WATER RESOURCES
WESTERN REGION

Dear Mr Saxton

Enclosed is the pictures we talk of on the phone. The two points of diversion look fine to me as near as I can tell. I hope not to use Stewards point in the future. The years prior to 1990 you ask of. I know Stewards pump was used 1985, 86, 87, but it was Don Hammond at that time. Watering after that has been very little because of cost of pumping and what it paid to water my hay field. I have played with the idea of a tree farm which would require more water than my hay needs. I never abandoned my water right or do I intend to please help me with this matter if you can.

Thank you

Wesley Kent
