HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

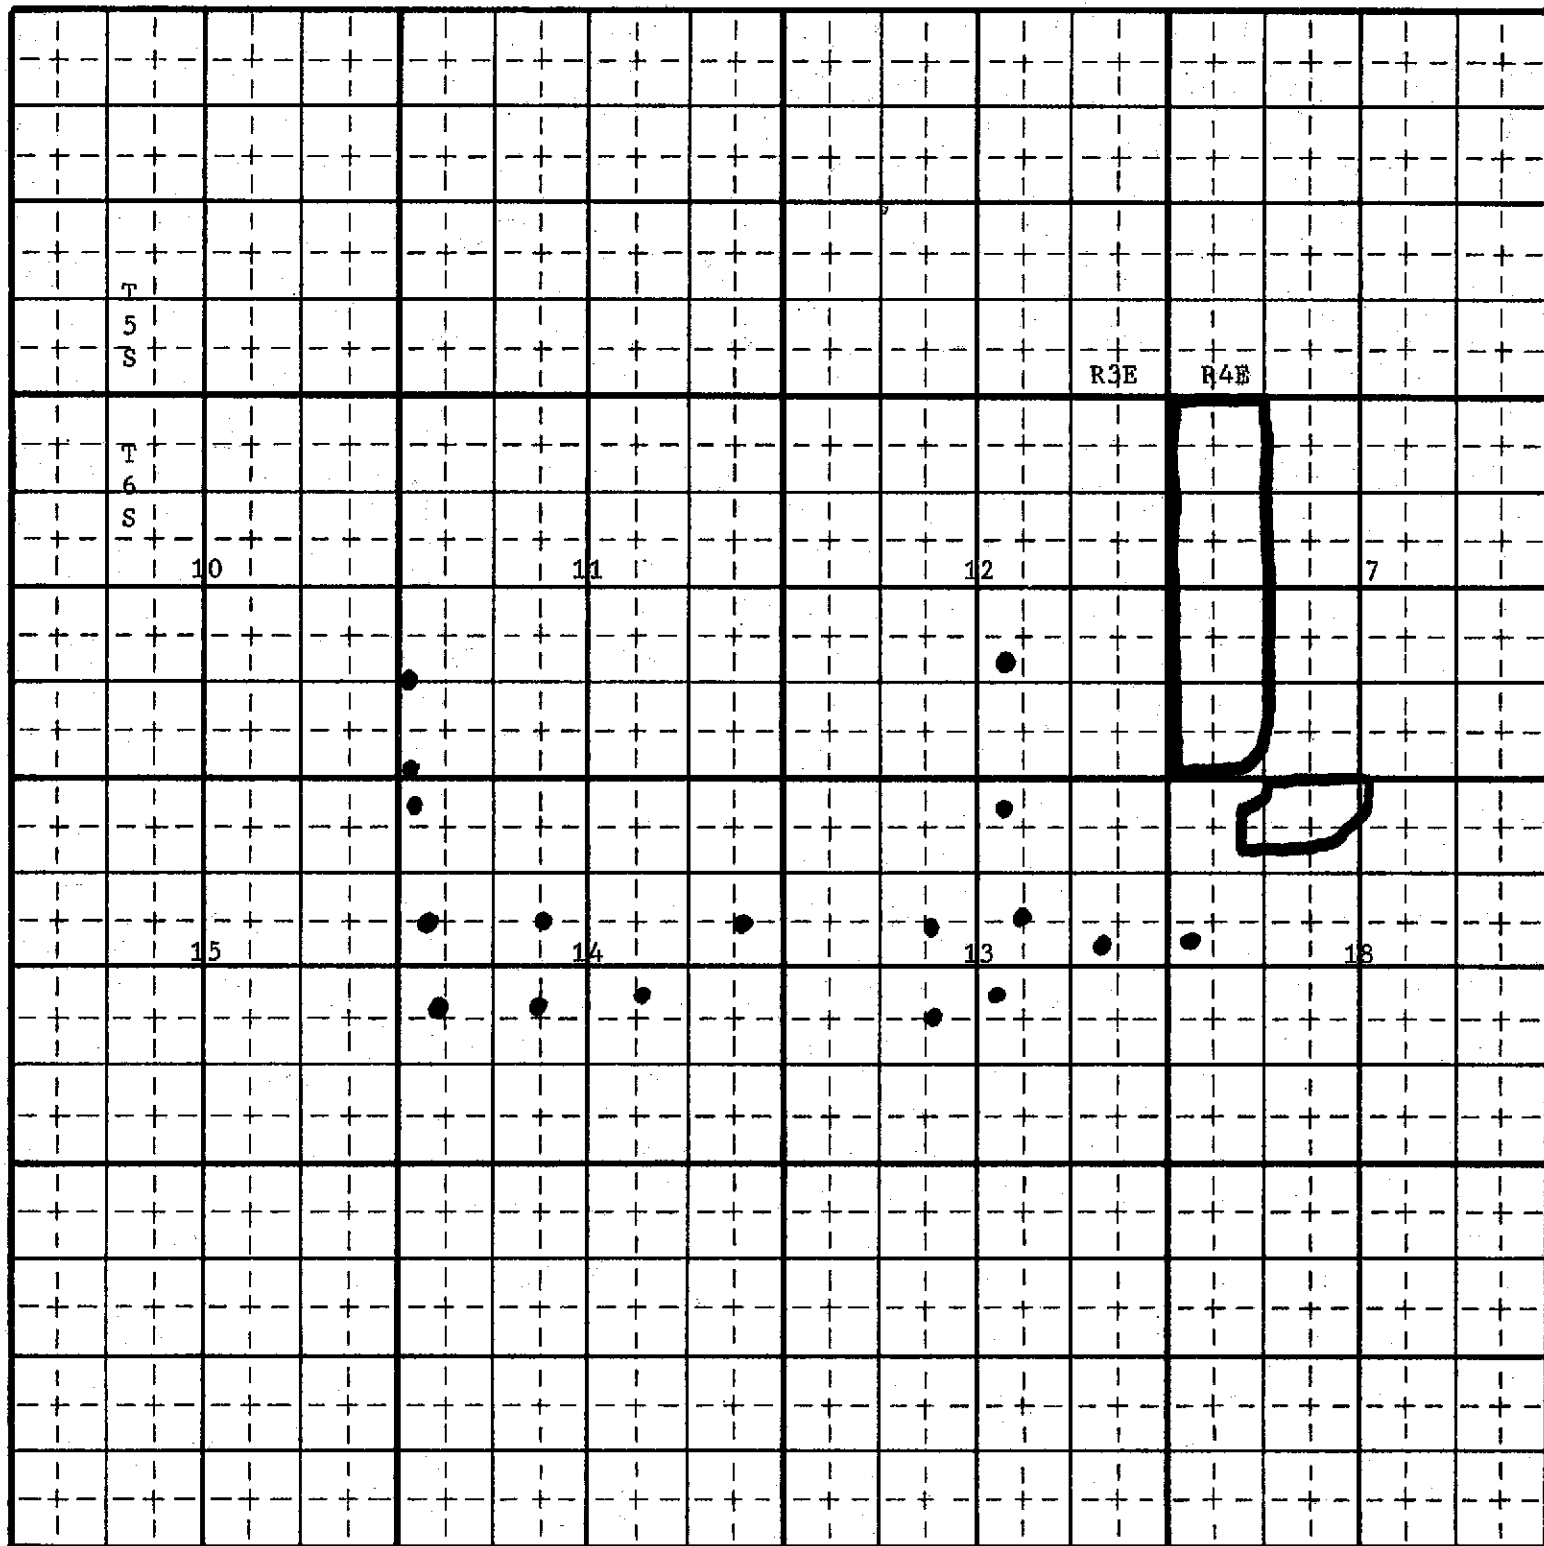

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.

TRIANGLE DAIRY'S BASIN "57" CLAIMS

December 11, 1991

Comments made by
Field Examiner: Ron Howerton
Date of Exam: 10/9/90

Ref: Triangle Dairy's Irrigation System

1. The claims that were licensed or decreed all listed 17 points of diversion.
2. Claim 57-02152 was a surface water right, but listed 17 wells for the source and points of diversion.
3. During the Field Exam I was told several times by the owner that each well could divert the water on any piece of ground that the others could irrigate.
4. During the field exam I found that only seven wells were being used. Well No. 7 I found, was the only source for its place of use.
5. The system was a mixture of sprinklers, underground pipelines furrows, and flood irrigation.
6. The remaining wells were inconclusive as to whether they could divert to any place that the others could irrigate, however the owner still insisted that they could.
7. I went with that statement and started figuring up the claims for permissible place of use.
8. I started by making a map that showed what lands they claimed. In some cases the licenses overlapped each other. The decrees were claimed for separate lands, and their own place of use with little or no exceptions to the licenses.
9. I added up the CFS of both the licenses and decrees, this amount was more than an inch per acre.
10. Then, after my research I only found that six wells may possibly irrigate 1 big PERMISSIBLE PLACE OF USE. I did theoretical calculations for each well, for the maximum rate of flow with the exception of the artesian well, it was an open flow, open casing, with no logical way of measuring it, as waste water from Triangle Dairy's fields were comingling with it. The only possible way that I knew to measure it, was in the ditch after the irrigation season was over. This was later obtained with an affidavit for 15 inches.

MICROFILMED

OCT 07 1992

11. I finished all of the calculations based from upon what I saw and what I could obtain from Mr. Tate and his foreman, Kent and Sherl Chapman, and put it all together.
12. After much time spent to show that the land was 1 permissible place of use, I could tell that wasn't going to work.
13. I called Sherl Chapman, as he helped Mr. Tate file his claims and accompanied me on this field exam too. My request was to have Sherl contact Mr. Tate, and set up another field examination date to show proof of the system by plotting the underground lines etc., that the wells could be diverted as such, and that all were somehow tied in together.
14. Sherl, went ahead and got with Bill Tate and by using the map that I drew, plotted in the system, then we met to go over what he found. From this I then drew up a master copy, based upon what I seen and what Sherl had drawn.
15. After studying and putting the master copy together, I found that 3 separate area's would well work as permissible places of use. Not 1 large PPOU...

SUMMARY:

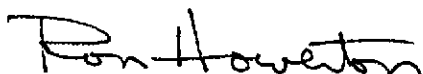

The places of use and points of diversion that were claimed had to be totally re-drawn from the beginning.

Of the 17 wells that were originally claimed, only 7 remain, the rest do not exist for irrigation.

The entire system was re-worked as Mr. Tate stated from the time he bought it in 1957, and had it completed by 1960 and 1962.

The system works ONLY because of the overlapping Snake River Water Rights, without it, the 3 systems would not work as a "PERMISSIBLE PLACE OF USE."
