INSTRUCTIONS

~~2001 0 6 2AM~~ This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free)

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

NOTES:

There was an old diversion located south of road in section 21, S21NW but this dam was washed out & has not been used since. I discussed this old POD w/ Marilyn Baranaga. Also that the place that looks like south of Chabroad in S21NW, section 21 where old POD was is a cut area due to sub-ir. She said it was because of flood water. She did not dispute my findings here.

Comments about the measurement:

The results of the calculation are:

The length of the channel measured is 199 feet.

The upstream and downstream rod readings are 6.36 and 7.41 feet.

The channel cross section is 2.16 ft-sq.

The wetted perimeter is 4.16 feet.

The hydraulic radius is 0.52 feet.

The slope is 0.0053

The roughness coefficient is 0.0500

The flow velocity is 1.399 ft/sec.

The rate of flow is 3.02 cfs.

Dear Mrs Barinaga:

Enclosed for your review is a computer print out and a copy of an aerial map that show my proposed recommendation for your decreed water right from Cherry Creek.

During a recent telephone conversation you indicated you would be in Boise some time in the near future and we could meet at that time to discuss your water right claim. Please review the enclosed map and profile report before we meet so that we can discuss your concerns or questions at that time. In the mean time you can call me at the number below at any time.

① Think that add'l. areas should be recognized -
see highlighted areas, attached -

a) pld e field # 6 & 7 washed out early 1980's (?)
but they believe have had B.W. enough to be
recognized.

b) small piece e n. end of site maybe overlooked.

DW did exam with Barrington's Ranger - maybe some
info overlooked?

② Might want to file instream stock claim(s) e
165 126 S. 30?

③ Might want to file on stock well e 165 116 S. 21
near pld A51-04027 (spring). Well was used
when high water level provided Artesian flow but otherwise
not?

Available as supplement if needed - can file claim
to recognize "supplemental stock use" where not
permitted for non-use (similar to inst. supplemental
right)? If claim could not be recommended, could
file new permit or could use as exempted use 42-111.

RE: CHANGE OF OWNERSHIP FORM SUBMITTED TO THE SOUTHERN REGION

TO WHOM IT MAY CONCERN

Enclosed is a change of ownership form that was delivered to the Southern region by Marilyn Barinaga. I noted that she had checked that the rights were split 50-50 but after discussing this issue with her it appears that there is just joint ownership rather than a split. She then noted that on the form and initialed the change.

Dear Mrs. Barinaga;

Enclosed are the maps we discussed in our phone conversation of Tuesday morning, outlining the found acreages from the field exam conducted on September 29, 1993. There is a 1974 ortho-photo quad map and a 1988 map obtained from the ASCS office. All acreages are highlighted in green and the point of diversion is noted on both maps.

If you have any questions or comments be sure to contact me.

Sincerely,

Linda A. Werner
Sr. Water Resource Agent
