Dear Mr. Urquidi:

I have reviewed the following claims you filed in Basin 51 and would like to give you the opportunity to look over the recommendations I am making. My hope is that if you have questions, concerns, or would like to provide any additional documentation, that we could address these issues and attempt to resolve them before the Notice of Error process.

Please take a minute to look over the following information and then give me a call before June 20, 1998. I would enjoy the opportunity to sit down and meet with you.

Recommendations for your Basin 51 claims.

- 51-00037** Recommendation: 7 acres of irrigation in Sec 15, SWSW. Diversion rate 0.21 cfs irrigation and 0.07 cfs stockwater, total diversion .21 cfs. During a field exam in 1995, it was found that the lands claimed in Sec 16 are owned by Idaho Power and managed by Department of Fish and Game.
- 51-02008** Recommendation: Disallow. This license should have been decreed during the Bruneau River Decree. No beneficial use was found and we received no response to requests for evidence of use.
- 51-02035** Recommendation: Disallow. Same as above.
- 51-02058A** Recommendation: Forfeited/Abandoned. No irrigation was found and affidavits submitted did not indicate any irrigation other than fields located along Sec 5.
- 51-02058B** Recommendation: Forfeited/Abandoned. Same as above.
- 51-02065** Recommendation: 30 acres of irrigation in Sec 5, NESE, and the SESE. Diversion rate 0.80 cfs irrigation 0.11 stockwater, total diversion 0.80 cfs. **Note, one of the point's of diversion located in the SWSE, is on BLM land.**

51-02201

51-02205

Recommendation: I have not been able to reach you regarding these rights. I am assuming from the field exams, that both of these wells can be used together to serve the lands covered under both rights. Therefore, I have created a permissible place of use for both of the rights. At any one time 177 acres can be irrigated with a total combined diversion rate of 3.27 cfs. This will allow you more freedom when operating these rights, however, if you should sell a piece of the land a portion of each water right would go with the land. These two rights will be left this way unless I hear otherwise.

51-02230

Recommendation: Stockwater Storage 4.0 AFA, Stockwater from Storage 4.0 AFA, total Diversion volume 4.0 AFA. Irrigation was licensed under 51-02058. Instream stockwatering was filed on under 51-10229

51-02252

Recommendation. Forfeited/Abandoned. Dam has not held water since at least 1972 as evidenced by 4 different dam inspections. During 1993 filed exam you indicated the lands were no longer irrigated.

51-04102

Recommendation. Disallow. No lawful appropriation shown. There was no mention of Springs in the licensing exams and we have received no response to our requests for evidence of priority.

51-10140

Recommendation: Stockwater use at a diversion rate of 0.22 cfs. No evidence of irrigation was found and no evidence of priority submitted.

51-10228

Recommendation: Disallow. No beneficial use found and no evidence of priority submitted.

51-10250

Recommendation: Disallow. No lawful appropriation shown, no response to requests for evidence of priority. These lands are covered under licensed rights, 51-02201 and 51-02205.

01/13/1997: SIV EXAM notes that this license is for the smaller of two artesian wells located within 75 ft of each other. The smaller well irrigates lands in section 21. See SIV EXAM for license 51-02205. There is some conflicting info between 51-02201 & 51-02205 as to which well serves which acres. Based on flow measurements, 51-02201 is for the smaller well. MN

01/13/1997: ASCS Field No 7 may overlap slightly from NESES.21 to NWSW S.22.21

This overlap appears to be minimal - much less than one acre.

It's assumed that the acres in the E 1/2 SE 1/4 which are licensed under 51-02201 and 51-02205 are the same acres, since they represent the acres shown by ASCS in 1987 (except for the

RESPONSE DATE: DECEMBER 24, 1993

Dear Mr. Urquidi:

As we discussed during my field visit at Grasmere yesterday, I am sending copies of previous correspondence from IDWR to you. As these letters indicate, it is most important that we receive evidence of the priority dates claimed. I cannot recommend these claims to the Court without evidence of priority. Please attend to these matters as soon as possible, as investigation of these claims will not continue until the necessary documentation of the claimed priority dates is received.

We also discussed your claims for groundwater from artesian wells located in Twp. 7S, Rge. 06E, Sec. 21. In order to investigate the earlier priority date which was claimed on these wells, documentation of the number of acres irrigated in 1914 by the original well is necessary. This documentation may be in the form of a notarized affidavit signed by a person who has personal knowledge of the number and location of the acres irrigated by the original well in 1914, or crop reports from those irrigated acres which indicated the location and number of acres.

Other documentation will assist me in reviewing claims on your property on Little Jack's Creek, and the Grasmere place (Crab Creek and Nanny Creek). Please send some evidence of the continual use of water for irrigation on these lands. Again, this documentation may be in the form of a signed notarized statement from a person with personal knowledge of the irrigation practices on those lands.

As I mentioned yesterday, and in my previous letter, the required documentation must be submitted in a timely manner. Please submit these documents by the response date shown at the top of this letter.

RE: SRBA CLAIM NOS. A51-04102 A51-10140 A51-10228 A51-10250

Dear Mr. Urquidi:

We are currently in the process of preparing the above-referenced Notice of Claims for court decree in the Snake River Basin Adjudication. On January 28, 1993, we sent a letter to you requesting evidence of priority for these claims. This evidence was to be submitted by March 15, 1993. As of today, we have not received any information regarding the priority dates claimed.

Evidence of the priority date claimed must be submitted to the Department before we can make a recommendation to the Court. Enclosed is an additional copy of the pamphlet which describes the documents that may be submitted in support of the priority dates that you have claimed.

If we do not receive the requested information by October 22, 1993, these claims will be recommended to be disallowed due to lack of evidence supporting any priority date. Please submit this supporting documentation by October 22, 1993.

We have tried to contact you by telephone in recent weeks, and have left messages on your answering machine. There are some field exams which must be conducted on your SRBA claims, including the above-referenced claims. Although it is not mandatory for you to be present during these field exams, the assistance of a person knowledgeable about your specific water uses help the Department make an accurate recommendation to the court.

Please contact me by October 18, 1993, to schedule these field exams.

I will look forward to hearing from you soon. I will be happy to answer any questions you have regarding your SRBA claims and/or the Department's requirements.

Sincerely,

Maria Minicucci
