is such flow effected by, the flow of any of plaintiffs' wells.

57 0198

(3) From the well described in defendants' cross-complaint as well No. 3, and also referred to as the "field" well, one miners' inch of water, with priority of April 1, 1912; and it is hereby decreed that the flow of said well at its present depth and up to a flow of five miners' inches, does not effect, nor is such flow effected by, any of plaintiffs' wells.

57 0199

(4) From the upper and colder artesian basin, tapped at a depth above 350 feet by the well heretofore identified as defendants' well No. 4, 15 miners' inches of water measured at said well, with priority of May 1, 1936; and it is hereby decreed that the flow thereof up to 15 miners' inches from said upper and colder artesian basin encountered in said well at a depth above 350 feet, does not effect, nor is such flow effected by, the flow of any of the wells of plaintiffs.

VII.

Under the direction of the State Reclamation Engineer of the State of Idaho as Commissioner herein, defendants have the right to clean out their said well No. 2 and their said well No. 3 (without deepening the same), so as to restore said wells up to but not beyond their initial flow of 10 miners' inches each, provided such cleaning out does not diminish the flow (under the conditions specified in paragraph VIII hereof) of plaintiffs' wells, or any of them, below the following, respective amounts:

The Givens well - - - - -	30 miners' inches;
The Foster well - - - - -	41 miners' inches;
The Ona well - - - - -	20 miners' inches.

Provided, however, that any increase in the flow of either of said wells accomplished by such cleaning out over the and above a flow of five miner's inches for each, shall be subject to the further order of this court in fixing and determining the priority of the right of defendants as to such additional water.

VIII.

The amount of water that may be permitted to flow from defendants' said well No. 4 is hereby provisionally fixed and limited as follows:

Sixteen miners' inches from said upper artesian basin, tapped by said well; and all withdrawal of water from said well derived from the lower artesian basin which is tapped by said well at a depth at or below 350 feet shall be initially stopped by closing the 2-inch pipe leading from the aperture in the plug which was inserted in
