Dennis & Shirley Cox Murdoch
HC 79, Box 2065
Oreana, ID 83650

Dear Dennis & Shirley:

This letter is being written in response to the Notice of Error filed September 1, 1992, on the above referenced water rights. This notice of error was on the proposed season of use for these rights.

As explained while you were in my office, the seasons of use for these rights will not be changed prior to submittal to the court on October 1, 1992. The Department's standard season of use for this area is 3-15 to 11-15 for other than Castle Creek previously decreed rights. Castle Creek previously decreed rights were decreed a season of use of 4-1 to 10-15 in 1923 when the decree was finalized, and the Department cannot recommend a longer season of use than what was previously decreed. Therefore, the season of use for these water rights will not be recommended for a longer season of use.

You can file an objection with the court once these rights are entered and submit evidence as to why you feel a longer season of use is needed. The objection procedure will be explained completely when you receive copies of your water rights submitted to the court on October 1, 1992. This notification will be mailed at the same time the report is given to the court. If you have any questions concerning this letter, please feel free to contact me.

Sincerely,

JAN SHURTE

REMARKS:

Main difference in POU being recommended for this right is that the mapping on the claim sought about the late (Govt.) in this area. The land that acres are just wrong - pure & simple. Date of Change should be prior to 1974 (orthophotograph of 1974).

RECOMMENDATIONS:

For POU from orig. deced.

Claimant states that it has been at least 30 to 40 years (since the members) that in this manner has taken place.

In looking at the old right vs. recommended POU it appears no major change in POU has occurred. Old POU same as recommended except for the 1 acre in XENW, D. 32. No change therefore, has occurred. See attached copy of orig. deced.

Cox. Please what attached sheet that .035 cfs is being used at a 33% irrigation efficiency. For flood irrigation 33% is good, so the system recommended .035 cfs can be recommended. .035 cfs per acre + because the flow was saved at 3" per acre (2.5) for this land, no increase in the demand is taking place.

246 acres x .035 cfs = 8.61 cfs

plus ditch loss as shown on

attached ditch loss sheet = 1.27 cfs + 1.61 cfs for a total of 2.88 cfs

for a calculation of conditions for overlapping rights, see next page

and overlap review page attached also. Attached documents are for a grand total of 13.12 cfs.
