Dear Craig:

Our records indicate Harley Ranches is the owner of permit 51-02225 which covers irrigation from Jacks Creek. It appears this permit should have been assigned to you at the same time as groundwater permits 51-07064B and 51-07102B. 51-02225 irrigates the same acres as these two rights so it appears it was an oversight to not have also assigned 51-02225.

Enclosed is an Assignment of Permit form to use for 51-02225. Please note that the signature of the person signing on behalf of Harley Ranches needs to execute the form in front of a notary public. On completion of the form please return it to my attention with your check payable to Department of Water Resources in the amount of \$25 for the filing fee. Call me at the number below if you have any questions.

Sincerely,

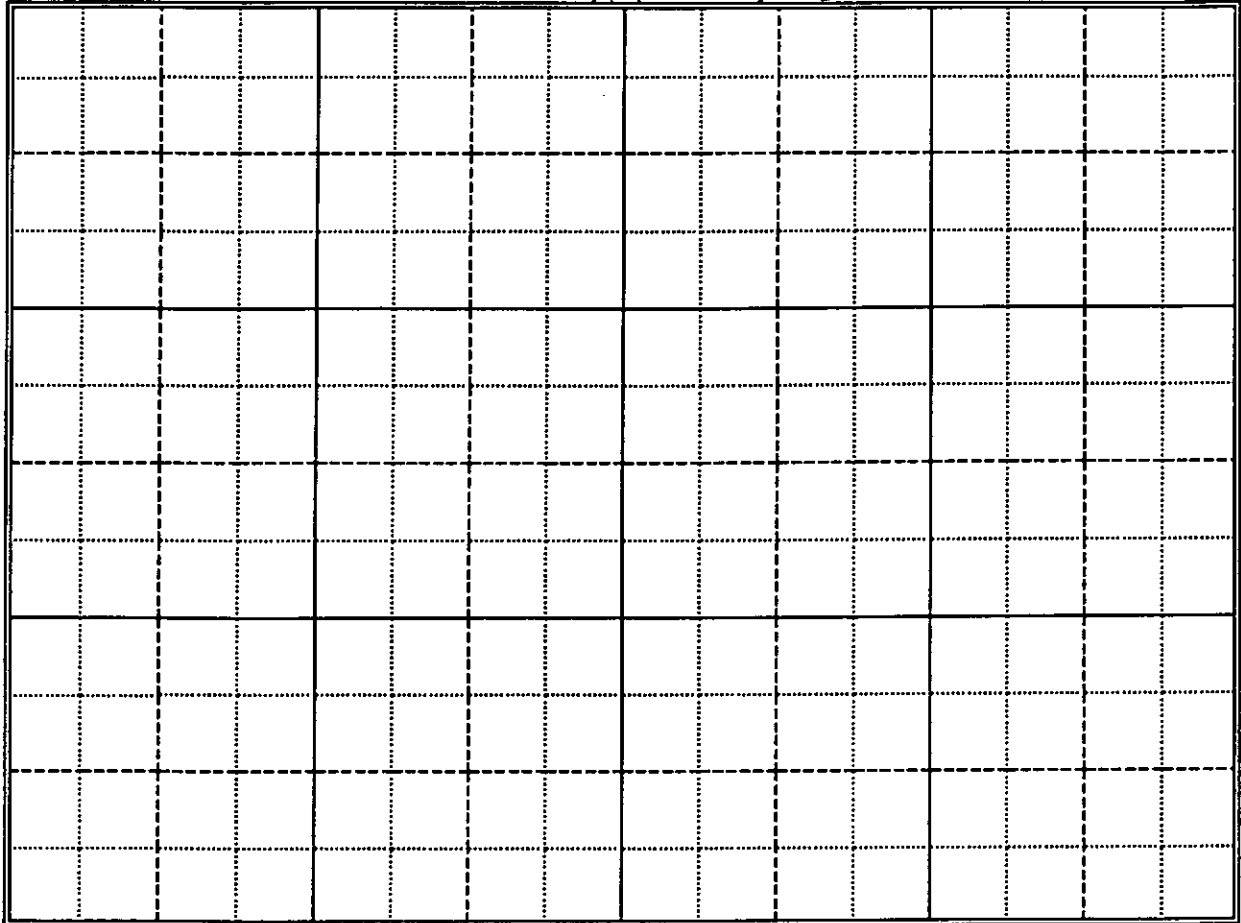

Mel Schulte

SYSTEM DESCRIPTION
PERMIT 51-02225 (A51-02225)
N/O CRAIG L. & SHERRY L. CHRISTIANSEN

A dirt dam in Jacks Creek diverts water to a dirt ditch that flows Northeast for about one-half mile where the ditch flows into a pond. The pond commingles Jacks Creek water, well water and waste water from some fish propagation ponds located to the North. The well water can be diverted directly to this pond, through the fish ponds or delivered directly to sprinkler systems used for irrigation.

Two 20 hp pumps in the pond discharge water to a mainline system that services six wheel and hand lines that total 204 heads. According to the owner, there are both 5/32 and 1/8 inch nozzles in the sprinklers and they average 4.2 gpm per sprinkler. He also indicated the 20 hp pumps develop about 60 psi at the pond.

A Mannings measurement of the ditch from Jacks Creek to the pond estimated the ditch capacity to be 105.10 cfs. This ditch and its POD serve 51-04017 in addition to this permit.

REMARKS AND OVERLAPS

51-04017 is also diverted from the same POD for this permit.
51-04017 irrigates land North and East of the POU for this permit.

51-02225 overlaps the combined places of use for rights 51-07064B and 51-07102B which are groundwater rights. When sufficient water is not available in Jacks Creek, the groundwater rights are used as a supplement. 51-02225 should be conditioned so that the combination of all rights does not exceed .02 cfs and 4 af per acre.

The initial field exam for this permit was conducted on 8/24/1993 in conjunction with the SRBA claim. A follow up telephone call to the owner, Craig Christiansen, was made on 10/10/1996 to confirm and clarify file information concerning the delivery system.

The diversion rate recommended of 1.91 cfs is based on the estimated capacity of the sprinkler system which is more realistic than the theoretically estimated rate of 1.74 cfs for the pumping system. The two estimates are within 10% of each other so the estimated capacity is justifiable.
