9 1/2 acre total irrigation is more accurate & will allow more
leeway for average. 8 acres is cutting it close.

Subject: Town of Murphy
Flow measurement data
Claim No: A57-04052
Date: 6/25/91
From: Linda Werner

The town of Murphy has two wells. The older well known as the railroad well is now used as a backup for the new well which was drilled in 1974. This well has a 15 hp pump.

In determining the flow on this well I had to use the theoretical horsepower calculation. There is no access port on this well so it was not possible to do a manometer measurement. Also, the pipeline off of the pump was not long enough for me to do a sonic measurement. This takes me back to a theoretical horsepower.

The dynamic water level used was 17 feet. This measurement was taken off the pump test information from the well log. There is no accurate means of obtaining a pressure from this well. The only pressure gage port which could be found is located right off the small holding tank located next to the old well. The water is piped approximately 164 feet up to a larger water tank. Therefore; I used an approximation of 40 psi for the pressure.

When plugging this information into the horsepower equation the resulting flow is determined to be 0.85 cfs. The water usage breakdown for the town amounts to a total flow requirement of 0.51 cfs. I have had several conversations with Barbara Jayo, county clerk and Dick Jayo, county maintenance, and neither at any time have mentioned a problem with water supply due to insufficient pumping capability. Therefore; based on this and the above horsepower information I am recommending a rate of flow for this claim based on Department standards.

Permit No. A57-04052

IRRIGATION RIGHT FROM A GROUND WATER SOURCE

A theoretical calculation is necessary to determine if a measurement is required for irrigation from a groundwater source.

1. Using the found acres (or an estimate by the permit holder) calculate the acre-foot per annum limit. This is the volume that the system must be able to theoretically produce to exclude a rate of flow measurement.
2. Next, given the pump hp and the estimated dynamic water level, calculate the theoretical rate of flow that the system can produce.
3. Using the rate found in step 2 and the days in the permitted irrigation season, calculate the theoretical AFA that the system could produce. This volume is then compared to the first AFA calculation. If the theoretical volume (step 3) is greater than the irrigation requirement volume (step 1) then no measurement is necessary. If it is less, then you must make a diversion rate measurement during the field examination.

1.
$$\frac{\text{Found Acres}}{\text{Found Acres}} * \frac{\text{Irr. Req.}}{\text{Irr. Req.}} = \frac{\text{AFA}}{\text{AFA}}$$
2.
$$\frac{(15) \text{ HP} * 8.8 * (0.70) \text{ EFF}}{(17') \text{ Dyn Level} + (2.3 * \{40\} \text{ PSI})} = \frac{0.85 \text{ CFS}}{\text{Theor. Div. Rate}}$$
3.
$$\frac{\text{Theoretical Div. Rate}}{\text{Theoretical Div. Rate}} * \frac{\text{Days in season}}{\text{Days in season}} * 1.9835 = \frac{\text{AFA}}{\text{AFA}}$$

Note: for electrical motors
EFF = 0.70
for diesel motors
EFF = 0.60

SUBJECT: Notice of Claim to a Water Right, A57-04052

Dear Mrs. Jayo:

I have completed the review of the above listed water right filed for the town of Murphy. Enclosed you will find a copy showing the changes recommended on this right. The following is an explanation of the changes I made and the reasons why:

Item 4: Point of Diversion-Our ortho-photo quad and the plat map you submitted, plus my field exam, indicates that the location of the wells is in the NW1/4SE1/4SE1/4 of section 27.

Item 6: Water usage and amounts-Because Murphy is not incorporated this made it necessary to break up all of the towns usage into separate components. To determine the irrigated acreages and their location I used the ortho-photo quad and the 1987 Napp infrared photo, and my field exam.

The domestic usage amount is based on your initial statutory claim of 37 existing homes. The Department has a standard amount which is calculated for subdivisions, etc. This is for in-house use only. (The lawn irrigation is covered under the irrigation usage.)

Commercial-The commercial usage consists of the courthouse, jail and kitchen. The amount was calculated using your approximation of the number of people. Again, we have standard amounts which are dependent upon the type of usage which are based upon certain numbers of gallons/ per day/ per person. I am enclosing a copy of the form I used to obtain this information and I have highlighted the figures which I felt best suited your uses.

Item 9: Non-irrigation uses-This item is used to explain other types of usage under which a water right may be used. In this case, I added the details regarding number of entities served for the domestic and commercial uses. You will also find the fire protection usage in this area. Also, there will be language in the general findings of the decree which allows for fire protection.

Page 2 6-26-91

Item 10: Place of use-This area outlines the location of the domestic, commercial and irrigation usage. Again, this information was obtained from the ortho-photo quad and Napp photograph maps.

If you agree with the above findings, please sign and notarize the handwritten claim form and return to my attention. The claim will have the same identification number as your original statutory claim. Also, there will be an additional fee due of \$17.00. Enclosed is a fee schedule which will explain the reasons behind this.

I would appreciate it if you returned this claim to me by July 16, 1991. We hope to submit our reports to the Director by August 1, 1991. Please contact me if you have any questions or do not agree with my findings.

Sincerely,

Dear Mrs. Jayo:

I am writing in regard to our telephone conversation of this morning when we discussed the installation of an access port in the main well used for the City of Murphy.

Enclosed you will find a brochure explaining the rules and regulations pertaining to well construction standards. The requirement for an access port can be found under rule 3, 11 on page 15. Figure 4, page 18 shows some methods of installing access ports.

I circled one such method of installation. The difference is that the port would go into the well casing instead of coming out from underground. The main item of consideration is that the access port should be installed in such a way that the opening into the well have a smooth edge thereby preventing damage to the water level probes. The opening should have a diameter of 3/4" to 1 1/4".

Again, let me reiterate the importance of completing this in a prompt manner. The deadline for Basin 57 Snake River Basin Adjudication reports is the beginning of June. It is at this time that the report on your statutory claim, numbered A57-04052, will be submitted to the Director of the Department. We must have some method of determining the flow capability of this well so your adjudication claim will accurately reflect the claimed usage.

If you have questions, feel free to contact me.

Sincerely,

Linda A. Werner

In the past, you submitted the above referenced claim(s) in the Snake River Basin Adjudication. Enclosed is a computer generated print-out of the claim(s) for your reference only; this print-out is NOT to be returned or re-filed. You have indicated when this claim was filed that the water right(s) was based on "Beneficial Use" of the water. Water rights of this type are established by the historical use of water for a beneficial purpose, dating back to the time the water was first used, this date being the "Priority Date" as shown on the enclosed print-out. Your claim(s) has not been confirmed by a previous filing with the Department of Water Resources since there is no license, decree or permit on file to verify the use of this water. For this reason, the Department is under a legal requirement to gather evidence from claimants supporting the date of first use, or "Priority Date", for claims based on historical beneficial use of water.

Enclosed is a pamphlet entitled "Evidence of Priority" which describes the types of evidence required and explains what kind of documents will fulfill this requirement. While we encourage you to read the entire pamphlet, we would like to direct your attention to the right-hand half of this pamphlet once you open it. There you will find information concerning the evidence requirements mentioned above. The other sections describe to you why this evidence is necessary.

If no evidence is submitted, or we do not hear from you within the time limit below, your priority date, as claimed, cannot be recommended to the Court for decree. This could jeopardize your water use under this right(s), if water availability problems arise in the future. It is our goal to decree the historical water rights within the Snake River Basin as accurately as possible. Field exams to verify other items of the above claim(s) have been or soon will be conducted by Department personnel.

Please submit the required evidence supporting the priority date(s) by December 1, 1990, referencing all documents with the corresponding claim number(s). If you have any questions not covered by this letter or the enclosed pamphlet, please contact a water resource agent in this office.

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-243, Idaho Code, any person using or claiming rights to the public waters of Idaho established by diversion and application to a beneficial use must file a claim with the Department of Water Resources on or before June 30, 1983. Exempted from this filing are single family domestic uses as defined in Section 42-230(d), Idaho Code. Also exempted are rights represented by a permit, license, decree, adjudicated right, or a previously filed claim.

The filing of this claim does not confirm the water right claimed but failure to file may result in forfeiture of a water right.

HOW YOU WILL RECEIVE NOTICES IN THE SNAKE RIVER BASIN ADJUDICATION

All documents filed in the Snake River Basin Adjudication other than notices of claims are filed with the court. Notices of claims to water rights filed in the Snake River Basin Adjudication are filed with the Idaho Department of Water Resources. Copies of all documents filed in the Snake River Basin Adjudication will not be mailed to all parties (claimants) in the adjudication.

By order of the court, any document filed with the court will be mailed only to those parties who may be directly affected by it. A monthly docket sheet will be prepared by the department which contains a summary of all documents filed with the court in the previous month and the dates and locations of hearings scheduled for the following three months. The docket sheet will be filed with the district court clerk in each county within the Snake River Basin in Idaho. Copies of the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying. If you wish to receive a copy of the docket sheet each month, you should mark the appropriate place on your notice of claim form. You will be charged a small annual subscription fee to cover the cost of copying and mailing. Copies of any document listed on the docket sheet may be obtained from any of the offices of the department either in person or by mail; a small fee will be charged to cover the cost of mailing and/or copying.

Copies of all notices of claims filed with the department will be available for inspection from all offices of the department. Copies of the notices of claims may be obtained in person or by mail, but you will be charged for the cost of copying and mailing. (A claimant will not be charged for a copy of his or her own notice of claim, and a person who acquires property with water rights for which a notice of claim was filed will not be charged for a copy of the notice of claim filed by the previous owner.)

After the notices of claims have been reviewed, the director will prepare and file a report with the court. Part 1 of the report will contain the director's recommendations as to each water right claimed under state law. Part 2 of the report will list each federal reserved water right claimed. A number of reports will be prepared, one or more for each sub-basin in the Snake River Basin. When the report for your sub-basin is filed with the court, you will be mailed a notice informing you that the report for your sub-basin has been filed. The notice will be sent to the most recent address shown by the department's files. Attached to the notice will be a copy of those portions of the report describing the water rights you have claimed. If you do not agree with the way your water right is described, you may file an objection to the report with the court. You can also file an objection if you disagree with the way other claimant's water rights are described, and the notice will tell you where a copy of the full report is available for inspection. The notice will tell you when and where to file your objection. The notice of filing for each sub-basin report will also be published state-wide in local newspapers.

It is very important that you inform the department in writing of any change in your address. This is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

If you are acquiring property with water rights in the Snake River Basin water system in Idaho (either by purchase, gift, inheritance, or other means), it is very important that you inquire of the department whether a notice of claim has been filed. If not, you must file a notice of claim or the water right may be declared by the court to no longer exist. If a notice of claim has been filed, it is very important that you file a written notice of change in ownership with the department. The notice of change in ownership must be accompanied by some evidence of the change in ownership, such as a copy of the deed or a property tax statement showing the name of the new owner. Again, this is to make sure that you receive the notices affecting your water rights that are to be mailed by the department.

The cost of the subscription to the docket sheet is \$7.50 for calendar year 1988. The cost of the subscription may increase a small amount for calendar year 1989 if the cost of copying and/or mailing should increase.

If you are planning to file a motion or other pleading (not a notice of claim) with the court (not IDWR), the court has issued an order setting a special procedure that is different from the usual civil rules. A copy of the order may be obtained from any office of IDWR; you may be charged for the cost of mailing and/or copying.
