MANNING EQUATION CHANNEL CAPACITY RESULTS

08-20-1993

File Number: A55-04043
Claimant: TED PAYNE
Channel measured: CHIQUITA CREEK DITCH
Date of measurement: 8/18/93
Measurement location:

Calculation prepared by: LINDA WERNER
Comments about the measurement:

The results of the calculation are:

- The length of the channel measured is 128 feet.
- The upstream and downstream rod readings are 3.87 and 5.96 feet.
- The channel cross section is 1.53 ft-sq.
- The wetted perimeter is 4.21 feet.
- The hydraulic radius is 0.36 feet.
- The slope is 0.0163
- The roughness coefficient is 0.0550
- The flow velocity is 1.760 ft/sec.
- The rate of flow is 2.69 cfs.

RE: NOTICE OF CLAIM NO[S]: A55-04041, A55-04042, A55-04043

Dear Mr. Payne:

We are currently in the process of preparing the above referenced Notice(s) of Claim for court decree in the Snake River Basin Adjudication. During this review certain questions arose concerning the claims listed above. The following claims require the information or changes listed:

A55-04041, Squaw creek

This claim was originally filed without a stockwatering usage. I can recommend stockwater usage during the irrigation season at the amount of water used by 600 head of cattle which is 0.14 cfs. However, I cannot increase the total amount of water originally claimed which was 0.38 cfs. I found 17 irrigated acres rather than 19 acres. The recommendation would be for 0.34 cfs for irrigation plus 0.14 cfs for a total of 0.38 cfs. This limits the stockwatering usage to the irrigation season only. If the stock are drinking from the creek during the non-irrigation season you may want to file a Notice of Claim for instream stockwatering. I will enclose one along with a copy of the map which will help you to determine the location of the places of use.

Also, I found that there was a license issued for irrigation from Squaw creek and Elderberry spring. This license is *Not Claimed* numbered 55-02071, has a priority date of March 16, 1916 and covers land in section 13, T10S, R6W. The problem is that the field exam (which was done in 1920) and the proof of completion of works and proof of application of beneficial use shows that the land irrigated is in portions of section 19 which is where your irrigated land is located. You have the option of filing a claim on this if you like. The information in the file supports the irrigation in section 19 rather than section 13. However, the statutory claims that have already been filed cover the irrigation of all your lands from all three sources.

/A55-04042, Elderberry spring

The affidavits you submitted as evidence of the priority date were incomplete in that they did not support a first usage dating back to 1896. They also did not refer to the power usage. I have documents relating to the above license (55-02071) which do mention usage from the spring back to 1911 and usage from Squaw creek back to 1916 for irrigation. These are the two dates I am recommending as priority for the spring and the creek.

I am unable to recommend the power usage on your claim without any documents supporting this usage. If the power generation was added to the spring at a later date you may want to file an additional claim, with evidence of first usage, for the power generation. If you feel that the above dates are inaccurate and that the usage began as early as 1896, please submit further documentation to support this.

Also, I have checked the records here at the region and at the state office and there is nothing there relating to the power plant which will assist me in making a determination as to the water quantity. If you would like to include power generation on your claim, please send me the following information:

1. Horsepower of the pump.
2. Rated flow in cubic feet/second (if known).
3. Head in feet. This is the distance of fall between the pumping plant and the generator. 15' from top of H₂O to bottom of ditch. 12" pipe through m. out 10" tailpipe discharge to ditch

/A55-04043, Chiquita creek

The evidence of priority submitted for this claim only supported a date of first usage of 1935. The information in the above mentioned license file did not refer to a usage from this creek when the field exam was made in 1920 on Squaw creek and the spring. Because of this I am unable to recommend a priority date earlier than 1935. If you have information supporting an earlier date please feel free to submit it.

Also-when the early statutory claim was filed it included only 7 acres of irrigation with 0.14 cfs of water. You claimed 19 acres in the adjudication and I found 15 acres during the exam. The ditch measurement yielded a ditch capacity of 2.69 cfs or 134.5 inches. Is 15 acres and 0.30 cfs a more accurate representation of the early irrigation?

If so, your claim will need to be amended to reflect this amount and we will need further evidence to support the increase in acreage and flow back to the date of first usage. The stockwater usage can be added to your claim during the non-irrigation season as long as the total flow is not increased.

Grave creek

We do not have any record on file of an irrigation usage from Grave creek. A Notice of Claim to a Water Right should be filed for this usage. Without a claim the usage will not be decreed in the Adjudication. I will enclose a claim form. We will also need proof of usage back to the priority date you will be claiming.

The ditch capacities from the sources measured during the exam are as follows:

Squaw creek

82" from the first ditch and 415" from the second ditch.

Spring

696.5" from the first ditch and 379.5" from the second.

Chiquita creek

134.5"

Grave creek

389.5"

There will be additional filing fees on any new claims that you file. The instream-stockwater claim will be \$25.00, the claim for power generation will be \$50.00 and the claim for Grave creek will be \$50.00. There will be no variable fee as the acreage fees were paid under the previous claim filings along with the kilowatt fee for the power generation from the spring. The fee you paid was for 7 1/2 kilowatts. I assume this is correct.

Please contact me if you have any questions regarding the information in this letter, or if you need assistance in completing the claim forms.

Sincerely,

Linda Werner
Sr. Water Resource Agent

RE: Claim No(s): A55-04041, 04042

04043

CECIL D. ANDRUS

GOVERNOR

R. KEITH HIGGINSON

DIRECTOR

JORDAN VALLEY OR 97910

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no license, decree or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of first use, or "Priority Date", for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement. While we encourage you to read the entire pamphlet, we would like to direct your attention to the right-hand half of this pamphlet once you open it. There you will find information concerning the evidence requirements mentioned above. The other sections describe to you why this evidence is necessary.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, cannot be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the above claim(s) have been or soon will be conducted by Department personnel.

Please submit the required evidence supporting the priority date(s) by August 1, 1991, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact a water resource agent in this office.

Sincerely,

Jan Shurte
Water Rights Supervisor
Adjudication Section
