NOTES: 05/16/1996: There are no springs in the NENE of S.33. This land is a plateau above Trout Creek. However there is a large spring in the SENE on the south side of the canyon which may be AKA Trout Springs. It is unknown how this could have been ditched back uphill to the south to provide irrigation in S.34 + S.33. Based on the field exam for 5-1-02010 the water may have been ditched along the hillside parallel to Trout Creek to the area of the confluence with Hellfire Spring Creek. 111

Dear Mr. Bachman:

IDWR's initial investigation of the Notices of Claims listed above indicates that there have been changes in various aspects as described below for each claim.

A water right owner who has made a change in use of a water right prior to commencement of the SRBA without prior IDWR approval may claim the change in the SRBA. IDWR may recommend a right as changed, however, only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights, or that the change be conditioned to prevent injury to other water rights.

As per our conversation of October 29, 1993, in my office, I am sending a list to you of the claims and the documentation that is required for the above-referenced claims. This documentation must be received in this office by November 19, 1993.
