INSTRUCTIONS TO EXAMINERS

1. Always carefully note the location of the point of diversion and accurately plat same.
2. When proof is for beneficial use, carefully check up the number of acres actually irrigated in each forty and accurately plat same.
3. Make a map showing the correct location of streams and ditches, and the irrigated lands, and any adjacent permanent landmarks, such as towns, lakes, large streams and public roads.
4. If any unusual conditions are discovered, make plain statement of them under remarks.
5. Always see the holder, if possible, and go over the whole ground with him and make your report only upon actual existing facts and conditions.
6. Give general characteristics of soils, topography, and crops raised.

Department of Reclamation

Comes now Joseph E. Turner and represent to the State Reclamation Engineer of the State of Idaho:

That he is (are) the owner and holder of Permit to Appropriate the Public Waters of the State of Idaho, No. G-28158.

That the point of diversion is described in said Permit as being located:

SE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 6, Township 7 South - Range 6 East, B.M.

That he now requests that the point of diversion be changed to a point

located: NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 6, Township 7 South - Range 6 East, B.M.

That the reason for desiring to make such change is as follows:

When I originally made this filing, I did not know which side of 40 acre line this would work out on. Since then, I have obtained a good aerial photograph; I have identified this b marks on the land and I had land surveys made in the area so that it appears to be just over the line and down the ditch further so that it is actually in the extreme southwesterly corn

That no one will be injured by such change, and that such change will be made at Permit Holder's own risk. of the NE $\frac{1}{4}$ NW $\frac{1}{4}$ and I can efficiently irrigate all my land from t point and have done so since the well was drilled. (This well w

APPROVAL OF STATE RECLAMATION ENGINEER

CARL E. TAPPAN

I, ~~GEORGE W. CARTER~~ State Reclamation Engineer of the State of Idaho, HEREBY APPROVE the above and foregoing application for amendment to Permit to Appropriate the Public Waters of the State of Idaho, No. G-28158. This approval constitutes a new permit and is issued as an amendment to the original permit, to which it refers and of which it becomes a part, and said application is approved only insofar as the rights of others will not be adversely affected thereby.

WATER RIGHTS

The water rights appurtenant to the Joe Turner property at the present time are obtained from the following adjudicated water rights as set out in the Court Decree for the Bruneau River water users:

I. ADJUDICATED RIGHTS FROM BRUNEAU RIVER.

1. The John Turner Right. This ranch receives water for the lands in the NW $\frac{1}{4}$ of Section 31, Twp. 6 South, Range 6 East, B.M. and a fraction of the SE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 36, Twp. 6 South, Range 5 East, B.M. As evident on the books of the Southside Canal, this amount of water is 100 inches.
2. The Fletcher A. Hawes Rights. This ranch receives all adjudicated rights of the Fletcher Hawes property which consists of the SW $\frac{1}{4}$ and the SW $\frac{1}{4}$ SE $\frac{1}{4}$ of Section 31, Twp. 6 South, Range 6 East, B.M. and the N $\frac{1}{4}$ NW $\frac{1}{4}$ and the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 6, Twp. 7 South, Range 6 East, B.M. This decree was for a total of 160 inches. X 160
66 $\frac{2}{3}$
33 $\frac{1}{3}$
3. William Turner Rights. This property receives water from the William Turner rights pertinent to the lands as follows: SE $\frac{1}{4}$ SE $\frac{1}{4}$, Section 31, SW $\frac{1}{4}$ SW $\frac{1}{4}$ of Section 32, Twp. 6 South, Range 6 East, B.M. and all of the NW $\frac{1}{4}$ of Section 6 now belonging to Joe Turner for a total of 95 inches.

Therefore, the total pertinent to this land from decreed rights from the Bruneau River is 355 inches.

Approval of State Reclamation Engineer

The number of this permit is G-283477.
Recorded in Book 99 Page 283477 Approved SEP 17 1959

This is to certify that I have examined the within application for a permit to appropriate the public waters of the State of Idaho, and hereby approve the same, subject to the following limitations and conditions:

II. HOT SPRINGS CANAL COMPANY

1. This ranch has 66 $\frac{2}{3}$ shares of water rights in the Hot Springs Canal Company and, as stated by Mr. Turner, these shares are entitled to 1 inch of water or a total of 66 $\frac{2}{3}$ inches of water are available to lands below the Hot Springs Canal chiefly in Section 6 and the S $\frac{1}{2}$ SE $\frac{1}{4}$ of Section 31 (see map).

Therefore, a total of 421 $\frac{2}{3}$ inches of water are pertinent to the lands of Joe Turner from the waters of the Bruneau River and the Hot Springs Canal Company.

III. SUPPLEMENTAL WATER RIGHTS

In addition to the rights stated above, this ranch also has supplemental water rights from a flowing well, Idaho Permit No. G28158, having a priority of September 17, 1959. This well is equipped with a turbine single stage pump capable of delivering 277 inches and is pumping from a 50 ft. level. The well normally will flow 10 to 15 gpm's and provides stock water for this particular area throughout the winter months. This is a supplemental water right and is used primarily late in the season when the Bruneau River water drops to such an extent that it is necessary to assist the waters under the Bieroth Canal. *Q. A. P. 150 and 151*

As set forth above, it is quite evident that there is an ample supply of water available for the irrigable lands in this unit. With a total of 421 $\frac{2}{3}$ inches of surface water available from the Bruneau River and the Hot Springs Canal for approximately 400 acres of irrigated land it indicates at least 1 inch per acre. *167 - 171, 175, 177, 178*

Since the construction of the C. J. Strike Dam, there has been ample water for all the rights on the Bruneau River and, in fact, most years all the users receive far above the amount of water that their decree calls for. A reliable source stated that most users get approximately twice as much water as their decree calls for as the limiting factor seems to be the carrying capacity of the main canals rather than any decreed rights as there are no measuring devices on any of the canals and most users turn out their own head of water.

In conclusion, it can be stated that water rights pertinent to the Joe Turner Ranch are supplied by the Hot Springs Canal Company and the adjudicated rights out of the Bruneau River are supplied by the Southside Canal Company which delivers the water to the Turner Ditch and to the Bieroth Ditch. The Bieroth Ditch is supplied from the Southside Canal Company by a 10 hp motor that delivers approximately 180 inches into the Bieroth Ditch. All of the 355 inches are transported from the Bruneau River to the Turner Ranch by the main canal of the Southside Canal Company.

RE: Claims to Water Rights filed in the Snake River Basin Adjudication

Ronald E. Prow
HC 85, Box 127
Bruneau, ID 83604

Dear Mr. Prow:

Enclosed are revised recommendations of your claims. Please note that I have added the points for the Turner & Beiroth ditches to all of your rights that are diverted from the Bruneau River. I have added these as points of re-diversion, since the actual diversion is at the dam. I have also adjusted Rt. 51-02149 (which is your groundwater license) to agree with the amended claim you submitted while in my office on August 13, 1998. The flood water claim, Rt. 51-10270, only needed to be recommended for 6.08 cfs after I determined how much water was already recommended and what was needed to bring your lands up to the flow requirement as determined in the Brockway report.

Please review the enclosed recommendations and the new GIS map attached to your groundwater right. If you have any questions in regard to these, feel free to contact me.

Sincerely,

A handwritten signature in cursive script that reads "Kay Walker".
