NOTES: In 1979 & 1980 the wells were tied into a mainline system to put the irrigated area all under a hand line and to feed line system under a system developed through GRASCS. As a result some fields that weren't previously irrigated are now irrigated. There was no irrigation in area because the being into was realized and changed to comply with the new system. and some manually because under the study replaced there used to replace new areas. The transfer was not filed in 1979 or 1980 but the schedule quality and are accomplished transfer for of the land in file by the claimant, Paul Jensen.

CLAIMS: A51-02135, -02168, -02184, -07008, -10093, -10091

CLAIMANT: PAUL GLERUM

DATE: MAY 31, 1996

FROM: MEL SCHULTE

On May 30, 1996 I met with Paul Glerum at his home and at the site of the dairy and farm he operates with his sons Harold and Rolf. Prior to going to the farm/dairy location Mr. Glerum showed me the SCS records that confirm the current well, mainline and sprinkler system has been in place since 1979 and 1980. These records are available for review by contacting Mr. Glerum if needed. At this time Paul Glerum executed an affidavit concerning the irrigation system. He does not live at the dairy site but on Hwy 51 about a mile from the intersection of Hwy 51 and Hwy 78.

At the dairy farm site we confirmed the well locations, irrigation delivery system and the place of use using ASCS aerial maps and field visits. A copy of this map will be in the files when it is completed in its final form.

During our visit we discussed the split ownership of the farm. According to Paul Glerum, he deeded a part of his farm to each of his two sons in order to qualify for a Farm Credit Service's loan several years ago but the loan has now been paid in full. However, because the sons are partners in the farming operation, it is there intention to split any sale proceeds into one-third shares for each. The entire dairy farm is now on the market for sale and they hope to develop a sale within the next year. If it does not sell we will have to split all of the water right claims prior to their final recommendations.

Paul expressed their concern that all water uses be covered by water right filings including the domestic uses the use of water for heating of their three homes and shop. He said the smaller geothermal well near the homes and dairy have always been used for both culinary and heating in the homes. According to his recollection and records the first home was constructed in 1959, the second in 1963 and the third in 1979.

Paul Glerum said he moved the large shop onto the farm in about 1979. It is the old gymnasium from the Bruneau High School that was demolished when the consolidated school district with Grandview was formed. He purchased the gym structure, moved it to his farm and placed it on a new foundation.

Another matter we discussed was the Glerum's desire to drill another well for the dairy operation to serve as a back up well and provide a source of cold water for the dairy. He said they do not

want to increase their water consumption but, hope to obtain a good source of cold water to use for stock water if its possible. Since all three of their current wells are low temperature geothermal sources, they think an additional source of cold water would be beneficial to the total operation. They would like to drill this new well some time this Fall/Winter after the crop season is over. It appears a transfer application would be necessary to add a second P/D or second well to the water right for the dairy.

I told Paul Glerum I would help determine what additional filings or amendments would be necessary to cover all of the domestic and heating uses on their dairy farm and what filings are necessary for the new dairy well.
