Water License No. G-28327
Water District No. _____

Amount 4.0 c.f.s.
Priority December 11, 1959

THIS IS TO CERTIFY that W. E. BAKER
of Boise, Idaho, made application for a permit to appropriate the
public waters of the State of Idaho, dated December 11, 1959; that Permit No. G-28327
was issued under said application; that Certificate of Completion of works, with a carrying capacity of
5.87 second feet, was issued thereunder on August 18, 1964, showing that said works
were completed on the 23rd day of August, 1963; and that on the 23rd
day of August, 1963, W. E. BAKER

of Eagle, State of Idaho, made proof to the satisfaction of the
State Reclamation Engineer of Idaho, of the right to use the waters of two wells
a tributary of subterranean flow, for the purpose of irrigation
under Use Permit No. G-28327 of the Department of Reclamation
and that said right to the use of said waters has been perfected in accordance with the laws of Idaho,
and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume
13 of Licenses at page 7947, on the 18 day of August, 1964.

The right hereby confirmed dates from December 11, 1959;
The Point of Diversion is located SE 1/4, Sec. 15
in the NE 1/4 NW 1/4, Sec. 22, Tp. 3 S., R. 1 W., B. M. Owyhee County

That the amount of water to which such right is entitled and hereby confirmed, for the purposes
aforesaid, is limited to an amount actually needed and beneficially used for said purposes, and shall
not exceed 4.0 cubic feet per second.

INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Sections 42-248 and 42-1409(6), Idaho Code. Section 42-248 requires certain property holders to notify the Department of Water Resources (IDWR) of any change in mailing address or ownership of all or part of a water right record on file with IDWR. Section 42-1409(6) provides that new property owners must notify IDWR of any change in ownership of a water right during an adjudication of water rights, and, if a required claim for the water right has not been filed, to file the needed claim.

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures, or if you have questions about completing this form, please contact your nearest IDWR office or call 1-800-451-4129.

If you need additional space to describe or explain any of the items on the form, please attach additional sheets to the form as you may require.

1. If there are water rights associated with the property, the seller should be able to provide you with the water right or adjudication claim number(s). Please enter these number(s) at Item 1. If you or the seller believe there are water rights for the property but the numbers are unknown, you may wish to call IDWR or come into an office of IDWR for assistance in identifying the water rights for the property in question. If claims for the rights are required, and have not been filed, IDWR will so advise you.
2. The information described at Item 2 is required, since IDWR cannot process the requested change without documentation of ownership. The preferred types of documentation are shown; contact IDWR if you have difficulty obtaining this information. Do not obtain a new survey for purposes of this form before contacting IDWR.
3. Please provide the name and address of the former owner of the water right and/or adjudication claim at Item 3.
4. The name, mailing address, and telephone number of the new owner(s) is entered at Item 4. Please indicate the relationship between multiple owners by using the connector "and", "or" or "and/or". If an "and" is used, all parties must sign this form. If an "and/or" or "or" is used, all parties may sign, however only one of the named parties is required to sign.
5. At Item 5, please provide the date the property in question was acquired. This may be the date of "closing" in the case of a real estate transaction or the date of court order for other types of ownership changes.
6. If the property you have purchased is only a portion of the property owned by the former owner/seller, you may be purchasing only a portion of the total water right held by the seller. This means the water right held by the seller may be "split" to provide your share of the right in question. Be sure to include a description of the portion of the water right you have purchased at Item 6.

Please provide as much detail as possible concerning your water right: include the number of homes, irrigated acreage if more than 1/2 acre is irrigated, type and number of stock if your right is for stockwater, etc. In the absence of information to the contrary, IDWR will assume the intent is to split the rights *proportionately*.

7. The new owner(s) must sign the form in the space(s) provided at Item 7. Corporations and other organizations must submit a list of directors or officers demonstrating the authority of the director or officer to sign the form.
8. There is no filing fee. When complete, you should retain a copy and return the original of the form to the IDWR office nearest you:

Important Information About Your Water Right

January 21, 2003

John D Edwards
Deborah S Edwards
PO Box 93
Murphy, Idaho 83650

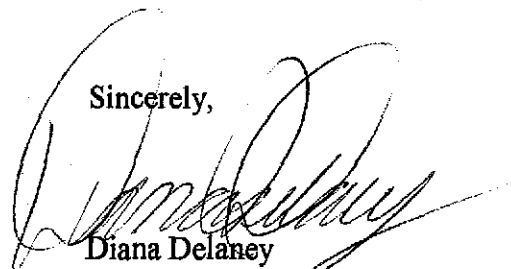

Dear Water Right Claimant(s):

This letter accompanies a copy of an *Order Amending Irrigation Period of Use Element in Partial Decree, Nunc Pro Tunc* (hereinafter "*Order*") for water right number 57-2236. According to Idaho Department of Water Resources (IDWR) records, you are the current owner of this water right. If you are not the current owner, please contact IDWR immediately at:

Idaho Department of Water Resources
1301 North Orchard
Boise, ID 83706
800-451-4129

The purpose of the *Order* is to set forth beginning and ending dates for the irrigation period of use for this water right. As stated in the face of the *Order*, this action was necessary following the decision of the Idaho Supreme Court in *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998). This *Order* also incorporates into the *Partial Decree* an express statement that the *Partial Decree* is subject to such general provisions necessary for the definition or for the efficient administration of the water right. This express statement is necessary to comply with the requirements of Idaho Code section 42-1412(6). This *Order*, in combination with the *Partial Decree* that was issued for this water right on June 20, 1997, sets forth all of the elements of your water right. The Snake River Basin Adjudication (SRBA) Court suggests that you keep this document in a safe location together with a copy of the *Partial Decree* to show evidence of this water right. The original of the *Order* and the original of the *Partial Decree* for this water right is on file with SRBA Court. If you do not have a copy of the original *Partial Decree*, one can be obtained by contacting the SRBA Court at (208) 736-3011. Please note that the *Order* is entered *Nunc Pro Tunc*, meaning that the *Order* will be treated as if it were issued on the same date that the *Partial Decree* was originally issued.

Sincerely,

Diana Delaney

_____	)	PROVISIONS, <i>NUNC PRO TUNC</i>

A *Partial Decree* was entered for the above-captioned irrigation water right on June 20, 1997. The period of use element was decreed as "irrigation season." In *A&B Irrigation Dist. v. Idaho Conservation League*, 131 Idaho 411, 423, 958 P.2d 568, 580 (1998), the Idaho Supreme Court remanded with the directive to include specific dates for the period of use element. Following remand, on July 26, 1999, IDWR filed a *Supplemental Director's Report, Reporting Area 2, IDWR Basin 57, Regarding Revision of Period of Use (For Irrigation Water Uses) and Conjunctive Management General Provisions*, which included an irrigation period of use recommendation for this water right. No objections were filed to this *Supplemental Director's Report*

THEREFORE, IT IS ORDERED that the period of use element for the irrigation portion of the above-captioned water right is hereby amended and decreed as:

PERIOD OF USE: 03-01 to 11-15

IT IS FURTHER ORDERED that the *Partial Decree* for the above-captioned water right is hereby amended and decreed to contain the following:

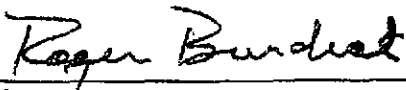

This partial decree is subject to such general provisions necessary for the definition of the rights or for the efficient administration of the water rights as may be ultimately determined by the court a point in time no later than the entry of a final unified decree. I.C. section 42-1412(6).

This order is being entered *nunc pro tunc* as of the date the *Partial Decree* was issued and is not intended to modify subsequent administrative changes for the water right, if any, which occurred following entry of the *Partial Decree*.

RULE 54(b) CERTIFICATE

With respect to the issues determined by the above judgment or order, it is hereby CERTIFIED, in accordance with Rule 54(b), I.R.C.P., that the court has determined that there is no just reason for delay of the entry of a final judgment and that the court has and does hereby direct that the above judgment or order shall be a final judgment upon which execution may issue and an appeal may be taken as provided by the Idaho Appellate Rules.

Dear Mr. & Mrs. Edwards:

Enclosed are copies of the above referenced claims which reflect the change in ownership of the land and appurtenant water rights covered under the original filings. Also enclosed is a copy of the Notice of Completed Administrative Proceedings which has been sent to the Snake River Basin Court as notification of the change.

Please note that we found a clerical error in the recommendations on Right No. 57-02295 which we have corrected. The combined annual consumptive use volume was listed as 845.0 AF rather than 854.0 AF as shown on Rights 57-00001B and 57-02236.

The Department or the Court will contact you in the future concerning any requirements that may be needed in order to process these claims for final decree.

If you have any questions concerning the enclosed claims, please feel free to contact this office.

RE: *Tyson Ranch Water Rights*

Dear Mr. Martin:

I have completed my analysis of the records for ground water rights 57-02236 and 57-02295 and have determined the reason for the 53 acre discrepancy in total irrigated acres under the combined rights. Please refer to the enclosed information and the reports I sent previously.

Right no. 57-02236 was licensed in 1964 for the irrigation of 200 acres north of Sinker Creek (copy of original document enclosed). During subsequent Department field visits, in 1987 and in 1990, our staff determined that 30 acres in SESW Section 14 and 10 acres in NENW Section 23, as shown on license 57-02236, were not irrigated. This could have been due to incorrect licensing (land never actually developed) or a partial forfeiture of use over time. In either event, the finding caused this right to be reduced by 40 acres, to 160 acres, for recommendation to the court in the Snake River Basin Adjudication (SRBA).

Permit no. 57-02295 was examined for licensing in 1987. At that time, 84 acres irrigation was found south of Sinker Creek. However, only 31 of the 84 acres were within the place of use as shown on the permit. The 53 "missing" acres were found outside the permitted development area.

For the 53 acres to have been included on license 57-02295, the permit holder of record (not the land owner) would have been required to first amend the permit. Unfortunately, permit 57-02295 was originally issued to Mrs. Betty Shelley, and was never assigned to Mr. Hackley. Mrs. Shelly could not be located for action on the permit. Therefore, a reduced license of only 31 acres was issued. This information was carried into the SRBA court recommendation.

The Tyson's perception that there are about 285 acres irrigated under the ground water rights is likely derived from the 200 acres originally shown on 57-02236 plus the 84 acres found in 1987 for 57-02295. Actual acres found to be irrigated from ground water are the same 244 acres found on the Sinker Creek right 57-00001B (160 north of the creek plus 84 south of the creek). Because the Department was prevented from including all possible acres on 57-02295, irrigation from ground water is presently limited to 191 acres.

At this time, there are two options available to authorize ground water irrigation of the omitted 53 acres south of Sinker Creek:

1) The owner of the right may attempt to file an objection with the SRBA court to change the recommendation. Both Hackley and Tysons had opportunity to review Department recommendations of these rights before they were submitted to the court. Mr. Hackley was forwarded copies of all recommendations, but no notices of error were filed. The formal objection period has expired, and dissatisfied parties must now petition the court in Twin Falls, Idaho for permission to file a late objection.

MICROFILMED

March 5, 1996

Page 2

2) An application for permit could be filed to replace the lost portion of 57-02295. There are presently no filing restrictions for new appropriations of ground water in this area. An application would show irrigation of 53 acres from existing wells, and would require public notice. Although a new right would carry a 1996 date of priority for 53 acres only, this would not likely affect normal operation of the wells. Ground water diversions in the Sinker Creek drainage may be placed under the jurisdiction of the Watermaster, but are not actively regulated unless necessary.

You cannot take either of the above actions unless you own or have possessory interest in the Hackley property. If you would like more information about filing a petition with the SRBA court, contact one of the adjudication staff members in this office. For information about filing a new application for permit, or for other questions, please contact me.

Sincerely,

Cindy Hodges

RE: *Tyson Ranch Water Rights*

Dear Mr. Martin:

Enclosed is the information you requested, as follows:

- Profile reports for water right records 57-00001B, 57-02236 and 57-02295. Only one water right from Sinker Creek was recommended in the recent adjudication process. This right provides for 244 acres irrigation. Two rights from ground water provide for supplemental irrigation of 191 of the same acres. All rights have combined use restrictions.
- Map copy from file 57-00001B, showing the entire 144 acre place of use.
- A priority listing of the Sinker Creek natural flow and storage rights. Note that the rate of flow for the Tyson right 57-00001B is slightly higher on this list; this represents the original decreed rate of flow (from 1917) which has been reduced in the current adjudication due to a reduction in irrigated acres over time. The priority list will be updated when the new decree is finalized. There should be no significant changes to the priority order.
- A synopsis of Watermaster deliveries to Tyson Ranch for the years 1991 through 1995. Average deliveries are only about one-half of the allowable right (5.14 cfs). It is not clear whether this represents all the flow available, or all that was requested. The capacity of the diversion works is about 5 cfs.

Also, in 1992 Mr. Hackley filed for and received a water right permit (57-07499) for development of a spring in NESW Section 15, for stock water and the irrigation of 15 acres. Apparently this spring system had been in use since about 1981, but a timely filing had never been made on the development. Unfortunately, that permit lapsed in 1993 because Mr. Hackley failed to file proof. I have contacted Tysons asking about the present use of the spring. It may be possible for this permit to be reinstated if use under the system has not ceased.

If you need more information regarding the status of lapsed permit 57-07499, or have other questions regarding the balance of the above information, please don't hesitate to call again.

Sincerely,

Cindy Hodges

Change of Address Notification

Dear Claimant:

IDWR has received your notice of the change of address of the water right claim(s) referenced above. The change of address note you sent our Department will suffice to change IDWR records for Basin 57, but not those of the SRBA court. SRBA Judge Hurlbutt issued an Order June 17, 1993 requiring claimants like yourself identified in a Director's Report to use Standard Form 3 for change of address.

I have enclosed Standard Form 3 for your use. Please contact us or the Court (208/736-3011) if you have any questions.

Since the Basin 55 water right claim has not yet been reported to the SRBA court, a Standard Form 3 is not necessary for that right.

Priority December 11, 1959

WILLIAM O. CORWIN (Plaintiff)

vs. J. BAKER

of Boise, Idaho made application for a permit to appropriate the public water of the State of Idaho, dated December 11, 1959, that Permit No. 10-28327 was issued under said application that Certificate of Completion of work with a carrying capacity of 5.67 second feet was issued thereunder on August 11, 1960, showing that said work were completed on the 23rd day of August, 1960, and that on the 23rd day of August, 1960.

of Boise, Idaho made proof to the satisfaction of the State Reclamation Engineer of Idaho of the right to use the waters of the Boise River, a tributary of the Snake River, for the purpose of irrigation under Use Permit No. 10-28327 of the Department of Reclamation and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is hereby confirmed by the State Reclamation Engineer of Idaho and entered of record in Volume 15 of Licenses at page 7917 on the 11th day of August, 1960.

The right hereby confirmed dates from December 11, 1959.

The Point of Diversion is located 545 ft. Eog. 15

In the NE 1/4 of Sec. 22, T. 11 N., R. 11 E., Boise County

That the amount of water to which such right is entitled and hereby confirmed for the purposes aforesaid is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 200 cubic feet per second.

Description and location of use:

License 57-2236 shows land in the SE SW of Sec 14 (30 acres) and land in the NE NW of Sec 23 (10 acres) that does not appear to have been farmed. The 30 acres shown in the SWSW of Sec 14 may actually be the same 30 acres shown to be in SESE of Sec. 15. Likewise the 15 acres shown in the NWNW of Sec 23 may actually be the same 15 acres that are shown in the NENE of Sec. 22. The actual amount of irrigated land North of Sinker Creek according to the aerial photo is 158.6 acres. Therefore, when 57-2295 and 57-2236 are combined they show 284 acres of irrigated land while only 243 acres show on the aerial photos.

Carter Fritschle

NOTE! IF YOU LOOK AT THE MAP ON THE FIELD EXAM FOR 57-2236 YOU CAN SEE THE LAND WAS DRAWN IN EXTENDING INTO THE SE SW, S. 14 + NE NW, S. 23 WHEREAS IT CAN BE SEEN ON THE AERIAL PHOTO ^{THAT} THE IRRIGATED LANDS END IN THE SWSW, SEC. 14 + THE NWNW, S. 23. IT APPEARS A MISTAKE WAS MADE ON THE EXAM. IT WOULD MATCH UP IF YOU TOOK OUT THE 30 AC IN THE SE SW, S. 14 + THE 10 AC IN THE NE NW, S. 23 WOULD EQUAL 40 AC FROM 200 = 160 ACRES WHICH IS APPROXIMATELY WHAT THE AERIAL PHOTO SHOWS, AND WHAT HAS HISTORICALLY BEEN IRRIGATED OVER →

Owyhee County Title Co.
PO Box 8
Murphy, ID 83705

Dear Stan;

This letter is in regard to the claims for O.K. Hackley, Jr. I have enclosed copies of each, some of which need to be returned to me and others which are for your records. I have marked each.

First the easy ones. A57-02236 and A57-02295 have been processed and the copies enclosed are for your records. No problems here.

Secondly, the application for permit for the springs which had the priority date of 1981. Enclosed are two copies, one for your records and the other which needs to be signed and returned to me. Note that the priority date will not be 1981 but will be either 1/19/89 or 3/1/89. 3/1/89 is when I receipted the check but I will push for the January date.

Moving on to a more difficult one. A55-10134 contains the storage rights. Does Mr. Hackley have a pond or other type of storage? If so, we may have to include an acre-foot amount. I will need the dimensions of such to determine this. If no containment is used we may go with an instream stockwater usage. Please advise on the enclosed form and return it to me. Correct your copy, if necessary, and keep for your records.

Now, A57-00001B is the decreed right. Most of the acreages involved were listed in that decree. However, the acreages which I checked on the claim under place of use were not included in that decree. They can be added based on the presumption clause (copy enclosed). It would be helpful if you could supply me with the date of first usage on these additional acreages. Also, I would like the date that the diversion point was first used.

Last but not least, A57-00002. This claim is the one with the priority date of 4/1/1892 and 1.76 cfs of water which did not list the number. Based on the information I have attached to the claim, I believe it should be 57-00002. Let me know if you concur with my findings. Again, there are some acreages shown on the claim which were not included in the decree. These are the acres I checked under the place of use.

The same situation applies as with A57-00001B. If you know the date the land was first irrigated and the diversion point was first used, please let me know. This will be helpful information to include on the claim. Please sign this claim and return to me. I will send you a copy after I have data entered it.

I have enclosed the receipts for the checks submitted. I have not ordered a refund as yet, but will do so when I receive the claims and signed permit application. If you have any questions, feel free to contact me.
