INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights, and, if a required claim for the water right has not been filed, to file the needed claim.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures, or if you have questions about completing this form, please contact your nearest IDWR office or call 1-800-451-4129

If you need additional space to describe or explain any of the items on the form, please attach additional sheets to the form as you may require.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believe there are water rights for the property but the numbers are unknown, you may wish to call IDWR or come into an office of IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector "and", "or" or "and/or". If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign, however only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. If the property you have purchased is only a portion of the property owned by the former owner/seller, you may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

Claimant added well in section 22. At field man he said well in Sec 22 is used on P.O.U. in section 22 & 27 & well in section 23 is on P.O.U. on Sec 23. Since his right includes both all sections this well should be added. Also I lay of land & compare methods support this. Plus - field man info from 1968 contains some confusing data as

to the location & number of wells being used. I will solicit info. from claimant regarding date the additional well was used but at this point I see no problem with the addition of the second well. Also note the engineers report dated 5-2-68 describing serial nos. & hp of wells. Data I gathered is consistent w/ this.

Well in Sec 22
150 hp, Hollowshaft
serial no. 1381794

Well in Sec. 23
125 hp, Hollowshaft

WATER LICENSE

THIS IS TO CERTIFY that AGNES M. MURPHY of the County of OWYHEE State of IDAHO made application to the State Engineer on December 20 1960 for a license to divert water from the Snake River for the purpose of diversion works and earth ditches and that on January 14 1961 the State Engineer approved the application and issued a license for the purpose of diversion works and earth ditches with a maximum rate of diversion of 6.25 cfs.

The license is valid from April to October 31 of each year. The license is subject to the provisions of the laws of Idaho and is hereby confirmed by the State Engineer and entered in the records of the Idaho Department of Reclamation. The point of diversion is SW 1/4 Sec 28 T. 4 S. R. 4 E. B. 1 and the location of the point of use is Owyhee. The amount of water to which the license is subject is hereby confirmed for the purpose of diversion, limited to an amount of 6.25 cfs. and shall not exceed 1020 acre feet per year.

Dear Mr. & Mrs. Meyers:

I'm currently preparing our recommendations for your irrigation claims referenced above. I need your help to clarify some information in our files before I finish the recommendations.

First, does the well in Section 22 serve only the land in Section 22 and Section 27 and does the well in Section 23 serve only the land in Section 23? Are the wells tied together so that either well could be used to irrigate any parcel of land?

Enclosed is an infra-red aerial map that outlines in green the irrigated fields covered by the water right claims referenced above. Please review the map in detail and let me know if you agree or disagree with the boundaries. I am especially concerned about the field in the NENW, S23; the field in the Southerly portion of the SWSE, Section 22 and a field that covers part of both the SWNW & SENW of Section 23.

I am concerned that water right 51-02198 may have been enlarged from 131 acres to 149 acres when the center pivot was installed in 1981. I will not know whether you should file an expansion claim for the additional acres until I know how your entire irrigation system works. I may be able to develop recommendations using the existing claims if the total acres under all of the rights has not been expanded.

Please call me at the number below as soon as possible so that we can discuss these matters. If I do not hear from you by June 19th I will make my recommendations based on the fields outlined in green on the enclosed map.

Sincerely,

Mel Schulte

RE: A51-02151A

Dear Linda:

The above-referenced water right covers property owned by Farm Credit Bank of Spokane (FCB) in Section 23, Township 7 South, Range 4 East located on both sides of a 114 acre tract sold to Dan Mori. The well services land north of the Mori tract in the Northwest Quarter of Section 23 and land south of the Mori tract in the remainder of Section 23. Water is conveyed across the Mori tract tract from the north parcel to the south parcel by way of a surface waterway in the bottom of a natural draw. This waterway has been used since the well was licensed to convey water from the property north of the Mori tract down the hill to the fields south and below the Mori tract. Although the Mori tract was sold last year, FCB claims a right to continue to use the surface conveyance of its water from one parcel to the other across the Mori tract along the established waterway in the bottom of the draw and down the existing ditch from the mouth of the draw to the south parcel owned by FCB.

Please add remarks to this effect to the adjudication claim referenced above.
