TO: Mr. Dave Shaw, Western Division, Department of Water Resources
FROM: Mr. Sherl L. Chapman, Consultant
DATE: January 27, 1984
SUBJECT: Certified Water Measurement For Permit #51-7154

Please accept this certified water measurement made in behalf of Mr. Donald P. Pancoast, Jr., P. O. Box 32, Hammett, Idaho 83627, for application for permit 51-7154. I measured Mr. Pancoast's system on May 3, 1983 and found the following equipment operating. A General Electric 460 volt, three phase, 25 horsepower, centrifugal pump and motor, motor model #5K256JL1011A which was equipped with a Berkeley pump head, serial #8153228. The system had been operating in excess of eight hours pumping water from a pond into an enclosed sprinkler system. Operating pressure during the measurement was 72 pounds per square inch determined at the measuring point which is in a straight section of the discharge assembly.

The measurement was made with a Colling air/water manometer using standard measurement procedures. The water produced at the time of measurement was 499.5 gallons per minute or 1.11 cubic feet per second. The Berkeley pump, in place, rated at 450 gallons per minute at 170 feet total dynamic head which correlates well with the measurement. The waste water pond which served as a collection point for the water pumped is also a part of the application for permit which requests 20 acre feet for storage. Measurements taken on the pond show it to be approximately 300 feet square with a 100 x 100 foot section taken out of the overall pond demensions. A drawing of the pond is enclosed with this certified water measurement. The pond ranges in depth from the bottom to the water surface at full elevation from approximately 5 feet at the inflow to 9 feet at the outflow. Average depth is calculated to be 7 feet. Based on the above measurements, it is calculated that the pond when it is full holds 12.85 acre feet which is requested to be licensed for this permit.

Permit 51-7154 requests 1.4 cfs for diversion for irrigation purposes and 20 acre feet of storage for irrigation purposes. The land to be irrigated totals 70 acres. The measurements taken show the storage and diversion rate to be well within the statutory requirement of one miners inch per acre and it is requested that permit 51-7154 be licensed for 12.85 acre feet of storage and a diversion rate of 1.11 cubic feet per second.
