IV.

57-0196 That the defendants named in the caption ^{hereof} hereby decreed the right to the use of 14 miners' inches (.28 second feet of water), measured at the well, with priority of April 15, 1940, of that part of the water of their well No. 4 flowing and derived from the lower artesian basin encountered at said well at a depth of 550 feet or greater; the well herein referred to is that well of defendants identified in their cross-complaint as well No. 4 and which was deepened in the year 1940 and enlarged in diameter in the year 1947.

The said water rights (together with other water rights decreed to defendants) are for the irrigation of and domestic and livestock use upon their lands described as follows:

The East Half of the Southeast quarter (E 1/2 SE 1/4) of Section thirty-three (33), and the Northwest quarter of the Southeast quarter (NW 1/4 SE 1/4) of Section thirty-four (34), Township One (1) South, Range Two (2) East, Boise Meridian, containing approximately One Hundred Twenty Acres, more or less, together with all water rights, water, ditches, canals and aqueducts upon, leading to or used in connection with the above described land.

V.

The water rights hereinbefore specified and decreed are derived from the same source of supply, that is to say, the water flowing from each of the wells of plaintiffs and that part of the flow of defendants' said well No. 4 derived from said lower artesian basin constitute one interdependent and connected source of supply.

VI.

The defendants are hereby decreed for use upon their said lands additional water rights from their said wells as follows:

57-0286 (1) From their well identified in defendants' cross-complaint as well No. 1, two miners' inches; and it is further decreed that the supply of water derived therefrom at its present depth of not exceeding 400 feet is from an upper and colder artesian basin than the water decreed in the preceding paragraphs hereof and does not affect and is not affected by the flow of plaintiffs' wells, or any of them.

57-0197 (2) From the well or wells described in defendants' cross-complaint as well No. 2, and also known as the "reservoir" well, five miners' inches measured at said well, with priority of April 1, 1919. And it is hereby decreed that the flow of said wells at their present depth of not exceeding 400 feet is derived from said upper and colder artesian basin, and up to a flow of five miners' inches do not affect, nor
