THIS IS TO CERTIFY, that CLARENCE A. MERRICK
 of Grandview, Idaho, made application for a permit to appropriate the public waters of
 the State of Idaho, dated January 9, 1961, that Permit G-29276/51-2162 was issued pursuant
 to said application; that the proposed works were completed on or about April 1, 1965
 with a storage or carrying capacity of 8.2 c.f.s., said works consisting of
well, pump, motor, and sprinkler system, and that on October 20, 1965
 proof was made to the satisfaction of the State Reclamation Engineer, of the beneficial use of 1,106
 acre feet per season, with a maximum rate of diversion of 4.14 cubic feet per second of the waters
 of ground-water, tributary of _____,
 for the purpose of Irrigation from April 1 to October 31;
 and for _____ from _____ to _____; and for
 _____ from _____ to _____; and that the use
 of said waters has been made in accordance with the laws of Idaho, and is hereby confirmed by the State Recla-
 mation Engineer and entered in the records of the Idaho Department of Reclamation: the point of diversion is
 located in NW $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 10, T. 7 S., R. 4 E., B.M., and
 other additional points _____, in the County of
Owyhee; and that the amount of water to which such right is
 entitled and which is hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially
 used for said purposes and shall not exceed 1,106 acre feet per year.

New Telephone Number: (208.) 845-8085.
5. Date you acquired the property: _____
6. If you have acquired only a portion of the former owner's property, IDWR may need to split the water right(s) or adjudication claim(s). If this applies, describe in detail your portion of each water right or adjudication claim in the spaces below. If necessary, attach additional pages.
Number of acres you irrigate _____ Number and type of stock _____
Diversion rate in CFS _____ Number of homes _____ Other uses _____
If a water right or adjudication claim is being split and you are not sure how to identify your portion of the original right or claim, please contact the nearest IDWR office for assistance.
7. Signature of New Owner or Claimant(s): Grant Hegenhorst
(Corporations or other organizations must submit a list of directors and/or officers demonstrating authority to sign form.)
8. For Snake River Basin Adjudication Claims: Please attach a Notice of Appearance completed by your attorney, if you wish IDWR to correspond with him or her for all matters related to your claims..

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
 2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
 3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
 4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
 5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
 6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.
- Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.
7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
 8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

C. OVERLAP REVIEW

1. Overlap found, water right number/s and type of

51-02162 P/U overlap. Transfer or adjudication adjustment.

2. Overlap Analysis Narrative

This permit has an unusual overlap with the original license. The original license was irrigated from a well located in the NW/SE of section 10. Those acres included 39 acres in section 2. See attachment # 1 Exhibit A for a visual presentation. Those acres (in section 2) were traded with a well in section 10 and are no longer irrigated by Mr. Hegerhorst.

When the new well was drilled in SE/1W of section 10, acres south of P/D # 1 were added. The intention was to establish two mainlines off each well and then join the mainlines.

This was not done. A mainline from P/D # 2 runs east and supplies water to the 240 acres labeled "SYSTEM A".

Another mainline runs both east and west from P/D # 1 and supplies water to the 238 acres labeled "SYSTEM B".

2. Narrative (measurement conditions/sketch clarification/ flow calculations; include the results from any measurements.)

The system was normally operated for the field examination. The only potential problem noted was that there was some sand in the annubar after the measurement but the reading taken was considered good.

See the Supplemental Annubar attachment for the calculations giving the ~~2.98~~ cfs diversion rate.

2.09 cfs See Annubar attachment 2/21/12

3. Alternate method for checking purposes

Found 7 handlines operating @ 40 psi

Found mixed tip sizes - both 1/8 and 9/64ths.

For 9/64ths @ 40 psi the nozzle discharge = 3.74 gpm

7 hand lines * 33 heads per line = 231 heads

* 3.74 gpm

863.9 gpm/ 448.8 gpm = 1.92 cfs

$$V(d.r.) = 2.08^9 \text{ diversion rate(cfs)} * 246^{\sim} \text{ days in season} * \frac{1.9835}{\text{factor}} = 1015 \text{ AFA}$$

RE: A51-02162 & A51-07055

Dear Grant:

Enclosed are profile reports, amended claims and a GIS map that reflect the changes made to the above referenced SRBA claims. These changes are a result of the Changes of Ownerships and Notices of Error you filed on this date.

You will note that rights 51-02162 & 51-07055 are combined into a permissible place of use totalling 468 acres. As we discussed, under this concept, both rights are appurtenant to each acre and a sale of any part of the 468 acres would entitle the sold acres to a prorated share of both rights.

Please review the enclosed forms and call me at the number below if you have any questions.

Sincerely,

A handwritten signature in cursive script that reads "Mel Schulte".

Dear Mr. Hegerhorst:

I have had a chance to review the claims that were filed on your domestic/stockwater usages. I am enclosing a profile report of these claims, along with a map.

There are some corrections which need to be made. We do not have a claim on the stockyard in the NE1/4SE1/4 of section 15. Also, I am unable to add a stockwater usage to the licenses on your irrigation wells. You can still file a separate claim on these for stockwater.

If you could make an appointment to come into the office to take care of these it would be easier to verify all points of diversion and places of use. Please contact me to let me know how you would like to proceed.

Sincerely,

Linda A. Werner

RE: Claim(s) filed in the Snake River Basin Adjudication.

Dear Claimant:

The Department of Water Resources will be conducting beneficial use and water right claim verification examinations in your area beginning in June. An examination is needed to verify your water use in order to issue a water right license and/or decree.

Information on your permit or claim which may need to be verified includes source of water, type of usage, amount of water used, number of acres irrigated, and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations, which need to be completed this season, we request that you contact our office at 334-2190 within one week to make an appointment at a time convenient for you. The amount of time required to conduct these exams depends on the number of water rights you have filed. An approximate time can be given when you call for an appointment.

Although it is not mandatory that you accompany the field examiner, it does insure that an accurate description of your system will be made. If either yourself, or someone familiar with the system, could accompany the examiner it would be beneficial.

To make an appointment, or if you have any questions or problems with scheduling the exam verification, please contact me as soon as possible.

Sincerely,

Linda A. Werner
Sr. Water Resource Agent

MEMORANDUM

TO: FILE
FROM: STEVE LESTER
DATE: FEBRUARY 21, 1992
SUBJECT: REVIEW OF EXAM FOR PERMIT 51-07055

The examiner completed a thorough exam and recommendations for the permit based on changes needed in SRBA claim A51-02162. According to IDWR records, a second well was added in 1975. The 1988 exam discovered that the old well serves 238 acres in the south part of Section 10, and the newer well supplies 240 acres in the north portion of the section.

The attached page depicts the license, exam findings, exam recommendations, and possible scenario if the old license is not changed via the SRBA (which would, of course, dramatically alter the recommendations for 51-07055). Option III is the method proposed by the examiner and seconded by this reviewer. Option IV does not reflect actual irrigation practices and would result in unnecessary confusion.

The acres in SWSW S.2 must be addressed in the SRBA. Those acres are currently claimed in A51-07041 (Merrick) but may be eligible to be claimed in a split of 51-02162 with an earlier d.o.p. than 51-07041. If so, 51-02162 with a total of 316 acres minus 39 (?) acres in SWSW S.2 leaves 277 acres for the south portion of S.10. Since 238 acres are found in the south part of S.10, acres in S.2 do not complicate the recommendations of permit 51-07055.

Enough file information now exists to comfortably recommend acres and P/D's for the license and permit operating in S.10. However, note that the new season and volume map for T7S R4E shows 4-1 to 10-31 and Vr of 4.0 afa. If adopted for licensing, the following adjustment should be made.

$Vr = 240 \times 4 = 960 \text{ afa}$ vs. $Vd = 2.09 \times 214 \times 1.9835 = 887.1 \text{ afa}$.

Allow: irrigation 4-1 to 10-31 2.09 cfs 887.1 afa.

Based on the exam and review information, the permit can be licensed and the SRBA claims can be modified at a later date.
