A51-00115. Cherry cr.

Claimant showed a decrease of 181 acres from what was originally decreed. Filed on same quantity.

He showed me, on map, where the POD's are located. We discussed P.O.U. & the P.O.U. run on 87 Napp accurately represent the P.O.U.

A51-10344 & A51-10202

10344 is a combination of 4 decreed rights. 10202 is for high water w/ the same POD's & POU as on 10344. Chet said he needed the excessive flow at the beginning of the season because the lower lands, (most southern), are gravelly & need the extra water to saturate the soil so the decreed amounts can be beneficially used.

Claimant showed me, on map, where the POD's are located. On his claim he added Spring cr. & Springs as sources. The main spring, which was measured, is the only

one that does not rise up in the creek.

This spring will flow into Spring cr. or can be diverted to a ditch. This spring may need a separate claim & if it was not included in decree will require a priority date after decree date.

There are 4 separate POD's on Spring cr. The POU hatch marked on map are supplied by this & may also overlap w/ Big Flat cr. A separate claim may be needed for this as the spring above.

All POD's have been used for 20 yrs. since they bought the property & possibly before as they did not change anything. Same w/ P.O.U.

The POD's visited are the spring & POD's 1, 3 & 5. ^(POD's)
