Dear Ms. Delaney:

This is to inform you that the objection to water rights 57-00267 and 57-02333 filed with Idaho Department of Water Resources (IDWR) was in error. As we were preparing our objections for filing, we received some last minute instructions from the Department of Justice to not object to certain types of claims. In our effort to remove these objections, we missed these two from the group going to IDWR. We apologize for the inconvenience it may have caused you.

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

The United States of America, acting through the Bureau of Land Management, objects to this water right recommendation because the claimant is a private individual claiming a water right on public domain lands. The BLM, on behalf of the United States, has managed and controlled this property for the beneficial use of the American public. The claimant has no property interest in the claimed water right or any other water right appurtenant to federally owned lands. The United States objects to all aspects of the right because of these facts, including the recommended name and address, source, quantity, priority date, points of diversion, purpose of use, period of use, place of use, and consumptive use. BLM also objects to the recommendation in its entirety because claimant has not been the exclusive beneficial user of this water given that other members of the public have had access to this land and water source. BLM specifically objects to the quantity, priority date, point of diversion, and/or purpose of use of the claimed right because granting this right will adversely affect the United States senior water right downstream.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The Directors report should be changed to recommend disallowance of this claim.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

Dear Mr. and Mrs. Roeser:

We are currently in the process of preparing the above referenced Notices of Claim for court decree in the Snake River Basin Adjudication. During this review certain questions arose concerning the claims listed above. The following is a summary of what will be recommended to the court in regard to your claims.

Claim A57-00285

This claim will be recommended for direct diversion from Squaw Creek onto 37 acres of irrigation. Our recommendation on total number of acres are only those acres actually being irrigated and not the total acres owned. We have used all the 40-acre tract descriptions that Squaw Creek runs through on your property as points of diversion since your claim indicated that a portable pump is used to divert water to the irrigated lands. The claim also lists domestic use for one home and stockwater for 360 head range cattle and horses. The amount of water will be 0.74 cfs for 37 acres which is 1" of water for each irrigated acre, 0.04 cfs for the home and 0.09 cfs for stockwatering. I am enclosing a copy of the ASCS aerial photo on which I have based my recommendations.

This right was originally decreed for use of 40 inches of Squaw Creek water for the irrigation of 40 acres, stockwater and domestic purposes. I have recommended 0.74 cfs for the irrigation of 37 acres. Idaho law states that the normal duty of water in Idaho be limited to one inch of water per acre, unless it can be shown that more water is needed. In order to determine if more water is necessary, the enclosed Irrigation Flow Rate Questionnaire must be completed. Once this form is completed and returned, the Department can then determine if more than 1 inch per acre is needed. If we do not receive this form by the response date on the top of page one, we will assume you agree with the inch per acre rule and this right will be recommended for 37 inches.

Claim A57-02320

This claim will be recommended for storage water from the springs tributary to Squaw Creek. On this claim we have shown the points of diversion from the springs, along with a point of injection from the reservoir to Squaw Creek and then the tracts that Squaw Creek runs through your property as rediversion points. This claim will be recommended for 35 acre feet of water, which is the capacity of the reservoir and a direct flow rate of 0.54 cfs (limited to 0.54 cfs due to the direct flow under A57-02333 for 0.20 cfs). We have also recommended this claim for the 37 acres of irrigated land as shown on the aerial photo.

Claim A57-02333

This claim will be recommended for direct flow from the springs that flow into and over your reservoir. Since this licensed right was originally for 10 acres in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 1, Twp. 1S, Rge. 5W, we have recommended it the same way. This right also covers domestic use for your home. The points of diversion from the springs are shown, along with the point where the water is injected into Squaw Creek and a rediversion point in the SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 1.

Claim A57-02140

Recommended for disallow because it was not claimed in the prior adjudication (Blackstock vs. Johnstone, dated March 8, 1973).

Claim A57-07202B

Recommended for disallow because you already have licensed rights for 1" to the acre from the springs. No beneficial use found under A57-07202B.

Please note that I did not include the 25 acres west of your home which are shown on the photo because this 25 acres did not appear irrigated on the 1987 Napp infrared photography of this area and it was not shown to our field examiner in 1988 when he went out to make an inspection of use under 57-07202. Before you irrigate these lands you will need to file a separate application for permit to appropriate the water.
