CONDITIONS OF APPROVAL

- a. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.
- b. The right to the use of the water hereby confirmed is restricted and appurtenant to lands or place of use herein described, and is subject to all prior water rights, as provided by the laws of Idaho.
- c. Any water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water other than hydropower, within the State of Idaho initiated later in time than the priority of this license.

Measurement Calculations

Field Measurement Calculations (Include theoretical capacities and system capacity)

THEORETICAL FOR PUMP IN WASTE DITCH

$$\frac{1/2 \text{ HP} \times 8.8 \times 80}{10' \times (80 \text{ ft} + 45 \text{ ft})} = \frac{3.52}{125} = 0.028 \text{ (cfs)} \quad \text{(1000 lbs)} \quad \text{(1000 lbs)}$$

3/4" PIPELINE FROM SPRING MAINLINE (NOT WASTE DITCH) MEAS

1/2 GALLON FLOW + WASTE WAS 76 GALLONS IN 1 MIN.

1/2 GPM + 1/2 GPM = 0.01 cfs for heating portion

WASTEWATER IN DITCH FILLS A 6" PIPE APPROX 1/2 FULL
THIS IS AT LEAST 1/2 GPM (PERMIT AMOUNT)
= 0.10 cfs

b) Volume Calculations for Irrigation:

$$V_i = \text{Acres Irrigated} \times \text{Irrigation Requirement} = 1 \times 3.0 \text{ AF/A} = 3.0 \text{ AF/ANNA}$$

$$V_d = [\text{Diversion Rate (cfs)}] \times (\text{Days in Irrigation Season}) \times 1.9835 = 1.9835 \times 8.5 \text{ AF/ANN} = 16.86 \text{ AF/ANN}$$

c) Analysis:

WHICH GOES

* 12/10/84
After discussing adding the source
spring to the permit with State Office
personnel it was decided that it
should not be added. Since the
spring system is a different system
than the wastewater system and Mr.
Jordike had no intention of includ-
ing it on the permit it cannot now be
included.

RE: Interference with Delivery of Water under Claim No.
A51-10220

*Copy for claim file
original letters from OCrowley in complaint file*

Dear Ms. OCrowley:

I have received your letters dated 12/06/96 and 12/13/96, in which you describe actions taken by Mr. Olivas to interrupt your domestic hot water supply. I have also reviewed the report filed by Owyhee County Deputy Jim Bish, after his visit to Murphy Hot Springs. In this response, I intend to clarify the position and authority of the Idaho Department of Water Resources (IDWR) on this matter, and to advise you of the actions you may expect from this office.

Presently, there have been three separate issues identified at Murphy Hot Springs. They are:

- the interruption of domestic hot water at the OCrowley residence;
- allegations of appropriations by Mr. Olivas for a commercial bottled water facility without a water right permit; and,
- allegations of appropriations by Mr. Olivas for irrigation without a water right permit.

The department must consider each of these issues separately. On a separate page, I have provided a brief summary of the water rights or water right applications involved. Please refer to this summary during the following discussion.

IDWR will take the following actions with regard to the above issues:

The interference in delivery of your domestic hot water supply is a civil matter over which IDWR has no jurisdiction. IDWR's regulatory power is limited to those situations where an unauthorized diversion has been documented, or where there exists an enforceable delivery order. IDWR has no authority to regulate competing private diversions from a shared pipeline, even if one water user is in a controlling position. If a mutually agreeable delivery arrangement cannot be made between two parties, settlement must be sought through the local courts. In this case, the Olivas right A51-04037 is the senior right in the shared pipeline. In times of water shortage, the senior right must be satisfied before your right A51-10220 is diverted. Diversions under the new

commercial application 51-07362, if approved, would be junior to your right.

If Mr. Olivas is making a commercial diversion to a bottling plant in advance of the approval of his water right application no. 51-07362, IDWR could issue a cease and desist order against that illegal diversion. We could not stop the historical diversion under A51-04037. At this point, an illegal diversion is being defined by IDWR as any bottled water product being sold off the premises or not in specific connection with the on-site business. However, IDWR cannot and will not take action unless it is clearly evidenced that Mr. Olivas is actually making an illegal diversion. Presently, there is not sufficient evidence that Mr. Olivas is operating a commercial bottling plant. The Southwest District Health Department (SWDH) also has regulatory authority over this type of facility and has taken no action for the same reason. SWDH and IDWR would work together to issue simultaneous violations on this alleged facility if enough evidence were available.

During a field inspection in 1994, an IDWR staff member witnessed the irrigation of two small areas on the Olivas property. In one area, flows were diverted from a cold water spring source, and in the other, flows were diverted from the hot pool overflow. No irrigation is authorized under the existing Olivas right. Applications have been filed for both these uses. As explained above, IDWR could issue a cease and desist order to stop irrigation which is occurring without a valid water right permit. Because the 1996 irrigation season is now over, we will not investigate this particular matter at this time. However, if irrigation continues in the 1997 irrigation season, and the water right permits have not been awarded, Mr. Olivas would be subject to cease and desist action by IDWR.

Short of legal action, one method available to you to influence and protect the distribution of your water rights is to become active in the processing of the Olivas applications for permit. During advertising of all new applications, protests may be received from parties who feel they might be injured by the approval of the new right. Protestants have the opportunity, through department facilitated conferences, to contribute to the decision-making process. In some circumstances, new permits may be issued with specific conditions of use which are designed to protect existing rights, and which might then be administered according to Idaho law.

The Olivas rights have not yet been advertised. If you would like to protest, you may do so now or during the advertising period. However, once advertising occurs, there will be a deadline for the receipt of protests. I have enclosed protest forms. I have already forwarded copies of the applications.

RE: Murphy Hot Springs - Matt Olivas.

MS. O'Crowley phoned to report that Matt Olivas has interrupted her hot water supply with no intention of releasing any flow. I advised that she needs to submit a formal letter of complaint to IDWR. MS. O'Crowley went on to say Olivas had threatened her life - I advised that was a matter for local authorities.

We discussed IDWR's jurisdiction w/ respect to water right interference. She seems to expect a rapid resolution, which I cautioned was not likely without giving Mr. Olivas due notice. I again advised she invite the local authority (deputy or sheriff) to visit and perhaps they would be willing to send some statement to us as evidence? ... thus eliminating need for our staff verification which would not happen anytime soon.

Things are otherwise no different from what we already know about this situation, namely, that several parties are alleging the illegal sale of bottled water by Olivas, but no one has been able to supply any hard evidence to either DEQ, IDWR or local Sheriff.
