New Telephone Number (208) 278-3298
5. Date you acquired the property 1967 - undivided 1/2 interest
6. If you have acquired only a portion of the former owner's property, IDWR may need to split the water right(s) or adjudication claim(s). If this applies, describe in detail your portion of each water right or adjudication claim in the spaces below. If necessary, attach additional pages.

Number of acres you irrigate _____ Number and type of stock _____

Diversion rate in CFS _____ Number of homes _____ Other uses _____

If a water right or adjudication claim is being split and you are not sure how to identify your portion of the original right or claim, please contact the nearest IDWR office for assistance.

7. Signature of New Owner or Claimant(s) Sharon E. Mikesell

(Corporations or other organizations must submit a list of directors and/or officers demonstrating authority to sign form.)

8. For Snake River Basin Adjudication Claims: Please attach a Notice of Appearance completed by your attorney, if you wish IDWR to correspond with him or her for all matters related to your claims..

* This change adds Sharon E. Mikesell as an owner. It does not replace the former owner/claimant.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights. Required claims may be filed by a new owner.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. Please contact your nearest IDWR office, or call 1-800-451-4129, if you would like more information or need help completing this form. Please attach additional sheets to the form if you require additional space to describe or explain any of the items on the form.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believes there are water rights for the property but the numbers are unknown, you may wish to contact IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector 'and', 'or', or 'and/or'. If an 'and' is used, all parties must sign this form. If an 'and/or' or 'or' is used, all parties may sign. However, only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. You may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

FROM: MEL SCHULTE *MS*

DATE: APRIL 2, 1998

RE: OWNERSHIP CHANGES, NOTICES OF ERROR, BLM LAND, AMENDING CLAIM A55-10019.

On April 1, 1998 during a meeting in our office the above referenced items were discussed with Sharon Mikesell, Sheryl Anderson and Gertrude Anderson.

An ownership change supported by a 1967 Gift Deed was filed by Sharon E. Mikesell which indicates she owns an undivided one-half interest in the land appurtenant to the above claims. Her ownership was orally confirmed by Sheryl Anderson, widow of James Anderson, and Gertrude C. Anderson, mother of James Anderson and a grantor in the 1967 Gift Deed.

The second ownership issue discussed relates to the death of James Anderson on 2/26/1998. I informed them we would leave his name on the claims until a probate of his estate is opened in Idaho and we are provided with estate documentation. We will then add an estate designation to James Anderson's name. Sheryl indicated she would not have an opportunity to start a probate until some time in May 1998.

Based on Sharon Mikesell's ownership interest, I allowed her to amend claim A55-10019 by adding a stockwater component. The circumstances relating to the use of water for stock on the Anderson ranch justifies this amendment.

We reviewed the place of use for all of the claims and based on their collective knowledge of how the irrigation systems are used they found several small changes to make in the final recommendations. They also agreed with our findings that the NENE, Section 24 is BLM land and they do not want it included in their recommended claims. They don't think there has been any irrigation of this land in the past which they said should be supported by the location of the delivery ditch.

I informed them that Jim Anderson failed to file an SRBA claim for license 55-02122 which provided for irrigation in the SW 1/4, S19. Gertrude Anderson recognized this license as the Amy Maher right and said they have not irrigated that land for many, many years. They agreed there was no intention to resume the use of this right. When I informed them this water right will be lost, they agreed there was no need to file a claim and did not object to losing the right.

FROM: MEL SCHULTE *MS.*

RE: PRIORITY DATE INFORMATION

The priority date claimed is 4/1/1923 for a use described as Irrigation Storage and Irrigation from Storage. The reservoir used for storage is regulated by IDWR and is known as Juniper Reservoir and Anderson Reservoir. The dam safety file indicates it has a capacity of 260 acre feet. Despite the fact it does not have a storage component, water right license 55-02122 was issued as the supporting right for construction and use of the reservoir. The following documents in the dam safety file and water right file 55-02122 support the reservoir having been constructed and used in 1923.

1. Affidavit of Holder dated 9/12/1923
2. Deposition of Holder dated 10/6/1924
3. Deposition of Holder dated 10/6/1924
4. Report of Engineer dated 6/24/1925
5. Dam Summary Sheet for dam number 2122
6. Certificate of Completion of Works by Commissioner of Reclamation dated 9/25/1923

The Application for Permit for 55-02122 was approved with a priority date of 9/18/1922 which indicates construction of the reservoir was authorized by the State to begin in the Fall of 1922. This fact combined with the documents listed above is sufficient to support the subject reservoir was finished and used in time for the 1923 irrigation season and sufficient to support a 4/1/1923 priority date.

SYSTEM DESCRIPTION: DESCRIBED BELOW (), SEE LICENSE FILE (), OR SEE ATTACHMENT ()

Water diverts from Jumper Creek into a ditch flowing to the southwest for about $\frac{3}{4}$ of a mile. A concrete headgate can divert water to a ditch flowing West to Hardisty Res. or SW to the Anderson Reservoir. From Anderson Res water is released into another ditch flowing SW about a mile to the place of use.

Anderson Reservoir = 260 AF

Gardisty Reservoir = 180 AF

440

Mannings diversion rate = 11.42 cfs.

Anderson (A55-10019) Res. = $260/440 \times 11.42 = 6.75$ cfs.

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no license, decree or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of first use, or "Priority Date", for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement. While we encourage you to read the entire pamphlet, we would like to direct your attention to the right-hand half of this pamphlet once you open it. There you will find information concerning the evidence requirements mentioned above. The other sections describe to you why this evidence is necessary.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, cannot be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the above claim(s) have been or soon will be conducted by Department personnel.

Please submit the required evidence supporting the priority date(s) by August 1, 1991, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact a water resource agent in this office.

Sincerely,

Jan Shurte

Dear Mr. Anderson:

SUBJECT: Notices of Claim to a Water Right numbered
A55-10019 and A55-10022

In the past, you submitted the above referenced claims in the Snake River Basin Adjudication. These claims were filed based on a "Beneficial Use". Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date".

Your claim has not been confirmed by a previous filing with the Department of Water Resources since there is no license, decree or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of first use, or "Priority Date", for claims based on historical beneficial use of water. Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement.

Please be advised that this is our second request for this information. Our first request was made on June 28, 1991. If no evidence is submitted, or we do not hear from you within the time limit below, your Notices of Claim cannot be recommended to the Court for decree.

Notice of Claim number A55-02012B

You also submitted the above numbered claim for irrigation and stockwater usage. This claim is based on a right which was originally licensed for irrigation and domestic usage. When you filed this claim in the Adjudication you changed the domestic usage to stockwater usage. When did the first stockwater usage occur? Where are the stock located and during what times of the year are they in that location?

Also, please send me specific information regarding your conveyance system. Is water being conveyed through Dougherty creek? Is the conveyance ditch manmade or a runoff stream? Has the Dougherty creek channel ever been altered?

12/20/94

Please return the above information within 30 days of the date of this letter. I am in the process of writing up the field exam information for claim recommendation in the SRBA. Your prompt response will be appreciated and will ensure accurate representation of your claims.

Substance of Communication Claimant called & we discussed the claims he had filed, & the license, no. 55-2122, which has not been claimed. He wanted to know how long he had to respond. I said probably 3 or 4 months, but not to procrastinate because I already had his claims recommended based on their non-submittal of priority evidence. He asked when is the best time to meet w/me (after I suggested he come in person). I told him Fridays as that is my office day. I asked did he want to make an appointment now & he said "no" as he's moving out now, but he will call me.

Dear Sheryl:

After the meeting in our office on April 1st, I made the additions and amendments necessary to reflect the changes we discussed. Listed below are copies of various documents enclosed with this letter that describe the changes I made.

- 1) Copies of the original claims that now show Sharon Mikesell as one of the claimants. Later after an Idaho probate is open for Jim's estate, we will add the term "Estate of" to his name. A55-10019 also describes the amendment to add a stock water component to the claim. These forms show the SRBA claim record as it was originally filed or amended before our recommendations.
- 2) A copy of the "Notice of Change of Water Right Ownership" form that is the basis for adding Sharon's name to the claim records.
- 3) Two copies of revised maps that total 102.5 acres. The adjustments I made to the field borders increased the total acres from 90 to 102.5 acres.
- 4) Copies of "Adjudication Claim Profile Reports" R55-10019 and R55-02012B that describe the changes I made in our recommendations for the increased acres and adding stock water as a component to A55-10019. These reports describe how A55-10019 and A55-02012B will be reported to the SRBA court.

Please note that I did not make any changes for A55-02122 which is the unclaimed right we discussed. Because it technically is not a Snake River Basin Adjudication claim it is not necessary to make any changes to our records.

Please review the enclosed documents and call me at the number below if you have any questions. I appreciate the assistance you are providing to help us insure that accurate recommendations will be reported to the SRBA court.
