1.6 second feet, was issued thereunder on February 27, 1952, showing that said works

were completed on the 23rd day of February 1952; and that on the 10th

day of February 1953 ERNEST C. JOHNSON

of Homedale

State of Idaho

made proof to the satisfaction of the

State Reclamation Engineer

of Idaho, of the right to use the waters of an Un-named

Stream

a tributary of

Sucker Creek

for the purpose of Irrigation

under Use Permit No. 22566 of the Department of Reclamation

and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,

and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume

10 of Licenses at page 6361 on the 25 day of June 1958

The right hereby confirmed dates from

REPORT OF ENGINEER

Permit No. 22566

This proof is for Beneficial Use

In Water District No.

1. Name of applicant Ernest C. Johnson, Route #1, Homedale, Idaho

2. Source of water supply: Un-named Stream, tributary of Succor Creek

3. Location of point of diversion: Is in the SE¹ SW¹ of Section 11

T. 3 N., R. 6 W., County of Owyhee

4. Describe works as they exist, giving dimensions and capacities of same: At F.D. there is a pond approx 2 acres in extent, a regulating pond, dam approx 2' x 12' x 8' W. on creek. Spillway on west side. A new large open ditch 2' W. in bottom dug by machine extends west portion of field. A 12" pipe thru dam, gate valve on upstream end - can walk - opens into ditch that irrigates the East side of farm.

5. Water is used for: Irrigation

6. State whether or not water has been turned into works of diversion: Yes

7. List legal subdivisions of lands to be irrigated. If proof is for beneficial use, give exact number of acres under cultivation in each forty-acre tract. (Describe manner and place of use if other than irrigation):

40 acres
NW¹ NE¹ Sec. 11, N¹ NW¹ Sec. 11, Twp 3 N., Rge 6 W.B.M.

See map.

There is an old ditch on the West side at a higher elevation than the present one. Still 12" W. in bottom on Johnson's land. Some of the ditch is obliterated toward the head end. Land on the West side could have all been irrigated - that is below the bench land.

(Submit map on attached plat, showing location and details of above description.)

8. What large stream would the water here appropriated finally reach?

Remarks: Ditch on East side appears to have been in regular use. Complete evidence of long years irrigation on the East side. Land is a bit steep for best gravity irrigation for the arch type soil. On West side new ditch just constructed - not yet been in use.

Crops are hay - grain - pasture

TO: FILES A57-00003 AND A57-00004

FROM: KAY WALKER

RE: DIVERSION WORKS

Following my recommendations to these rights the water allocations section had some water distribution problems arise in this neighborhood and had questions regarding my findings. The question arose as to why I had not included storage parameters on the pond that Mrs. Johnson uses in her diversion works. I have no reason for this omission except that it was an oversight on my part. Bruce Shuld conducted an exam on this system on July 18, 1990 and took pictures of the pond and described it on his naratives. When I inherited these files I tried to write them up based on the previous records (license & decree) and Bruce's findings. I failed to include the pond which is a part of the system. The capacity of the pond is to be determined (unknown as of this date).

If it happens that we can change our recommendations prior to final decree, I will try to get these corrected.

RE: Late claim

Ms. Betty Johnson came into the office today for assistance with filing a late notice of claim in basin 57. The claim had been partially completed but she had a question on the amount of water to claim. Specifically, she did not know how to determine the acre-foot amount of the pond that she was filing a claim on for storage.

Ms. Johnson indicated that the pond has an approximate surface area of 1.5 acres, and is approximately 10 ft deep. This information indicates that the pond has a capacity of 15 acre-feet, which is the amount that Ms. Johnson wrote by hand on the claim. She also completed the non-irrigation uses as stockwater for 30 cow/calf pairs and one bull.

Ms. Johnson signed the Certificate of Mailing and I made 3 copies of all documents for her (Johnson v. Evans, easement, claim, & SF4). She addressed envelopes to the SRBA court, the State of Idaho, and the U.S. She put the originals, along with checks for \$100 (IDWR) and \$65 (SRBA) in the envelope addressed to the court. The copies went into the envelopes for the others. She also kept a copy for herself. Ms. Johnson took the envelopes with her to mail in Homedale, as she had a 4:00 appointment.

GRANT OF EASEMENT

THIS INDENTURE, made and entered into this 7th day of December, 1951, by and between ROSS A. EVANS and MARY K. EVANS, husband and wife, and WILLIS VERN EVANS and MINA LAVERN EVANS, husband and wife, the parties of the first part, and ELMER G. MITCHELL and OLIVE MITCHELL, husband and wife, the parties of the second part;

WHEREAS, the parties of the first part own that certain real property situated in the County of Owyhee, State of Idaho, and described as follows:

The Southeast Quarter of the Southwest Quarter of Section 11, Township 3 North, Range 6 West of the Boise Meridian, Idaho.

WHEREAS, the parties of the second part own that certain real property situated in the County of Owyhee, State of Idaho, and described as follows:

Lot 1 and the Northwest Quarter of the Northeast Quarter and the Northeast Quarter of the Northwest Quarter of Section 14, all in Township 3 North of Range 6 West of the Boise Meridian, Idaho.

WHEREAS, a well defined un-named water course runs in a general Northsouth direction approximately through the center of the above described real property belonging to the parties of the first part, and the parties of the second part have constructed a dam upon the above described real property belonging to the parties of the first part in said un-named water course approximately 500 feet North of the South line of the above described real property belonging to the parties of the first part;

WHEREAS, said dam is used to divert water into two ditches constructed by the parties of the second part upon the above described real property belonging to the parties of the first part for the purpose of conveying irrigation water to the above described real property belonging to the parties of the second part;

504

WHEREAS, one of said ditches commences at said dam and flows in a Southeasterly direction to the above described real property belonging to the parties of the second part, and the other of said ditches commences at said dam and flows in a southwesterly direction to the above described real property belonging to the parties of the second part;

WHEREAS, the parties of the first part have agreed to give the parties of the second part an easement for the construction and maintenance of said dam and said two ditches over the above described real property belonging to the parties of the first part.

NOW THEREFORE, in consideration of the concurrent conveyance of certain real property from the parties of the second part herein to the parties of the first part herein, and other good and valuable consideration paid by the parties of the second part to the parties of the first part, receipt of which is hereby acknowledged, the parties of the first part for themselves, their heirs, executors, administrators, successors and assigns, do hereby grant, sell and convey unto the parties of the second part, their heirs, and assigns forever, a perpetual easement and full and free right and authority to build, construct, reconstruct, maintain and repair the aforementioned dam and two ditches where the same are presently constructed and situated upon the above described real property belonging to the parties of the first part, subject, however, to the following conditions, to-wit:

The above described easement is appurtenant to the aforementioned real property belonging to the parties of the second part, and is appurtenant to that land only; this easement is subject to the equal right of the parties of the first part, their heirs and assigns, to an equal use of the water stored in said dam in order to water the stock of the first parties, their heirs and assigns, during the wintertime; the parties of the first part, their heirs and assigns, do further reserve the right to put a dam site on the same water course in a position above that of the parties of the second

part, provided that the parties of the first part do not interfere with the parties of the second Part's use of said water, water right, and dam; the parties of the first part do hereby expressly agree and consent that the parties of the second part may take dirt for the repair and maintenance of said dam from any point within sixty yards from either side of said dam; this easement is specifically subject to the duty of the parties of the second part to repair any damage to the property of the parties of the first part in the construction of said dam and/or ditches, or to pay for the said damages.

This grant is intended only as an easement and the parties of the second part are to acquire no greater interest in and to the property of the parties of the first part.

IN WITNESS WHEREOF, the parties of the first part have hereunto set their hands and seals the day and year first above written.

In the course of dealing with a complaint by Bette Johnson of Homedale about a pond near Sycra Creek, a question came up.

Johnson	57-00003	SRBA recommendation	.90 cts
	57-00004	" "	.24 cts
Total from this source			= 1.14 cts
(unusual stream).			

The water is collected in a pond in SE5W S. 11 (See map).

Looked at claim files, CWR reports, Recommendation but don't see any info on capacity of pond.

1.14 cts x 1.9835 $\rightarrow$ 2.3 sf/day.

If pond $>$ 2.3 sf, shouldn't 57-00003 & 4 be redescribed to include Irrig Storage & I.F. Storage?

If so, can this be done at this time? Not sure it can revisit Recommendations for this type of adjustment.

Kay did CWR's - maybe she knows something about this.

Can we discuss so I can advise attorney & this?

Steve

RE: Notice of Claim Nos. A57-00003 and A57-00004

Ernest C. &/or Bette J. Johnson
Rt. 2, Box 90
Homedale, ID 83628

Dear Mr. and Mrs. Johnson:

We are currently in the process of preparing the above referenced Notices of Claim for court decree in the Snake River Basin Adjudication.

A field examination was conducted on these claims to verify the water right information. During this examination some discrepancies were found between the claim and actual use of the water. In order to recommend the claims accurately to the court we need to make some changes to these claims. I found that you do not irrigate the number of acres that were previously decreed under these rights. In my review I found that you irrigate a total of 57 acres. I have outlined these acres on the enclosed map so you can see what will be recommended.

Enclosed are two computer generated copies of each claim referenced above. One copy is the claim as it was filed by you in the Snake River Basin Adjudication. This claim has an Identification No. beginning with an "A" (upper right-hand corner of page one). The other copy reflects the changes to be recommended to the Court and has an Identification No. beginning with a "R". The highlighted items are the items that have been changed as a result of our review.

Please review these changes and if you disagree with any of them, you must contact us by the response date listed at the top of this letter. If you do not respond by this date, we will assume you agree with our findings and this claim will be recommended to the court with the changes shown.
