NOTES:

Copy of water right notice says source is spring creek. Found POD is on Long Draw creek. An arm stream is tributary to it & its source is a spring. POD is only ~ 10' away from confluence of these 2 creeks. D. Woolfolk said on 4-21-94 that he has owned the property 5 years & that D. Ferris owned it 25 years; that he has not changed the POD & to his knowledge D. Ferris hasn't either. So - based on the above info. & because there is no contradictory info. I am recommending as claimed.

Claims downstream are for the BLM & for stock & wildlife instream use.

P.O.U. in SENE is on BLM ground. Will contact claimant in regard to this. On second thought - it's only 2 acres & this area is a "wet" area due to its proximity to the creek & there is also a spring close by. I am recommending only the acreage found in the SENE.

Posy Cr.

No ditch taken from claimed P.O.D. on Posy cr. to deliver H₂O to Pound across in Sec. 12.

There is a ditch from Posy cr. to lands lying along the creek. This is on B.L.M. ground. & no claim has been filed.

The actual diversion is on Long Draw cr. which Dave Woolfolk thought was called Posy cr. There is a dirt dam in NWSE $\frac{1}{2}$ very short ditches (x 4' long) on either side but water can only sub out from there.

The ditch from the actual P.O.D. follows contour & runs along the west side of irr. field. Some lands lying on east side of draw may actually be sub. irr.

Spring

The spring listed as source is located in same, Sec. 12 & this is used as a stock pond only.

Another spring in S.W.S.E., Sec. 12 is in a vertical culvert underground pipeline to tank for stock.

RE: NOTICES OF CLAIM TO A WATER RIGHT

Dear Mr. or Mrs. Woolfolk;

We are currently in the process of preparing the above referenced Notice(s) of Claim for court decree in the Snake River Basin Adjudication. During this review certain questions arose. The following claims require the information or changes listed:

A55-04139-Swisher creek

94 acres were found irrigated from Swisher creek. They are outlined on the enclosed map. Please review this map to determine if this is correct and if there is any overlap from Soda creek. Note that I found 8 acres irrigated in the SE1/4NW1/4 of section 17 that were not claimed. Is this irrigated, sub-irrigated, and do you own this piece of ground? NO

Also, the diversion claimed in section 17, NE1/4SE1/4 will not be recommended as I did not see this during the exam. NONE

A55-04141-Soda creek

~~correct~~ WORKING The diversion point found during the exam is located in section 16, SW1/4SW1/4. This is different then what was claimed in the Adjudication. That location is the NW1/4SW1/4 of the same section. The diversion used at the original filing of the statutory claim was located in the NE1/4SE1/4 of section 17.

NEW SW1/4 CORRECT ONE
Please send me some information regarding the Soda creek diversions. When was your diversion first used? If there has been a change please state when the change occurred. We will also need some information supporting that date. RIVER changed some ditch by the Swisher

The same map I referred to above also includes the Soda creek irrigated lands. Please review this for accuracy and overlap. There were 48 acres found irrigated rather than the 30 acres originally claimed. Has there been an expansion in irrigated acres? If so, please send information regarding the date the change occurred and evidence to support it. NO EXPANSION acres INCORP ON ORIGINAL claim

9/15/93

A55-04140-Springs & Posey creek

The original statutory claim was filed with a source of springs and Posey creek for irrigation and stockwater. This claim was listed as "abandoned". However, the adjudication claim was filed for irrigation and stock. During the field exam I found stockwater usage from a spring and pond and also the spring south of this one located by the fence which has the pipeline to tank. This claim will be recommended for stockwater usage from these two springs.

Long Draw Creek

There is a dirt dam located on Long Draw creek which diverts water through a ditch that runs along the western side of the meadow. No claim has been filed on this source. I am enclosing a Notice of Claim, along with instructions, should you wish to file a claim. By doing so you are asserting that there is irrigation from this source and there has not been a period of five years or more of non-usage (not including non-usage due to drought). The fee for filing this claim will be \$50.00. No variable acreage fee is due because the acreage was paid for under A55-04140. I am enclosing a map showing the location of the springs.

You have already given me a copy of the water right referring to the source of water for this place of use as Spring creek. The date of filing was May 9, 1887. As we discussed earlier, the maps I have here at the office do not show Spring creek running through section 12 at the place of use, only Posey creek, Long Draw creek and an unnamed stream. Is this unnamed stream also known as Spring creek? *I believe so*

X Harper creek

A dirt dam and ditch was also found at Harper creek. There has been no adjudication claim filed on this source. I am enclosing a Notice of Claim should you wish to file. As stated above for Long Draw creek, a claim will assert that you have been irrigating and there has been no five year period of non-use. Again, the cost will be \$50.00 but there will also be a variable fee of \$1.00 per irrigated acre. I will send a copy of a map to help you determine the diversion point and number of irrigated acres.

9/15/93

Please send me a copy of the warranty deed showing that the Akers have sold their portion to you and the legal description of your property.

Thank-you for your cooperation. If you should have any questions, or feel that you need help in any way, please contact me at 208-334-2190.

Sincerely,

Linda A. Werner
