RESPONSE DATE: MARCH 15, 1995

Claim No: A55-02029

Dear Shirley Cox,

In my investigation of this claim it appears that there has been a change in the point of diversion from that which was shown on the original water right.

The original water right shows the points of diversion in the SE 1/4 of the SW 1/4, Section 32, Township 06S, Range 02W and in the NE 1/4 of the NW 1/4, Section 05, Township 07S, Range 02W. The current points of diversion are shown in the SE 1/4 of the SW 1/4, Section 32, Township 06S, Range 02W (OK as claimed) and the changed point of diversion is located in the: SW 1/4 of the NW 1/4, Section 05, Township 07S, Range 02W.

A change in the point of diversion of a water right can be recommended only if certain requirements are met. One requirement is that the change must have occurred prior to the commencement of this adjudication, November 19, 1987. The other requirement is that this change cannot result in an injury to other water rights.

Before your claim can be recommended to the court you must provide to this Department with the date this change occurred and some evidence to support that date.

If the change was prior to November 19, 1987, then you must include the month, day and year. If the change occurred after November 19, 1987, then a specific date is not necessary and you need only support that the change occurred after November 19, 1987. However, any change after November 19, 1987 the person desiring to make such change of point of diversion, shall make application for change with the department of water resources under the provisions of section 42-222, Idaho Code.

Types of evidence to submit can include statements from neighbors who knew of the change, relatives, watermasters, ditchriders, etc. If none of the above can be found, your notarized statement that you made the change or witnessed it may satisfy this requirement.

If the requested information is not received by the response date shown above, then the new point of diversion may be disallowed and no recommendation will be made for those irrigated acres that this point of diversion can only irrigate.

Thank-you for your cooperation. If you should have any questions, or feel that you need help in any way, please contact me.

Sincerely,

Ron Howerton

RE: Claims filed in the Snake River Basin Adjudication

Dear Claimants: *CLAIM NO. 5 - ASS-02029, ASS-02434,
ASS-10094 & ASS-10095 - Dwyer Co.*

The Department of Water Resources will be conducting beneficial use and water right claim verification examinations in your area beginning in June. An examination is needed to verify your water use in order to issue a water right license and/or decree.

Information on your permit or claim which may need to be verified includes source of water, type of usage, amount of water used, number of acres irrigated, and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations, which need to be completed this summer in your area, we request that you contact our office at (208)334-2190 within two weeks to make an appointment at a time convenient for you. The amount of time required to conduct these exams depends on the number of water rights you have filed. An approximate time can be given when you call for an appointment.

Although it is not mandatory that you accompany the field examiner, it does insure that an accurate description of your system will be made. If either yourself, or someone familiar with the system, could accompany the examiner it would be appreciated.

In some cases, the date of priority claimed also needs to be verified. Letters were sent to some claimants notifying them that evidence of the date of first use of their water right(s) was required. If you received one of these letters and have questions, we can address those during our examination.

To make an appointment, or if you have any questions or problems with scheduling the exam, please contact one of the following water resource agents:
