INSTRUCTIONS

This form has been prepared to assist new owners of property to comply with the requirements of Section 42-1409(7), Idaho Code. This statute provides that new property owners notify the Department of Water Resources (IDWR) of any change in ownership of a water right during an adjudication of water rights, and if a claim for the water right has not been filed to file the needed claim(s).

Separate brochures are available from IDWR describing the adjudication of water rights and the requirement to notify IDWR of changes in ownership. If you would like any of these brochures or if you have questions about completing this form please contact your nearest office of IDWR or you may call 1-800-451-4129 (toll-free).

The first line of the form asks for the date of closing so IDWR will have a record of the effective date of the property transfer.

The second line of information requires the legal description of the property being transferred. This information is **ESSENTIAL** and should be available from the documents that will be present at the time of closing. The first two lines of the legal description **MUST** be completed. IDWR's records are based upon legal descriptions using township, range, section and fractions of a section descriptions, and this information must be included on the form. If you also have available a legal description based upon a townsite or subdivision and lot and block number, please also include this additional information. A lot and block legal description is **NOT** a substitute for the township, range, section and fraction of a section description.

After completing the legal description, if all water is supplied by a public service water supply you may check the first box; complete the name, address and telephone information for yourself, the new owner; sign the form in the space provided and return the form to the IDWR office nearest you.

If there are water rights associated with the property, the seller should be able to provide you with the water right number(s). The water right number(s) for the property are to be put in the space provided at the second box on the form. If you or the seller believe there are water rights for the property but the numbers are unknown, then you may wish to call or come into an office of IDWR for assistance in identifying the water rights for the property involved. If claims for the property have not been filed you will be so advised by IDWR.

After the water right number(s) for the property has been entered on the form, complete the name and address information for **BOTH** the former owner/seller and for yourself, the new owner, in the spaces provided. Please also include your telephone number. If the property you have purchased is only part of the property owned by the former owner/seller, you may be purchasing only part of the total water right held by the seller. This means the water right held by the seller must be split so you get your proportionate share of the water right. Be sure to include a description of the portion of the water right you have purchased. The seller should be able to help you describe the portion of the water right for the property you have purchased.

If the former owner/seller will sign the form and the seller is shown as the claimant of the water right in IDWR's records, then you do not need to attach proof of ownership of the land or the water right. The seller should know if the original claim was filed by him, or if the seller has filed a change in ownership so the seller is shown as the claimant of the water right in IDWR's records. If the seller is not going to sign the form then you must attach some proof of ownership of the property described at the top of the form or proof of ownership referencing the specific water right(s) for the property.

The new owner must sign the form in the space provided. If the former owner/seller is available to sign the form please do so in the space provided.

When complete, the new owner and the former owner/seller should each retain one of the copies and return the original of the form to IDWR. You may return the form to the IDWR office nearest you or to: Idaho Department of Water Resources, Statehouse Mail, Boise, ID 83720-9000, Attention: Adjudication Bureau.

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409(1990) by Shoofly Ranch. The director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. The Director of the Idaho Department of Water Resources then filed a *Director's Report* which asserted how the elements of this water right should be decreed by the court.

An objection to the *Director's Report* for water right 57-07051B was filed by United States (BLM). Subsequently, a *Standard Form 5* was filed as to how the elements of this water right should be decreed. The *Standard Form 5* was accepted by the court; now therefore,

IT IS THEREFORE RECOMMENDED that subcase 57-07051B be decreed as recommended in the attached *Preliminary Special Master's Report and Recommendation for Partial Decree*.

REASONS SUPPORTING EACH BOX CHECKED

In the space following, you must state the reason(s) by number for each box checked. You may use additional pages if necessary.

The United States of America, acting through the Bureau of Land Management, objects to this water right recommendation because the claimant is a private individual claiming a water right on public domain lands. The BLM, on behalf of the United States, has managed and controlled this property for the beneficial use of the American public. The claimant has no property interest in the claimed water right or any other water right appurtenant to federally owned lands. The United States objects to all aspects of the right because of these facts, including the recommended name and address, source, quantity, priority date, points of diversion, purpose of use, period of use, place of use, and consumptive use. BLM also objects to the recommendation in its entirety because claimant has not been the exclusive beneficial user of this water given that other members of the public have had access to this land and water source.

CHANGES TO THE DIRECTOR'S REPORT

Specifically describe how you want the Director's Report to be changed. You may use additional pages if necessary.

The Director's Report should be changed to recommend disallowance of this claim.

Please note: You should attach copies of documents which support your objection. Note on each document the "box number" it supports.

Case No. 39576	)	SPECIAL MASTER'S REPORT
_____	)	

FINDINGS OF FACT AND CONCLUSIONS OF LAW

A notice of claim was filed for this water right pursuant to I.C. § 42-1409 (1990) by Shoofly Ranch. The director of the State of Idaho Department of Water Resources examined the water system for areas 1, 2, and 3 and investigated and abstracted the notices of claims for those Reporting Areas. The Director of the Idaho Department of Water Resources then filed a *Director's Report* which asserted how the elements of this water right should be decreed by the court.

An objection to the *Director's Report* for water right 57-07051B was filed by United States (BLM). Subsequently, a *Standard Form 5* was filed as to how the elements of this water right should be decreed. The *Standard Form 5* was accepted by the court.

A *Preliminary Special Master's Report and Recommendation* for this right was issued. No motion to alter or amend was filed and the time for filing such motions has now expired; therefore,

IT IS THEREFORE RECOMMENDED that subcase 57-07051B be decreed as recommended in the attached *Special Master's Report and Recommendation for Partial Decree*.

INVENTORY & EVALUATION

* ☐ INDIVIDUAL
☐ GROUP
☐ UNIT OF GOVERNMENT

REQUESTED BY Paul Frederick LOCATION Grand View

ASSISTED BY Gale Roberts DATE Sept. 7, 1973

SITUATION: A summary of soils and their irrigation requirements requested by Mr. Frederick.

Soil texture: light to medium (mostly loamy sands)

Depth: 10-20" (less than 10% over 20" deep)

Underlying Material: Gravelly to stony

Water holding capacity to foot: 2-3"

Available water holding capacity to foot: 1.0-1.5

Available water in profile: .9 - 2.5 (Average 1.5)

Peak consumption use of alfalfa grass: .32" per day

SUGGESTED SOLUTION(S): Irrigation Interval: 5 days

Net Amount to be applied at each irrigation: 3"

(50% efficiency)

Conclusion: In order to apply only 3" of

water by gravity on these gravelly soils, the

irrigator must change the water at least

4 times per day and this would be very

difficult without automation.

MEMORANDUM

From: M. Clayne Barron

Date: September 6, 1973

To: File #57-7051

Subject: Re-examination Request

Mr. Frederick came to the office today to request that licensing of water permit no. 57-7051 be delayed temporarily in order that he can present evidence that more than 1" per acre is necessary to raise his crops in the area covered by the permit. Sandy soil is underlayed with river gravel, therefore more water is needed to raise grass and alfalfa hay. The pump is capable of producing at least 3.45 c.f.s. and the permit is for 3.00 c.f.s. I therefore recommend that licensing be delayed pending further examination of evidence concerning this matter.
