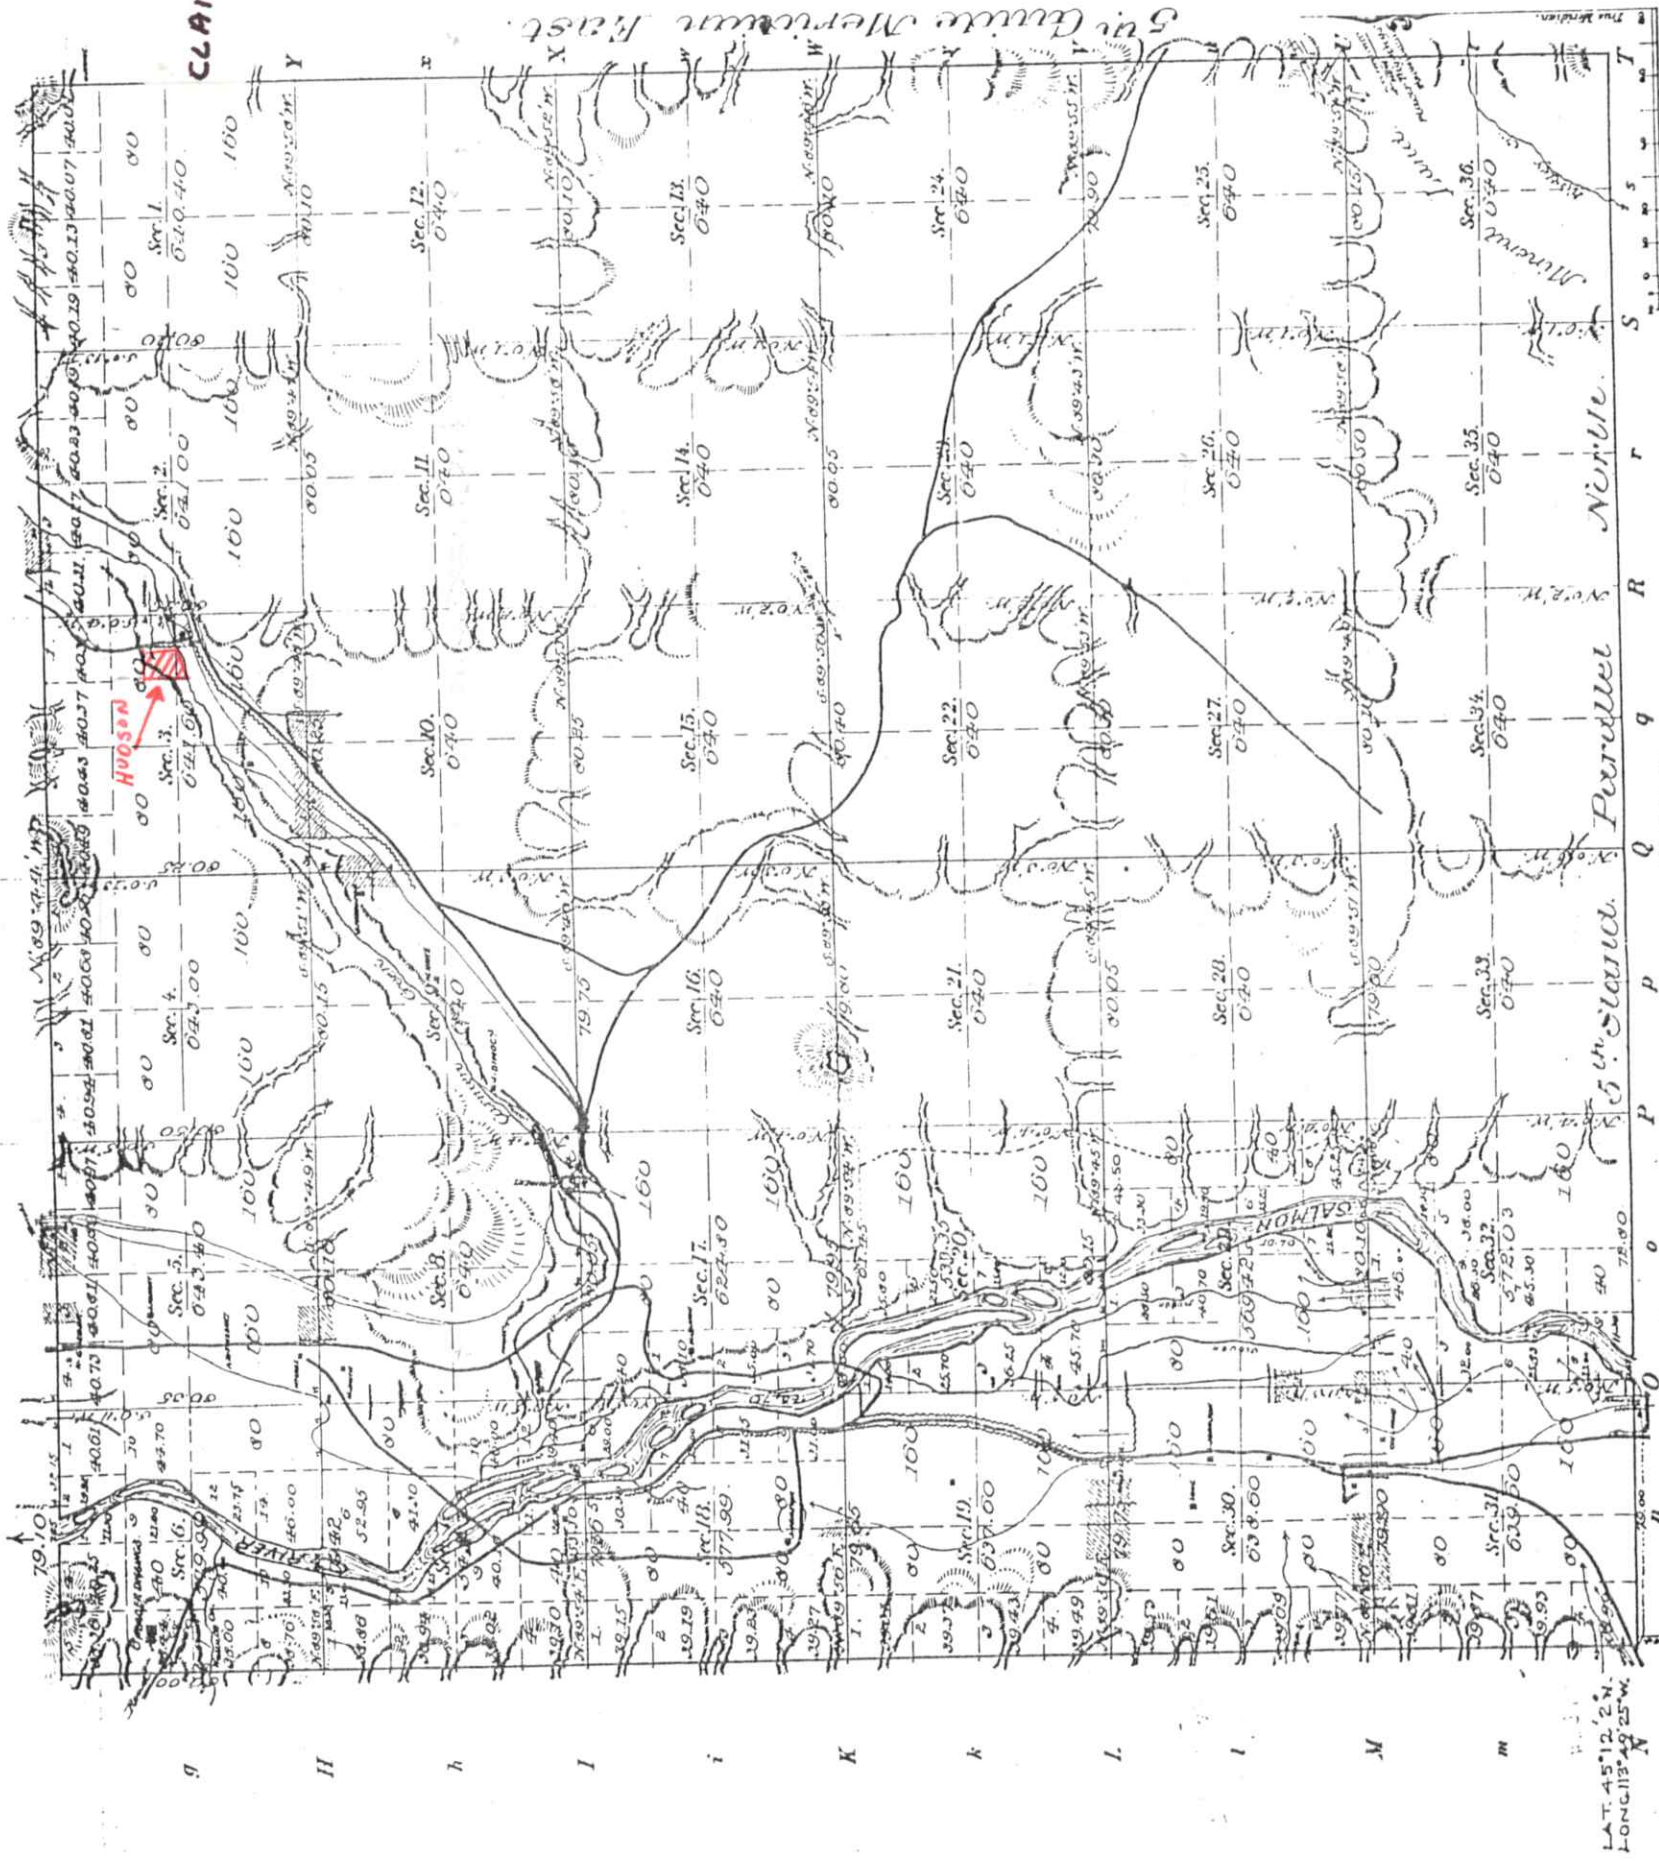

Sincerely,

Jim Hudson
