FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990). The director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. REASONS SUPPORTING EACH BOX CHECKED

In response to Statement of the Objection items 3, 3c., 12, 12a., and the first sentence of the Reasons Supporting Each Box Checked section of Statement of the Objection item 7 IDWR responds as follows:

This water right was perfected pursuant to Idaho Code section 42-501. This section sets forth a procedure for appropriating water only for the watering of livestock. IDWR denies this portion of the objection and all allegations

regarding this portion of the objection.

In response to the second sentence of the Reasons Supporting Each Box Checked section of Statement of the Objection item 7 and all allegations of the objection regarding this item IDWR responds as follows: The number of range cattle for this place of use was recommended as claimed by the United States. The United States improperly seeks to use the objection process to amend its notice of claim. IDWR believes that a claimant must obtain leave of the court to amend a claim after the director's report is filed, just as a party must obtain leave of the court to file a late claim after the director's report is filed. Once leave of court is granted, IDWR can investigate the amended claim and make an appropriate recommendation to the court. IDWR lacks sufficient information to form a belief as to the truth of the matter asserted and therefore denies this portion of the objection and all allegations regarding this portion of the objection.

CHANGES TO THE DIRECTOR'S REPORT

The director proposes no changes to the description of this claim in the Director's Report.
