RE: RECOMMENDATIONS

This water right was applied for after commencement of the SRBA (12/1/1987) and was licensed in June of 1990. The original claim submitted on this water right changed the purpose of use from a live flow right to a storage right, but within the legal descriptions as licensed.

The "F" claim submitted on this right proposes to change the purpose of use from live flow to storage in addition to changing the point of diversion and place of use to another section within the licensed township and range. I cannot process the "F" claim as submitted since this would require a transfer to legally change the water right. As I see it, I have two options in regard to this claim.

JW 1. Recommend the claim as it was licensed. When BLM objects to the recommendation, we can discuss the transfer requirement. There are no overlapping claims at the licensed point of diversion and only 1 overlapping claim at the place of use which is an instream stockwater claim.

2. Disallow this claim with remark (P01) stating "No lawful appropriation shown".

Which option would you prefer in regard to this claim?
