Memo to file:

Claim 27-102

POU

I started with a shape (27-00102) that apparently was created by someone in Idaho Falls. When I used GeoProcessing, it said that there was "0.0" in the NWSW. Since the shape didn't even border that QQ, I deleted that line, converted the shape then combined the pieces. Renamed the file 27-102.

POD

I did not find a POD file so using the printout of the shape in the file, I created a POD placing it as close to the drawing as possible and apparently named it.

Barbara
