H. IS THE STAGE OF THE CLAIM CODED CORRECTLY?

Y(X) N()

NOTES: 06/25/1996: Evidence & priority supports use of the well for homes in Bauneau in March of 1946. See Attachment A, pgs. 1 & 2. Use changed to current nature of use in 1979 (See Attachment A, pg. 3). The license for domestic use for Bauneau has a priority date of 1976, so it appears that the claimed well has been used continuously. OA does not show sewerage lagoons (1974). Evidence was not initially solicited since the claim is for only 101 cfs. But since the lagoons (claimed use) were not present in 1974, additional information was requested (see Attachment B). 177

To whom it may concern:

I have been asked to make an affidavit as to my knowledge of the present water system used for domestic water use in the townsite of Bruneau, Idaho.

At the time the present well was drilled, 1946, I was living in the area, and was employed at the local grocery store, and can remember the well driller working to install pump and water lines to the houses of residents within the town.

My parents were some of the water users, as they owned a home and lived in the Bruneau townsite, and used water from the town well. It was used by all residents for house use and some irrigation use.

This town well has been in continued beneficial use since 1946, and I can attest to this fact.

Secretary
Bruneau Water and Sewer District
P.O. Box 275
Bruneau, Idaho 83604

Subject: Use of Town Well

Please let this be notification to the parties concerned, in 1979 or there about, the disconnected well that the town of Bruneau had used for domestic water before the current system in use had the valve opened and the flow was allowed to discharge into the sewer system by myself and Auther Miller. I was the Certified Sewer Lagoon Operator for the town of Bruneau at the time and Auther Miller was the President of the Bruneau Water and Sewer District.

The flow was discharged into the system in the summer months to aid in controlling water levels in the sewer lagoons west of town. In the summer months, water levels dropped due to evaporation from the heat. In order to reduce unpleasant odors due to low water levels in the lagoons and improve aerobic conditions in the lagoons, the well was connected into the sewer system and the natural flow was allowed to discharge through the system to the lagoons. This practice had the approval of the state governing agency that monitored the sewer lagoons, as no other water was available for this purpose.

RE: Notice of Claim in the Snake River Basin Adjudication No. A51-10038

RESPONSE DATE: MARCH 25, 1994

Dear Ms. Welch:

The above-referenced claim was submitted as a "Beneficial Use" claim; water rights of this type are established by the historical use of water for a beneficial purpose. The date the water was first used for a beneficial purpose is the "priority date".

IDWR (Idaho Department of Water Resources) is under a legal requirement to gather evidence from claimants supporting the date of priority for claims based on historical beneficial use of water. The enclosed pamphlet, "Evidence of Priority", explains what type of documentation may constitute proof of the claimed priority date. Please submit evidence of the claimed priority date of this claim by the response date at the top of this letter.

The initial investigation of your claim also indicates that there has been a change in the purpose of use of the claimed water right from the previous purpose(s) of use. The new purpose of use, as listed on the claim, is Water Quality Improvement Storage.

A water right owner who has made a change in use of a water right prior to commencement of the SRBA without obtaining IDWR approval may claim the change the SRBA. IDWR may recommend the right as changed, however, only if the change meets certain requirements. One of those requirements is that the change not result in injury to other water rights, or that the change be conditioned to prevent injury to other water rights.

Before IDWR may recommend your claim, you must provide IDWR with the date of change in the purpose of use, and some evidence tending to support that date. Please submit evidence of the change in purpose of use by the response date at the top of this letter.

In conclusion, IDWR requires evidence for two dates. One date is the priority date (the date this water was first put to a beneficial use). The other date is the date the nature of use of this water was changed to water quality improvement storage. If no evidence is submitted, your claim may not be recommended to the Court for decree.
