Dear Mr. Bachman:

SUBJECT: Notice of Claims to a Water Right
A57-00041A, A57-04025, A57-10556

We are currently in the process of preparing the above referenced Notices of Claim for court decree in the Snake River Basin Adjudication. During this process certain questions arose concerning the claims listed above. The following claims require the information or changes discussed below.

A57-00041A, A57-04025, A57-10556
Proof of Ownership:

Please submit proof of ownership on the property listed as place of use on the above three adjudication claims. If you do not own this property, please supply us with the name and address of the new owner(s).

A57-04025
Proof of Priority:

This claim was filed based on beneficial use of water dating back to July 1, 1934. On October 12, 1990, the Department sent you a letter requesting that you submit evidence supporting the priority date you have listed on the above claim. This evidence was to have been submitted by December 1, 1990. However, this evidence has not been received in our office.

Before the Department can make a recommendation to the Court for decree of this claim, some evidence of the priority date claimed must be submitted. We are enclosing a brochure outlining types of evidence you may submit.

If we do not receive the requested information, these claims will be recommended for disallowal due to lack of evidence supporting any priority date and/or ownership. Please submit this information by May 1, 1991. Be sure and address your correspondence to my attention.

Sincerely,

Linda A. Werner
Sr. Water Resource Agent

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990) by Joann Marie Boeger. The Director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. The Director of the Idaho Department of Water Resources then filed a *Director's Report* which asserted how the elements of this water right should be decreed by the court.

The above listed water right is **unobjected** to, however a *Standard Form 3 (substitution of party)* changing the owner to John W. Jones was filed on February 15, 1995 and the subcase was therefore referenced to Special Master Haemmerle.

IT IS THEREFORE RECOMMENDED that the above listed water right be **decreed** as listed in the *Special Master's Report and Recommendation for Partial Decree*.

JOHN OR BARBARA JONES
HC 79 BOX 120C

Dear Mr. or Mrs. Jones;

I am writing in regard to the Notices of Claim to a Water Right for the property purchased from Joann Boeger. In reviewing our records I found the change of ownership form you submitted for the name change on the appurtenant claims. This change form indicated that there was a copy of the warranty deed included. We have no record of the warranty deed in our files. Please send me a copy of this deed so I can complete the name change for these Notices of Claim.

This information will suffice for the change to the Department's records. Additionally, SRBA Judge Hurlbutt, Jr. has issued a court order requiring that any claimant with a claim submitted for final decree must complete the enclosed standard form 3 before the Court's records for the decree will be changed to reflect the new owner. Standard form 3 is enclosed along with the directions on how and where to mail the completed form.

So, if you will send me a copy of your warranty deed, then submit the form requested by the Court, we will have met all requirements for ownership change on these Claims. This will ensure that these rights accurately reflect past and present owners and that you will be properly notified of future proceedings.

Thank you for your assistance in this matter. If you have any questions, be sure to contact me.

Sincerely,

Linda A. Werner

COMMUNICATION DOCUMENTATION

Claim No.: 57-00041A
& 57-04025

This form is to be used to document public record information requests regarding any SRBA claim or claims. The form may also be used to document IDWR communications requesting information regarding any SRBA claim or claims when the request is not made in writing or the claim verification report is not readily available to document the request. This form is to be filed in all relevant claim files or a central office file.

Contact Person(s): John Jones

Nature of Contact and Substance of Communication: Mr. Jones was concerned that the Basin 57 Director's Report does not adequately describe the place of use of the Pickett Creek water (57-00041A). Mr. Jones stated that water from Pickett Creek has been used on all of the 25 or 26 acres that are irrigated, not just the 11 acres described in the Director's Report. I told Mr. Jones that at this point the only method he had available to him to have us re-evaluate our recommendation would be for him to file a motion to file a late objection. He requested that we send him the appropriate court approved forms. This information was passed on to Danni Smith for mailing the forms.

The original well was drilled in 1934. It is located by the house which is on the southern end of the field - close to Hart creek. It was used for the CCC camp for domestic & 15 acres of irr. In 1977, a new well was drilled & this well irr. the acreage. This well located in center of field. The old well still used for domestic. In 1979 they drilled another well, located by the house. At that time they hooked the domestic use up to it & piped it to the barn for watering the dairy cattle. The old, 1934 well is now capped.

IRRIGATION RIGHT FROM A GROUND WATER SOURCE

A theoretical calculation is necessary to determine if a measurement is required for irrigation from a groundwater source.

1. Using the found acres (or an estimate by the permit holder) calculate the acre-foot per annum limit. This is the volume that the system must be able to theoretically produce to exclude a rate of flow measurement.
2. Next, given the pump hp and the estimated dynamic water level, calculate the theoretical rate of flow that the system can produce.
3. Using the rate found in step 2 and the days in the permitted irrigation season, calculate the theoretical AFA that the system could produce. This volume is then compared to the first AFA calculation. If the theoretical volume (step 3) is greater than the irrigation requirement volume (step 1) then no measurement is necessary. If it is less, then you must make a diversion rate measurement during the field examination.

1.
$$\frac{28}{\text{Found Acres}} * \frac{5.0}{\text{Irr. Req.}} = \frac{140}{\text{AFA}}$$
2.
$$\frac{(7.5)\text{HP} * 8.8 * (0.70)\text{EFF}}{(\underline{61'})\text{Dyn Level} + (2.3 * \{\underline{60}\}\text{PSI})} = \frac{0.23}{\text{Theor. Div. Rate}} \text{ CFS}$$
 $\frac{46.2}{199}$
3.
$$\frac{0.23}{\text{Theoretical Div. Rate}} * \frac{244}{\text{Days in season}} * 1.9835 = \frac{111.31}{\text{AFA}}$$

SUPER SHOOT SYSTEMS

July 22, 1991

In 1986 my brother, my son, and myself came up with a way to mount the end gun from a pivot on a regular wheel line. We were granted a patent in October, 1987. We then perfected it in 1988, making it self-leveling, receiving a patent on it in April, 1989. In the fall of 1988, after we had turned our irrigation pumps off, we wanted to test our prototype of the second patent. We used the irrigation pump on the Brennen place, as it was still on from irrigating during the summer. We formed a company which we named Treasure Magic, Inc., and called our irrigation system "Super Shoot".

RE: NOTICE OF CLAIM NO[S]: A57-00041A, A57-04025

Dear Mr. Brennan:

We are currently in the process of preparing the above referenced Notice(s) of Claim for court decree in the Snake River Basin Adjudication. During this review certain questions arose concerning the claims listed above. All claims with an A57 prefix number are being reviewed at this time. If you have other claims with this prefix, that are not shown here, we may be contacting you again if questions should arise during their review. Also, if you filed other claims with yet a different prefix for the claim number, such as A02, A51 or A55, please be advised that these claims will be reviewed at a later date. The following claims require the information or changes listed:

Claim No(s): A57-04025

We are currently in the process of preparing the above referenced Notice of Claim for court decree in the Snake River Basin Adjudication.

This claim was filed based on beneficial use of water dating back to July 1, 1934. On October 12, 1990, the Department sent a letter to the previous owner requesting that he submit evidence supporting the priority date listed on the above claim. This evidence was to have been submitted by December 1, 1990. However, this evidence has not been received in our office.

Before the Department can make a recommendation to the Court for decree of this claim, some evidence of the priority date claimed must be submitted. We are enclosing a brochure outlining types of evidence you may submit. If we do not receive the requested information, this claim will be recommended for disallowal due to lack of evidence supporting any priority date.

Page 2

Claim No(s): A57-00041A, A57-04025

Our initial investigation of this claim indicates that the water right claimed was not used during the following period: March, 1982 to July, 1987.

Under Idaho law, a water right may be forfeited by five years continuous nonuse of the right. The use of water may be resumed under certain conditions. However, resumption of use after forfeiture may sometimes result in a change in the priority of the water right to the date of resumption.

Before we can recommend the claim listed above, you must submit one of two types of evidence. First, you may submit evidence showing use of the water during the period stated above. (This evidence should show use frequent enough to leave no five year period of nonuse.) Second, you may provide us with the date you resumed using the water and submit some evidence tending to support that date.

Your response must be received in our office by the response date shown above. If no response is received, then the Notice of Claim will be recommended for disallowal on the basis that the water right claimed has been forfeited by nonuse.

I talked with George Jess who is the watermaster for the Catherine creek drainage. He indicated that although he had not turned any water out into the ditch he thought that the previous owners may have had an arrangement with someone to use their ditch. You may be able to obtain some information from the previous owner, Larry Bachman.

Also, in regard to claim number A57-04025, the irrigation well; you may be able to obtain documentation from the power company substantiating this usage.

Thank-you for your cooperation. If you should have any questions, or feel that you need help in any way, please contact me at 208-334-2190.

Sincerely,

Linda A. Werner

Dear Claimant(s):

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no license, decree or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of first use, or "Priority Date", for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement. While we encourage you to read the entire pamphlet, we would like to direct your attention to the right-hand half of this pamphlet once you open it. There you will find information concerning the evidence requirements mentioned above. The other sections describe to you why this evidence is necessary.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, cannot be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the above claim(s) have been or soon will be conducted by Department personnel.

Please submit the required evidence supporting the priority date(s) by December 1, 1990, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact a water resource agent in this office.

TO: FILE A57-04025

FROM: KAY WALKER *KW*

RE: DOMESTIC USE

Mr. John Jones called the office this morning to find out if his domestic use was claimed in the SRBA. In looking at file A57-04025 I found the domestic use had not been recommended because it was covered under A57-10556. In looking at file A57-10556 I found the domestic use was deleted because the use was covered under A57-04025. More research of the files is needed before making a determination on this domestic use.

November 21, 1996

Following review of Files A57-04025 and A57-10556 it was determined that the Department made a mistake in the recommendations concerning domestic use under these rights. The domestic use was developed in 1934 as claimed and should have been recommended under 57-04025 even though the domestic use is now connected to another point of diversion. Recommendations for 57-04025 will be changed to show irrigation and domestic uses with the remark that states there are 2 points of diversion within the SW $\frac{1}{4}$ NW $\frac{1}{4}$ NW $\frac{1}{4}$ (Lot 2), S30, T04S, R01E. The stockwater use that was recommended under 57-04025 will be removed since that use is recommended under 57-10556.

NO CLAIMS FOUND WITH SAME POU AND IRRIGATION USAGE

NO RIGHTS WITH SAME POU BUT NOT USED FOR IRRIGATION

Theoretical indicated that a monit. is needed. Unable to do this at this time because of lack of equip., but will do so later this summer.

The theoretical calculation dated 7-16-90 is inaccurate. Another theoretical was completed on 10/17/91 using an actual pumping water level. This level is not accurate either because at the time I took the P.W.L. the drawdown still had not stabilized after 1 hour. Even so, the result would not have yielded enough flow & another monit. would have been necessary.

Pump turned on at 0930, approx. SWL = 58.8' (Data obtained on 7-16-90 indicates SWL = 61.0')
1030 - SWL = 84.6'

Pump off @ 1035
@ 1040 SWL = 71.2'
@ 1047 SWL = 58.8'
