Dennis S Stanford being first duly sworn,
deposes and says: land in said claim
including lands in sections 26, 27 + 34
were irrigated as early as 1871.
Lands in 26, 27, + 34 were taken
up as desert entries in the early
1960's, but had always been irrigated
it is impossible to keep the water
off with this type of flood irrigation.
This would indicate that these lands
were also irrigated since 1871.

The results of the calculation are:

The length of the channel measured is 245 feet.

The upstream and downstream rod readings are 7.06 and 7.97 feet.

The channel cross section is 7.98 ft-sq.

The wetted perimeter is 11.03 feet.

The hydraulic radius is 0.72 feet.

The slope is 0.0037

The roughness coefficient is 0.0430

The flow velocity is 1.702 ft/sec.

The rate of flow is 13.59 cfs.

RE: Snake River Basin Adjudication claims

Dear Mr. Stanford:

I am writing to bring you up to date concerning our review of the claims you filed in the Snake River Basin Adjudication (SRBA). As described below, some of your claims have been recommended and some require additional information.

1. CLAIM A55-04116--This claim has been recommended for 104 acres of irrigation from Trout Creek. 102 acres are overlapped by groundwater using right 55-02154.
2. CLAIM A55-02154--Recommended for 102 acres of irrigation from groundwater. The same acres also receive Trout Creek water under right 55-04116.
3. CLAIM A55-10010--This is your storage and stockwater claim from an Unnamed Stream with a September 1, 1970 priority date. The file lacks sufficient information to support the 1970 priority date. Documentation in the file indicates the pond was either constructed or enlarged in 1976. If this is true, this use should be covered by an application for a new water right rather than the filing in the Snake River Basin Adjudication. If you can provide us with evidence to support the pond existed for stockwater use prior to May 1971 we can recommend SRBA claim A55-10010.
4. CLAIM A55-04114--Claims a March 15, 1920 priority date for irrigation and stockwater from Thomas Creek. This file also lacks sufficient evidence to support the priority date claimed. The only document we have is a Patent but it does not include the land that is irrigated. The field exam by Linda Werner found irrigation in the SENE, Sec. 8 and the S2NW, Sec. 9, T11S, R4W. We need evidence to support the earliest date water was beneficially used on these parcels.
5. CLAIM A55-10218--Combines claims 55-04115 and 55-04044. It claims irrigation of 288 acres in Idaho and 71 acres in Oregon from Jordan Creek and a priority date of March 15, 1871. We have copies of deeds and patents in file that convey property in Sec. 35, T05S, R06W and the Oregon land. However, we have no documentation that covers the land in Sections 26, 27 & 34 nor do we have any evidence that addresses when water was first applied to any of the land. If you have an Oregon water right that describes the Idaho land irrigated from Jordan Creek we may be able to use that information in the recommendation for claim A55-10218.

December 23, 1997

Page 2

Our current schedule dictates that we have our recommendations for your claims completed by March 1, 1998. I need evidence to support your priority dates before that date. Without it my only alternative is to recommend the claims be disallowed. Enclosed is a pamphlet titled "Evidence of Priority" and copies of several Affidavits for you to use as needed. Call me at the number below if you have any questions or want to discuss this matter in more detail.

Sincerely,

Dear Mr Stanford:

In preparation of making recommendations to the court I have been reviewing your Snake River Basin Adjudication claims. I note that my predecessor, Linda Werner, completed all of the field work and the claim reviews are complete with the exception that we still need additional evidence of priority. Below is a summary of the claims that need additional documentation to support the priorities you claimed.

1. Claim A55-10010--This is your storage and stock water claim from an Unnamed Stream with a September 1, 1970 priority. Linda's notes indicate the pond was built in 1969 and expanded in 1976. There are Soil Conservation Service notes in the file that support the 1976 expansion but I find nothing to confirm that the water was first used as stock water in 1970.

2. Claim A55-10218--Combines claims 55-04115 and 55-04044 for irrigation from Jordan Creek with a priority of March 15, 1871. There are Deeds and Patents in file that convey land in Section 35 land as early as 1884. I find nothing in file relating to the land that you irrigate in Sections 26, 27 or 34. While the Deeds and Patents relate to the ownership of the land, I find nothing that confirms when the water was first beneficially used on any of the land as early as 1871. Since some of your land irrigated by Jordan Creek is also in Oregon, I was wondering if you may have an Oregon license that might also mention the Idaho lands as being irrigated from the same diversion. If you do, the Oregon license could be sufficient to prove the priority you claimed.

3. Claim A55-04114--Claims irrigation and livestock from Thomas Creek with a March 15, 1920 priority. The copy of the U.S. government patent we have in file does not include the land irrigated.

Linda's notes indicate she discussed with you during the field exams the need for additional evidence. Enclosed for your information is a pamphlet that provides some suggestions on providing priority documents. Also enclosed are several copies of affidavit forms to use if you need them. These forms can be duplicated if needed.

We anticipate preparing our recommendations for the court in the near future and need your priority information as soon as possible. Call me at the number below if I can be of assistance or answer any questions.

Sincerely,

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on a "Statutory Claim" or "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no license, decree or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of first use, or "Priority Date", for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement. While we encourage you to read the entire pamphlet, we would like to direct your attention to the right-hand half of this pamphlet once you open it. There you will find information concerning the evidence requirements mentioned above. The other sections describe to you why this evidence is necessary.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, cannot be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the above claim(s) have been or soon will be conducted by Department personnel.

Please submit the required evidence supporting the priority date(s) by August 1, 1991, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact a water resource agent in this office.

Sincerely,

Re: Identification Number Change for a Notice of Claim in the
Snake River Basin Adjudication-Owyhee County

Dear Sirs,

The identification number of your Notice of Claim to a
Water Right has been changed from A55-04044 to A55-10218. The
claim you filed for irrigation actually combines two existing
rights: 55-04115 and 55-04044. The Idaho Department of Water
Resources assigns identification numbers to claims that will
allow processing without duplication or confusion; this change
does not affect your claim in any other way.

Enclosed is a computer-generated copy of your claim with
the new identification number. Refer to this record number in
any future inquiries or correspondence. Please do not
hesitate to contact this office, if you have any questions.

Sincerely,

Jan Shurte
