SYSTEM DESCRIPTION ATTACHMENT TO CLAIM VERIFICATION REPORT

CLAIM NO. A57-00099

There are two points of diversion associated with this water right. The upper diversion, located in the NE1/4NW1/4 of section 35 is used to irrigate the lands located on the east side of Castle creek. The southwestern diversion, also Castle creek, is used to irrigate all other places of use. This diversion is conveyed by means of a dirt ditch to the NE1/4NE1/4 of section 34, T4S, R1E. At this point the creek water converges with well water and is conveyed by means of cement ditches. Ditches run in a northeasterly direction and an easterly direction along the south end of the property. The ditch which runs easterly empties water back into Castle creek and is picked up in the upper diversion to irrigate the lands on the east side of the creek. Irrigation is by 10" gaited pipe. Gravity flow system
