RE: NOTICE OF CLAIM NUMBERS A55-04028 AND A55-04029

Dear Mr. Quintana;

We are currently in the process of preparing the above referenced Notices of Claim for court decree in the Snake River Basin Adjudication (SRBA). During this process certain questions arose concerning the claims listed above. They are as follows:

A55-04029

Jordan Creek & Duck creek

If you will recall, this is the claim which was amended to include the Duck creek diversion. The priority date claimed is June 1, 1884. The affidavit submitted to support Duck creek usage supports a priority date of 1932.

When I did the field exam on July 8, 1993, we discussed the dirt dam on Duck creek and you indicated that the dam was there to keep the ditch water from Jordan creek from infiltrating Duck creek. Is this, in fact, the case? If so, it will not be necessary to claim Duck creek water, as it is not actually used for irrigation purposes.

** Some Has Used*
If Duck creek water is used to irrigate, you may want to file a separate claim for Duck creek with the priority date of 1932, unless you have information to support the earlier first usage date of 1884. *Claimant States that priority date for Duck cr is the same as for Jordan creek which is 1884.*

A55-04028 & A55-04029

Place of Use

The field exam results show that there are some lands irrigated which may be under ownership by the state or by the BLM. From the maps and land usage description you sent us, it appears they are located in T6S, R5W, Section 26, NENE, NESE, Section 25, SENW, and Section 36, NENE. Also T6S, R4W, Section 31, NENW.

** As told to me by Tom Quintana, in my office. I didn't write down the day he was in 5-1-95. L.R.W.
(It was between 4-5-95 & 5-1-95.)*

4/5/95
Page 2

These lands are shown by a gold * on the map I am enclosing. Are these entities aware of the irrigation on these lands?

We do not have a claim for irrigation filed by either the BLM or the state of Idaho. Would you like to amend your claims to include these lands? ~~NO~~ If you would like to claim irrigation of these lands you may do so. You may want to keep in mind that there could be an objection filed by the owners if you choose to file on these lands. Also, the priority date of 1884 would apply to these lands as well as the original claimed property so the first usage date will also need to be considered.

I am enclosing a copy of Notices of Claim A55-04028 and A55-04029. If you would like to amend the number of acres to include the above lands, you can use these claims. I have highlighted the BLM acreages in green. Also note that I have included the number of acres I found for each quarter, quarter section claimed. The total acreage on claim number A55-04028 is increased when the BLM land is included. This may increase the total quantity so I have also increased the water quantity on this claim. See item six. The acreage quantity on claim number A55-04029 is decreased slightly, along with the water quantity. However, I will still need an amended claim for the BLM ground.

I have included the enclosed map for your review. If there is something you do not agree with, be sure to contact me. If you would like to amend these claims, initial and date by the changes indicated. Please have these claims notarized. *He reviewed the map which outlines my findings in re. to irr. lands & agreed to that which is shown.* Please respond, to my attention, by the date shown at the top of the letter whether you would like to amend these claims or if you have any other questions or comments.

Sincerely,

Linda A. Werner
Sr. Water Resource Agent
Adjudication Section

Enclosure: Map
Notice of Claim numbers A55-04028, A55-04029
Blank Notice of Claim form with instructions

*His grand parents bought it in 1932 & water has been used that way since he can remember it. (i.e. Ducker & Jordan cr.)
Relating to unowned irr. property: BLM is aware of this, some areas wet as a result of ditch spillover, total "other" acreage is approx. 5 acres.*

RE: NOTICE OF CLAIM NO(S): A55-04028, A55-04029

Dear Mr. Quintana;

I am writing in regard to the findings of the field exam that was done on July 6. There are some changes I found while in the field for which I need verification before I can add the recommendations to your claims. Some of these have already been discussed.

There are some differences in diversion locations between what was originally filed on your statutory claim, the adjudication claim and what I found in the field. They are the same diversions that I plotted while out in the field. Has there been a change in the points of diversion? If so, when did the change occur?

The Duck creek diversion can be added to your existing claim, however, I need some type of evidence affirming that the date of first usage was the same as the Jordan creek diversion.

Types of evidence that may satisfy this requirement can include statements from neighbors who knew of the usage, documentation from an agency such as ASCS or a notarized statement from yourself stating that you are familiar with the prior usage.

Regarding the inclusion of the BLM lands on your claims-at this time we are not recommending the addition of these lands without an agreement with the BLM. Please send me a copy of your warranty deed so I can more accurately distinguish between your land and the BLM's.

Please send this information to my attention as soon as possible. I will need this information before I can make the final recommendation on your water rights.

Feel free to contact me if you have any questions.

Sincerely,

RE: Claim(s) filed in the Snake River Basin Adjudication.

Dear Mr. Quintana;

The Department of Water Resources will be conducting beneficial use and water right claim verification examinations in your area beginning in June. An examination is needed to verify your water use in order to issue a water right license and/or decree.

Information on your permit or claim which may need to be verified includes source of water, type of usage, amount of water used, number of acres irrigated, and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations, which need to be completed this season, we request that you contact our office at 334-2190 within one week to make an appointment at a time convenient for you. The amount of time required to conduct these exams depends on the number of water rights you have filed. An approximate time can be given when you call for an appointment.

Although it is not mandatory that you accompany the field examiner, it does insure that an accurate description of your system will be made. If either yourself, or someone familiar with the system, could accompany the examiner it would be beneficial.

To make an appointment, or if you have any questions or problems with scheduling the exam verification, please contact me as soon as possible.

Sincerely,

Linda A. Werner

Dear Mr. Quintana:

In light of all the snow we've received the past couple of days, I would like to wait until next spring to do the field exams of your systems on Boulder Creek and Jordan Creek. I hope this doesn't cause you any problems. Your claims are in good order and you don't need to worry about your examinations not being completed yet. It's up to us to get the exams done and our recommendations to the court. I'll contact you next spring and we'll set up a time to get these done.

If you have any questions in regard to your claims, please feel free to contact me.

Sincerely,

RE: Claims filed in the Snake River Basin Adjudication

Dear Claimants:

*CLAIM NO. 5 ASS-04028 WYHKE
ASS-04029 Co.*

The Department of Water Resources will be conducting beneficial use and water right claim verification examinations in your area beginning in June. An examination is needed to verify your water use in order to issue a water right license and/or decree.

Information on your permit or claim which may need to be verified includes source of water, type of usage, amount of water used, number of acres irrigated, and legal descriptions of the point of diversion and/or place of use.

In order to expedite these field examinations, which need to be completed this summer in your area, we request that you contact our office at (208)334-2190 within two weeks to make an appointment at a time convenient for you. The amount of time required to conduct these exams depends on the number of water rights you have filed. An approximate time can be given when you call for an appointment.

Although it is not mandatory that you accompany the field examiner, it does insure that an accurate description of your system will be made. If either yourself, or someone familiar with the system, could accompany the examiner it would be appreciated.

In some cases, the date of priority claimed also needs to be verified. Letters were sent to some claimants notifying them that evidence of the date of first use of their water right(s) was required. If you received one of these letters and have questions, we can address those during our examination.

To make an appointment, or if you have any questions or problems with scheduling the exam, please contact one of the following water resource agents:
