October 25, 2002

RECEIVED

OCT 28 2002

Triangle Dairy Inc.
PO Box 7526
Boise, ID 83707

Department of Water Resources

Dear Water Right Claimant(s):

Attached to this letter is a copy of an *Order Amending Irrigation Period of Use Element in Partial Decree, Nunc Pro Tunc* (hereinafter "*Order*") for water right number 57-187B. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The purpose of the *Order* is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the *Order*, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This *Order* also incorporates into the *Partial Decree* an express statement that the *Partial Decree* is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). December 15, 1997, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the *Partial Decree* to show evidence of this water right. The original of this *Order* and the original of the *Partial Decree* for this water right are on file with SRBA Court. If you do not have a copy of the original *Partial Decree*, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the *Order* is entered *Nunc Pro Tunc*, meaning that the *Order* will be treated as if it were issued on the same date that the *Partial Decree* was originally issued.

Sincerely,

Diana Delaney

	)	EXPRESS STATEMENT REGARDING GENERAL
	)	PROVISIONS, <i>NUNC PRO TUNC</i>

A *Partial Decree* was entered for the above-captioned irrigation water right on December 15, 1997. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, on July 26, 1999, IDWR filed a *Supplemental Director's Report, Reporting Area 2, IDWR Basin 57, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this *Supplemental Director's Report*.

THEREFORE, IT IS ORDERED that the period of use element for the irrigation portion of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-01 to 11-15

IT IS FURTHER ORDERED that the *Partial Decree* for the above-captioned water right is hereby amended and decreed to contain the following:

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the *Partial Decree* was issued and is not intended to modify subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

two wells at the house - one for drinking
and yard - one warm well used for
farm and garden - Also a pond and a
wash house.

A57-10782 there was water there for
the farm home and other use.

A57-10783 other wells were used in
all the area of the Triangle Dairy for the
Homes and farming.

My father, Ross Oshorn, measured
many of these wells for information on
the flow at the time we were living
on the Ninton place.

Artesian well #9 was also flowing with at least 15 inches at that time,
and was used to irrigate the field below it. At the present time, due to
drought, it flows only 3.7 gallons per minute (measured 11/12/91).

Ref. Reminder Notice

Dear Mr. Tate,

I met with Sherl last month, and we looked at the "System Map" for your Dairy. Part of it, may still qualify as a "Permissible Place of Use".

He said that he would also pass the following information to you on these items that we still need information on before we can recommend the claims:

1. Evidence of the dates of priority for the following claims:

- * A57-10782
- * A57-10783

2. Some evidence must be submitted that would be acceptable of the rate of flow of your artesian No. 9 Triangle Dairy Well. (Shirl said that you did not wish to measure it at this time because of the low flow) This well may not be included as a point of diversion.

This letter will serve to remind you, to provide us with this information by the November 15, 1991 Deadline.

Please give this letter your utmost attention!

Sincerely,

Ron Howerton

TRIANGLE DAIRY'S BASIN "57" CLAIMS

December 11, 1991

Comments made by
Field Examiner: Ron Howerton
Date of Exam: 10/9/90

Ref: Triangle Dairy's Irrigation System

1. The claims that were licensed or decreed all listed 17 points of diversion.
2. Claim 57-02152 was a surface water right, but listed 17 wells for the source and points of diversion.
3. During the Field Exam I was told several times by the owner that each well could divert the water on any piece of ground that the others could irrigate.
4. During the field exam I found that only seven wells were being used. Well No. 7 I found, was the only source for its place of use.
5. The system was a mixture of sprinklers, underground pipelines furrows, and flood irrigation.
6. The remaining wells were inconclusive as to whether they could divert to any place that the others could irrigate, however the owner still insisted that they could.
7. I went with that statement and started figuring up the claims for permissible place of use.
8. I started by making a map that showed what lands they claimed. In some cases the licenses overlapped each other. The decrees were claimed for separate lands, and their own place of use with little or no exceptions to the licenses.
9. I added up the CFS of both the licenses and decrees, this amount was more than an inch per acre.
10. Then, after my research I only found that six wells may possibly irrigate 1 big PERMISSIBLE PLACE OF USE. I did theoretical calculations for each well, for the maximum rate of flow with the exception of the artesian well, it was an open flow, open casing, with no logical way of measuring it, as waste water from Triangle Dairy's fields were comingling with it. The only possible way that I knew to measure it, was in the ditch after the irrigation season was over. This was later obtained with an affidavit for 15 inches.

OCT 07 1992

11. I finished all of the calculations based from upon what I saw and what I could obtain from Mr. Tate and his foreman, Kent and Sherl Chapman, and put it all together.
12. After much time spent to show that the land was 1 permissible place of use, I could tell that wasn't going to work.
13. I called Sherl Chapman, as he helped Mr. Tate file his claims and accompanied me on this field exam too. My request was to have Sherl contact Mr. Tate, and set up another field examination date to show proof of the system by plotting the underground lines etc., that the wells could be diverted as such, and that all were somehow tied in together.
14. Sherl, went ahead and got with Bill Tate and by using the map that I drew, plotted in the system, then we met to go over what he found. From this I then drew up a master copy, based upon what I seen and what Sherl had drawn.
15. After studying and putting the master copy together, I found that 3 separate area's would well work as permissible places of use. Not 1 large PPOU...

SUMMARY:

The places of use and points of diversion that were claimed had to be totally re-drawn from the beginning.

Of the 17 wells that were originally claimed, only 7 remain, the rest do not exist for irrigation.

The entire system was re-worked as Mr. Tate stated from the time he bought it in 1957, and had it completed by 1960 and 1962.

The system works ONLY because of the overlapping Snake River Water Rights, without it, the 3 systems would not work as a "PERMISSIBLE PLACE OF USE."
